Rarely has it been possible to study multiple industries in multiple countries and multiple generations over 100 years, to uncover the challenge of business growth and the times when owners decide against it - as well as the implications of it for employees. Our purpose in this book is to apply the ideas of the Anglo-German economist E.F. Schumacher in telling the otherwise unobservable entrepreneurial business history that is embedded within the life-stories of its subjects. In so doing, we question the economic nature of our lives in the twenty-first century.

In an era of unprecedented volatile political and economic environments across the world, computer-based cyber security systems face ever growing challenges. While the internet has created a global platform for the exchange of ideas, goods and services, it has also created boundless opportunities for cyber crime. The debate over how to plan for the cyber security of the future has focused the minds of developers and scientists alike. This book aims to provide a reference on current and emerging issues on systems security from the lens of autonomy, artificial intelligence and ethics as the race to fight and prevent cyber crime becomes increasingly pressing.

The dramatic, humorous and candid memoir of one of the most recognisable names in motorcycling. Henry Cole's passion for motorbikes began when, at

the age of eight, he was first introduced to a "man cave": His great-uncle Redbeard's corrugated iron shed was "stuffed to the gills with old motorbikes" which Henry helped rebuild and ride. Since then, Henry's life can be charted through the bikes and journeys he has been on, from a stifling public-school education, via many years battling addiction, to the big-sky iconic routes Henry has ridden for over twenty series as presenter of numerous TV shows. This book reminds millions of motorcyclists why their bike gives them the freedom to be exactly who they want to be. When you ride a motorbike you become part of a worldwide community of kindred spirits, those of us who will not be pacified by driving a car, but instead live for adventure, escape and the sheer thrill of the throttle.

Injury. Adrenaline. Addiction. These are the things that fuelled one man's race to international stardom as he pushed boundaries and took life on and off the bike to the limits. Starting out as a talented youth riding the desert tracks of California, his reckless nature and incredible talent earned him a position in the rarefied world of professional motorcycle racing.

Despite the success in his professional life, his personal life was crumbling around him - John was battling with depression and temptation, which began to threaten his career, health and marriage, ultimately bringing him to a life of alcoholism, addiction and even smuggling. In his remarkable memoir, one of the world's most renowned riders takes us on a raw and unique journey to the extremes of fast living. John 'Hopper' Hopkins is an icon for motorsport fans worldwide. He won't let anything hold him back. He has broken almost every bone in his body (twice), suffered a bleed on the brain, and had a finger amputated... yet he continued to race. Finally, at the age of 35 - with his latest crash at Brands Hatch in 2017 putting him in rehab for two years - he decided to hang up his helmet. Leathered tells the incredible story of an unparalleled career. From bone-crunching injuries and alcohol-fuelled antics to the breakdown of his marriage, it unveils the true stories behind the lurid headlines. In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and

was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stonier, lighter and decades wiser. She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.

Animus e Anima, pur viaggiando parallelamente, non hanno nei due sessi eguale peso e influenza. Per la donna Animus è la rappresentazione di un maschile di cui ha vissuto per secoli la supremazia, e che ha introiettato a livello inconscio come qualcosa di "superiore" al femminile. Inoltre, secondo le affermazioni di Emma Jung : "Non è ancora risolto il problema dell'Animus -logos, cioè la formazione di una spiritualità "veramente" femminile che non si limiti ad essere una mera imitazione della spiritualità maschile" (Animus und

Anima Rascher Zurich 1934 pag.35). Petra Marotte ne è l'esempio con la sua vita condotta tra mille contraddizioni ma sempre restando fedele al suo modo di essere una donna Animus.

Bernt Spiegel's *The Upper Half of the Motorcycle* was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set.
