This volume, covering 1945 to 1992, is the third of three volumes on the role of federal military forces in domestic disorders. Summarizing institutional and other changes that took place in the Army and in American society during this period, it carries the reader through the nation's use of federal troops during the civil rights movement of the 1950s and 1960s and the domestic upheavals of the 1960s and 1970s associated with the Vietnam War. The development and refinement of the Army's domestic support role, as well as the disciplined manner in which the Army conducted these complex and often unpopular tasks, are major themes of this volume. In addition, the study demonstrates the Army's progress in coordinating its operational and contingency planning with the activities of other federal agencies and the National Guard. --from the Foreword.

Updates and revises the classic casebook for Entertainment Law

The technical, economic, and social development of the last one hundred years has created a new type of long-term contract which one may call 'Complex International Contract'. Typical examples include complex civil engineering and constructions contracts as well as joint venture, shareholders, project finance, franchising, cooperation and management agreements. The dispute resolution mechanism, which normally deals with such contracts, is commercial arbitration, which has been deeply affected in recent decades by attempts to improve its capabilities. Most importantly, there is the trend towards further denationalization of arbitration with respect to the applicable substantive law. In this regard, a new generation of conflict rules no longer imposes on the arbitrators a particular method to be applied for the purpose of determining the applicable rules of law. Moreover, arbitration more frequently took on the task of adapting Complex International Contracts to changed circumstances. Also, special rules have been developed for so-called multi-party arbitration and fast track arbitration facilitating efficient dispute resolution. The author describes these trends both from a practical as well as a theoretical perspective, evaluating not only the advantages, but also the risks involved with the new developments in arbitration. Relevant issues with respect to the drafting and renegotiation of such contracts are also discussed.

A Study of Mixed Legal Systems: Endangered, Entrenched, or Blended takes the reader on a fascinating voyage of discovery. It includes case studies of a number of systems from across the globe: Cyprus, Guyana, Jersey, Mauritius, Philippines, Quebec, St Lucia, Scotland, and Seychelles. Each combines its legal legacies in novel ways. Large and small, in Europe and beyond, some are sovereign, some part of larger political units. Some are monolingual, some bilingual, some multilingual. Along with an analytical introduction and conclusion, the chapters explore the manner in which the elements of these mixed systems may be seen to be 'entrenched', 'endangered', or 'blended'. It explores how this process of legal change happens, questions whether some systems are at greater risk than others, and details the strategies that have been adopted to accelerate or counteract change. The studies involve consideration of the colourful histories of the jurisdictions, of their complex relationships to parent legal systems and traditions, and of language, legal education and legal actors. The volume also considers whether the experiences of these systems can tell us something about legal mixtures and movements generally. Indeed, the volume will be helpful both for scholars and students with a special interest in mixed legal systems as well as anyone interested in comparative law and legal history, in the diversity and dynamism of law.

As Felix Frankfurter and James Landis write in their preface to *The Business of the Supreme Court*, "To an extraordinary degree legal thinking dominates the United States. Every act of government, every law passed by Congress, every treaty ratified by the Senate, every executive order issued by the President is tested by legal considerations and may be subjected to the hazards of litigation. Other Nations, too, have a written Constitution. But no other country in the world leaves to the judiciary the powers which it exercises over us." This classic volume, first published in 1928, originated in a series of articles written by Frankfurter, then a professor of law at Harvard University, and his student, Landis, for the *Harvard Law Review*. These articles chronicled and analyzed the many judiciary acts that were passed between 1789 and 1925, and illuminated the intimate connection between form and substance in the life of American law. For instance: When a community first decided to enact zoning laws--the Supreme Court had to approve. When the United States made a treaty with Germany following World War I--the Supreme Court had to define the limits and meaning of the treaty. Newly reissued with an introduction by constitutional expert Richard G. Stevens, *The Business of the Supreme Court* is still as fresh and relevant today as it was when first published. It is a work that will aid the student of the law to both love the law and remain true to its purposes.
