A result of nearly five years of keen and critical observation, Bihar: A Museum of Lawlessness is a work of empirical writing on one of India's most talked (and least cared) about states. In a brutally frank narrative, the writer tries to depict the ills affecting each and every organ of the state. Casteism, criminalisation and corruption of every imaginable and unimaginable kind, that the writer has personally witnessed and/or felt, are dealt at length in this book. An impotent and badly demoralized constabulary, a caste-conscious judiciary, a completely criminalized political class, a bureaucracy bent upon breaking the norms and a citizenry blinded by caste- all make up a state, which the author describes as a chariot that has suffered a complete breakdown, a rot beyond repair, an illness beyond cure .

Primarily intended for the undergraduate and postgraduate students of psychology, this book will help understand the methodology of experiments and the basic concepts of experimental psychology. Since the experiments are described in detail with the help of purely hypothetical data, the readers will easily understand the procedure and the steps involved in each experiment. Complete reports of more than fifty experiments will certainly help understand the significance of each step in an experiment. The detailed description of experiments will also help in conceptualising relevant problems and designing appropriate experiments. Another feature is that, more than half of the experiments described in the book do not require sophisticated apparatus.

Key Features

- Sample data are provided in each experiment.
- Theoretical background of experiments is sufficient and clear.
- Sample data are analysed with the help

Today's educators stand at the crossroads of globalization and technology. The world is rapidly shrinking. The workplace is being transformed before our very eyes. Technology is forever changing the way we perceive reality and the way we do business. Educators are required to equip students for a workplace that has yet to emerge. The skill sets of today's job market are often obsolete before students can enter the workplace. Now is the time for educators to rise to the challenges of our modern world. By embracing the vision of yesterday's practitioners and joining hands with tomorrow's practitioners, educators can transform our world and equip their students for the upward mobility and career flexibility required in tomorrow's workplace.

With reference to India; papers contributed to a seminar held at Mysore in 1994 organized by the Indian Institute of Advanced Study.

This book has been developed with a focus on the need to demystify the subject and make it easy for students to grasp the principles and details involved, and make it easily understandable to beginners exposed to the subject for the first time. An attempt has been made to explain things in a logical progression, in the simplest possible way so that neophytes may quickly grasp the concepts and methodology. A novel approach in the book is the illustrative use of computers with TORA package, as a problem-solving tool. In actual practice, situations arise with large and complex problems that are difficult to solve. At such times, using computers to solve problems gives fast and more accurate results. The chapters are arranged so as to progressively explain the workings of various models in actual practice through step-by-step procedures that so simplify and solve them, that even students from a non-mathematics academic background will grasp them quickly. Linear programming, the most powerful tool for managerial decision-making is covered elaborately, including thorough discussion of various LP methods and LP solutions, Duality in LP problems, sensitivity analysis, etc. Models in the book also use Linear Programming to reach solutions

In a technology driven world, basic knowledge and awareness about computers is a must if we wish to lead a successful personal and professional life. Today Computer Awareness is considered as an important dimension in most of the competitive examinations like SSC, Bank PO/Clerk & IT Officer, UPSC & other State Level PSCs, etc. Objective questions covering Computer Awareness are asked in a number of competitive exams, so the present book which will act as an Objective Question Bank for Computer Awareness has been prepared keeping in mind the importance of the subject. This book has been divided into 22 chapters covering all the sections of Computer Awareness like Introduction to Computer, Computer Organisation, Input & Output Devices, Memory, Software, MS-Office, Database, Internet & Networking, Computer Security, Digital Electronics, etc. The chapters in the book contain more than 75 tables which will help in better summarization of the important information. With a collection of more than 3500 objective questions, the content covered in the book simplifies the complexities of some of the topics so that the non-computer students feel no difficulty while studying various concepts covered under Computer Awareness section. This book contains the most streamlined collection of objective questions including questions asked in competitive examinations upto 2014. As the book thoroughly covers the Computer Awareness section asked in a number of competitive examinations,
