The beings come at them in the night, leaving behind iron hot brandings, with memories of abductions and physical violations. They are not of this world, and are from who-knows what dimension... When John and his bride, Joyce exhaust their savings to escape to the Arizona desert from the Midwest, they only know that Stardust Ranch is the perfect place to start a family and for John to recover from the rare genetic illness that has plagued him. It seems a serene way of life to the couple, and they soon offer refuge to a host of abandoned animals that include dogs, horses, and birds. Yet John unknowingly carries a trait within his DNA, and it is somehow connected to a strange rift between realities located on the ranch. These rifts are portals used by beings of every vibration and intent to travel here from other dimensions. At first the goings-on at Stardust Ranch seem coincidental: misplaced items, workmen refusing to come out to the property, standing in one place and finding yourself in another--sudden electrical outages--unexplained shadows--strange bloodstains--leading to sightings of UFO's, and the mysterious appearance of creatures on the property. These are Gumby-like "wire men," sponge-like men of Brillo, and the Greys. Then come the

mutilated carcasses of John's favorite dogs-- And the rampaging terror of two dozen rescue horses. As the visits of the Greys become frequent, Joyce levitates so often that John must anchor her to the bed. Then one night an act so devastating occurs that John picks up arms. The nightly visitations take their toll on the couple. Yet from within the battle an epic truth emerges, a baptism of faith, a fight between good and evil, along with the true meaning of the stargate and a profound message for humanity.

Information & communication technology (ICT) and the automotive sector are two of the most important industries in the EU and the US. The EU's eastern expansion and economic globalization have reinforced competition on the one hand; on the other hand the importance of outsourcing and off-shoring has increased. Against this background the intensification of innovation dynamics becomes crucial – and with them the role of regional innovation clusters. The analysis examines seven regions and six EU countries. The focus is on cluster and network dynamics in both industries, as regional ICT clusters are playing an increasingly central role in many European regions. Specialization and structural change in the automotive sector are highlighted, and new strategic approaches for multinational companies and changes in policy options are identified.

Cyber analysis and warning capabilities are critical to thwarting computer-based (cyber) threats and attacks. The Department of Homeland Security (DHS) established the United States Computer Emergency Readiness Team (US-CERT) to, among other things, co-ordinate the nation's efforts to prepare for, prevent, and respond to cyber threats to systems and communications networks. The authors' objectives were to (1) identify key attributes of cyber analysis and warning capabilities, (2) compare these attributes with US-CERT's current capabilities to identify whether there are gaps, and (3) identify US-CERT's challenges to developing and implementing key attributes and a successful national cyber analysis and warning capability. To address these objectives, the authors identified and analysed related documents, observed operations at numerous entities, and interviewed responsible officials and experts.

A historical and ethnographic study of the conflict between global transportation and rural development as the two intersect at the Panama Canal. In this innovative book, Ashley Carse traces the water that flows into and out from the Panama Canal to explain how global shipping is entangled with Panama's cultural and physical landscapes. By following container ships as

they travel downstream along maritime routes and tracing rivers upstream across the populated watershed that feeds the canal, he explores the politics of environmental management around a waterway that links faraway ports and markets to nearby farms, forests, cities, and rural communities. Carse draws on a wide range of ethnographic and archival material to show the social and ecological implications of transportation across Panama. The Canal moves ships over an aquatic staircase of locks that demand an enormous amount of fresh water from the surrounding region. Each passing ship drains 52 million gallons out to sea—a volume comparable to the daily water use of half a million Panamanians. Infrastructures like the Panama Canal, Carse argues, do not simply conquer nature; they rework ecologies in ways that serve specific political and economic priorities. Interweaving histories that range from the depopulation of the U.S. Canal Zone a century ago to road construction conflicts and water hyacinth invasions in canal waters, the book illuminates the human and nonhuman actors that have come together at the margins of the famous trade route. 2014 marks the 100th anniversary of the Panama Canal. *Beyond the Big Ditch* calls us to consider how infrastructures are materially embedded in place, producing environments with winners and losers.

In this book, tumour growth is perceived as a deviation from the normal development of the human organism. The molecular, cellular, and tissue determinants of different tumours are discussed showing that each is a different disease, often corresponding to a particular developmental stage. The natural history of several cancers illustrates how clinical incidence can be just the visible part of the iceberg, while the first changes at the tissue level sometimes occur several years before tumour growth becomes manifest. Several mechanisms are proposed to explain the distribution of cancers during the human life span and the decline of the incidence of cancers during human senescence.

August Turak is a successful entrepreneur, corporate executive, and award-winning author who attributes much of his success to living and working alongside the Trappist monks of Mepkin Abbey for seventeen years. As a frequent monastic guest, he learned firsthand from the monks as they grew an incredibly successful portfolio of businesses. Service and selflessness are at the

heart of the 1,500-year-old monastic tradition's remarkable business success. It is an ancient though immensely relevant economic model that preserves what is positive and productive about capitalism while transcending its ethical limitations and internal contradictions. Combining vivid case studies from his thirty-year business career with intimate portraits of the monks at work, Turak shows how Trappist principles can be successfully applied to a variety of secular business settings and to our personal lives as well. He demonstrates that monks and people like Warren Buffett are wildly successful not despite their high principles but because of them. Turak also introduces other "transformational organizations" that share the crucial monastic business strategies so critical for success.

Today is Monday. The calls do not come as before. Weeks elapse between them, and when I answer the phone there is no overlap of voices, only my mother's. She spends much of the conversation avoiding mention of the pink elephant trumpeting in the middle of the room. The pink elephant would be my defection to Georgia. When I telephoned with the news of my imminent relocation my father asked, "Georgia, as in the Republic of Georgia by the Black Sea, or Georgia as in the Peach State?" He hoped I meant the former because that Georgia promised unique opportunities to advance the democratic cause of justice. What could Georgia, former land of the Confederacy, offer? Convicting arsonists and thieves in Macon, Georgia, was never Harvard Law grad Natalie Goldberg's dream. The pay is abysmal, the work is exhausting, and the humidity is hell for a woman with curly hair. But when a steamy romance with her high-powered New York boss went bad, Natalie jumped at the first job offered, packed her bags, and headed south. Natalie's leftist Yankee background brands her a conspicuous outsider in this insular community. Her father, a famous civil rights lawyer, refuses to accept her career change—or talk to her. Her best friend begs her to come back home, and Natalie keeps thinking she sees her former lover everywhere. But Natalie's not completely alone. There are a garden-obsessed neighbor, a former beauty queen—turned—defense attorney, and a handsome colleague who has a nervous tic whenever she gets near. And then there's a capital case that has her eating antacids by the truckload. Yep, it's going to be one heckuva long, hot summer. . . .
