In this book, Air Marshal (Retired) M. Asghar Khan presents an insider's view of Pakistan's struggle for democracy from the 1960s to the present. The book expounds on the early entry of Pakistan's armed forces into the country's politics and the author's opposition to military rule that began in 1968 with the Movement for the Restoration of Democracy. This movement resulted in the ouster of President Muhammad Ayub Khan in 1969 after eleven years of military rule. The author describes his continued opposition to autocratic and dictatorial rule, especially General Yahya Khan's policy of brutal suppression through military action in East Pakistan. He also recounts his strong criticism of the General's

refusal to hand over power to Sheikh Mujibur Rehman and the Awami League - winners of the first-ever free and fair general elections held in Pakistan. The author recalls Zulfikar Ali Bhutto's rise to political power during the 1970s, and General Ziaul Haq's dogmatic and iron-fisted military rule during the 1980s, and elaborates on some pertinent features of Pakistan's domestic and international situation. The book concludes with the author's assessment of General Pervez Musharraf's five years in power consequent upon the re-entry of the armed forces in the country's politics in 1999, after a brief and tumultuous interlude with democracy.

For courses in computer programming and engineering. This package includes MyProgrammingLab(tm) Beginner to Intermediate Programming in Java This book is designed to serve as a textbook and reference for programming in the Java language. Although it does include programming techniques, it is organized around the features of the Java language rather than any particular curriculum of programming techniques. The main audience is undergraduate students who have not had extensive programming experience with the Java language. The introductory chapters are written at a level that is accessible to beginners, while the boxed sections of those chapters serve to quickly introduce more experienced programmers to basic Java syntax. Later chapters are still designed to be accessible, but are written at a level suitable for students who have progressed to these more advanced topics. This package includes MyProgrammingLab, an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts. MyProgrammingLab should only be purchased when required by an instructor. Please be sure you have the correct ISBN and Course ID. Instructors, contact your Pearson representative for more information.

This is a brilliant translation of the Aab-e-hayat (Water of Life), the last classical anthology of Urdu poetry. First published in 1880, it has exerted enormous influence over modern Urdu literary history.

Sir Muhammad Iqbal (1873-1938) was not only amongst the leading political figures of his time, but regarded by many as the spiritual father of Pakistan and a great champion of the reform movement of modern Islam. He was also a poet, in both Urdu and

Persian. The recurrent theme of his poems is the infinite potentiality of man, as partner with God in shaping the destiny of the universe. As an ardent Muslim, Iqbal saw the realization of mankind's future in a union of Islamic peoples, unfettered by the bonds of separate nationhood, fully liberated from the chains of imperial domination. The Javid-nama, commonly acknowledged as his greatest work, develops this theme within the frame-work of the 'Ascension' story. In imitation of the Prophet of Islam, the poet soars through the spheres, encountering on his heavenly journey many great figures of history with whom he converses. The resemblance to Dante's Divine Comedy is obvious.
