"This collection of essays studies the rhetoric of Otherness and explores how outsiders to mainstream sites for rhetorical participation find ways to make themselves heard while retaining marginal identities. The question that this collection answers is: how do people who are defined as outsiders create agency-- how do they become agents of change, of social, political, spiritual, and cultural power-- outside of those spaces that we traditionally understand as belonging to the powerful? This collection brings to light the many different ways that politically or socially marginalized people use discourse to garner, access, undermine, or overturn power-- to make themselves seen and heard."--Jacket.

The precise knowledge of production cross sections for specific radionuclides for medium energies (10 MeV to 100 GeV) of the incident particle gains ever more importance, not only for nuclear physics but also for many applications, e.g. astrophysics, radiation protection at accelerators but also on

space flights, radioisotope techniques in medicine and for industrial applications and perhaps even for the removal of nuclear waste by accelerators. Since the last systematic review of these production cross sections in 1973 (LB I/5a, b, c) an impressive amount of new experimental data has been accumulated. In the present subvolume data for the production of radioisotopes by medium energetic deuterons, tritons and  $^3\text{He}$ -nuclei on various targets are presented in tables and figures, the latter showing the general trend of the cross sections and can be more readily used for interpolations. The origin of the authors made it possible to include data from the former USSR and other East European states which sometimes are not easy to access. The tables and figures have been compiled with extraordinary care and should present the most complete compilation for this type of nuclear reactions.

When I receive a call from a mysterious woman seeking my help to escape her abusive husband, I can't refuse, even though I'm supposed to meet my future in-laws in twenty-four hours. Like my hero, Humphrey Bogart, I am a sucker for a damsel in distress, but the woman disappears before I can whisk her to safety, and I feel compelled to find her. As I dig deeper into her identity, I discover her husband, a high-profile attorney, has secrets that could destroy his political aspirations. I'm urgently piecing together clues that may lead not only to my missing client, but to perilous situations I never expected. It's a harrowing race against time to find the kidnappers ... I just hope I'm not too late.

scandal of 1921, when the fat film comedian stood accused of the rape and murder of a pretty screen actress. Arbuckle's is the story of a man born in extreme poverty who was destined to rise to the heights of a multi-million dollar career, only to have it snatched from him by a wave of hysteria and bigotry that swept the globe. It is the story of Hollywood and what really happened in the corridors of power; the political corruption of San Francisco; the immorality of a president. How Charlie Chaplin's career was saved. How Buster Keaton's was begun. Both by Arbuckle. It is a life story that ranges from comic heights to tragic depths. *The Day the Laughter Stopped* confirms David Yallop's reputation as the world's greatest investigative author, combining exhaustive research with compulsive narrative.

significant challenge of human kind to date: the process of recognizing and moving beyond fear. In an age in which fear has literally brought our world to the brink of destruction, understanding why we contract in fear and how we can go beyond this instinctive reaction is essential for our survival as a species. As a World Champion skydiver, test pilot and psychologist, Brian Germain offers a unique personalized perspective on the phenomenon of fear. Reflecting on his many intense experiences with fear, Brian sorts through the most current psychology research on fear, and presents the ways to de-escalate the emotional response in provocative situations. The fundamental premise of the book is simple: Fear makes us stupid. If we are to transcend the limitations imposed by a contracted perspective, we must develop our ability to remain calm. Specific methods for relaxing in dangerous situations are covered in detail, as well as scientific evidence to support the reasons for this unusual and powerful approach to dealing with fear.

A dangerous world of sex, lust and violence... All Noelle Cunningham has ever wanted is a life beyond—beyond the walls of Eden, where only the righteous are allowed to remain, and beyond her stiflingly restrictive existence as a councilman's daughter. But only ruins lie outside the City, remnants of a society destroyed by solar storms decades earlier. The sectors surrounding Eden house the corrupt, the criminal—men like Jasper McCray, bootlegger and cage fighter. Jas clawed his way up from nothing to stand at the right hand of Sector Four's ruthless leader, and he'll defend the O'Kane gang with his life. But no fight ever prepared him for the exiled City girl who falls at his feet. Her innocence is undeniable, but so is their intense sexual attraction, and soon they're crossing every boundary Noelle barely knew she had. But if she wants to belong to Jas, first she'll have to open herself to a world where passion is power, and freedom is found in submission.

Given her very own collection of strips, Marlys shines in all her freckled and pig-tailed groovy glory. The trailer park where she and her family live is the grand stage for her dramas big and small. Joining Marlys are her teenaged sister Maybonne, her younger brother Freddie, their mother, and an offbeat array of family members, neighbors, and classmates. Marlys's enthusiasm for life knows no bounds. Her childhood is one where the neighborhood kids stay out all night playing kickball; the desire to be popular is unending; bullies are unrepentant; and parents make few appearances. *The Greatest Of Marlys* spotlights Barry's masterful skill of chronicling childhood through adolescence in all of its wonder, awkwardness, humor, and pain. Does your child Refuse to cooperate in the morning? Get into trouble for not listening? "Lose it" over seemingly insignificant issues? Seem to resist sleep? An estimated 69 percent of American infants, children, and teens are sleep deprived. Studies have shown that sleep deficits can contribute to hyperactivity, distraction, forgetfulness, learning problems, illness, accidents, and disruptive behaviors. "French philosophy forms a conceptual undercurrent for the book: the sophistic arguments of this super-sized Sartre harken back to the perverse enlightenment logic of Sade, and Zimmerman's prose sparkles when he engages Batialleian religious imagery (e.g., the 'porcine holocaust,' ' or Eliot Greebee's meditations on death while floating drugged and naked upon the Atlantic).
