"Brings kids inside the world of music by helping them understand what proficient listeners think and feel as they listen to music, and what musicians think and feel as they play music ... Students construct their own understandings of music, first through an exploration of their personal relationship to music, then through a series of listen and talk sessions, and finally, by composing their own pieces and exploring the connections between their lives and the works of music they create ... All lessons fulfill the National Standards for Music Education"--From publisher description.

study in Japan. It describes in detail the process of how teachers conducted lesson study--how they collaborated in order to develop a lesson, what they talked about during the process, and what they looked at in order to understand deeply how students were learning. Readers see the planning of a mathematics lesson, as well as how much content knowledge the teachers have. They observe students' problem solving strategies and learn how Japanese teachers prepare themselves to identify those strategies and facilitate the students' discussion. Written for mathematics teachers, educational researchers, school administrators interested in teachers' professional development, and professional developers, this landmark volume provides an in-depth understanding of lesson study that can lead to positive changes in teachers' professional development and in teaching and learning in the United States.
