This book presents research on the instruction of two heritage languages and two foreign languages in Israeli schools. The authors explore language policy and the way languages are studied from the point of view of students, teachers, schools and curricula. Language in Israel is a loaded concept, closely linked to ideological, political, and social issues. The profound changes in language policy in the West along with two large waves of immigration from the Former Soviet Union and Ethiopia resulted in new attitudes towards immigrant languages and cultures in Israel. Are these new attitudes strong enough to change the language policy in the future? What do students and teachers think about the language instruction at school? Are the teaching materials updated and do they address modern demands? This book provides answers to these and other questions. As well as describing the instruction of two heritage languages, Russian and Amharic, and two foreign languages, French and Spanish, the book also contains an extensive background on the immigration history and acculturation process of the speakers of each of these languages. An in-depth understanding of the case of Israel will serve as a guide for other countries contending with similar issues pertaining to the adjustment of language policies in light of immigration and other challenging circumstances.

The main purpose of this study was to explore current issues surrounding Ethiopian private higher education institutions (PHEIs) and assess the impact of regulatory practices on the smooth operation of PHEIs. The findings of the study revealed that PHEIs are making significant contribution towards increasing access to higher education and creating employment opportunities.

However, there were concerns among stakeholders on the quality of education provided by PHEIs. The application of government regulatory frameworks was also found to be more stringent on PHEIs than on their counterparts in the public sector.

Little Ethiopia of the Pacific Northwest tells the story of the Ethiopian community in Seattle. The community began with approximately two dozen college students who came to the city during the Ethiopian revolution of 1974. These sojourning students earned college and university degrees, but were unable to return home to use them to modernize the developing nation. These stranded students became pioneers who built a micro-community in inner-city Seattle. Providing background with an analysis of Seattle's geographic, demographic, social, and economic challenges, this volume studies the students who became asylum seekers; their falls in position, power, prestige; and the income of these elite and non-elite settlers. The authors analyze examples of those who became entrepreneurs and the ingenuity and determination they employed to start successful businesses. The authors examine the challenges imposed on them by a school system that assigned their children to grade levels according to age rather than knowledge. They explore how the American welfare system worked in practice and explain how and why Ethiopians die young in Seattle. This fascinating study will be of interest to sociologists, ethnographers, and regional analysts.

These chapters discuss the origins and evolution of the conflict, the various ways in which the conflict has been understood and misperceived (both locally and internationally), the profoundly gendered nature of the conflict, the status of those involved with regard to the Sudanese and international law, and the ongoing struggle for peace in the region. A substantial appendix reproduces UN, ICC, and (many for the first time in English translation) Arabic-language documents to trace the history of the conflict. The book also includes a chronology of major events in Sudan.

modes of interaction of children in Ethiopia, against the background that in-depth knowledge of perceptions of cultural values and practices regarding children would contribute to improved work with them and to the promotion of their rights as children. The study is supported by Save the Children Sweden and Norway, and the essays are a collaboration between those bodies and the Department of Social Anthropology at Addis Ababa University. Some essays are based on Master theses from the Department, and others on fieldwork. Seminars and meetings formed part of the research with and about children. The editor provides a theoretical, methodological and ethical aspects overview, and makes proposals on possible new themes. The five other contributors cover Conceptualizations of Children and Childhood: The Case of Kolfe and Semen Mazegaja, Addis Ababa; Growing up in Town and in the Countryside in Amhara Society; Continuity and Change in the Lives of Urban and Rural Children: The Case of Two Schools in SNNPR; Conceptualizations of Children and Childhood in Bishoftu, Oromia; and Children in Ethiopian Media and School Textbooks. Countries emerging from violent conflict face difficult challenges about what the role of media should be in political transitions, particularly when attempting to build a new state and balance a difficult legacy. Media, Conflict, and the State in Africa discusses

how ideas, institutions and interests have shaped media systems in some of Africa's most complex state and nation-building projects. This timely book comes at a turbulent moment in global politics as waves of populist protests gain traction, and concerns continue to grow about fake news, social media echo chambers, and the increasing role of both traditional and new media in waging wars or influencing elections. Focusing on comparative cases from a historical perspective and the choices and ideas that informed the approaches of some of Africa's leaders, including guerrilla commanders Yoweri Museveni of Uganda and Meles Zenawi of Ethiopia, Nicole Stremlau offers a unique political insight into the development of contemporary media systems in Africa.

In February 1937, following an abortive attack by a handful of insurgents on Mussolini's High Command in Italian-occupied Ethiopia, 'repression squads' of armed Blackshirts and Fascist civilians were unleashed on the defenseless residents of Addis Ababa. In three terror-filled days and nights of arson, murder and looting, thousands of innocent and unsuspecting men, women and children were roasted alive, shot, bludgeoned, stabbed to death, or blown to pieces with hand-grenades. Meanwhile the notorious Viceroy Rodolfo Graziani, infamous for his atrocities in Libya, took the opportunity to add to the carnage by eliminating the intelligentsia and nobility

of the ancient Ethiopian empire in a pogrom that swept across the land. In a richly illustrated and ground-breaking work backed up by meticulous and scholarly research, Ian Campbell reconstructs and analyses one of Fascist Italy's least known atrocities, which he estimates eliminated 19-20 per cent of the capital's population. He exposes the hitherto little known cover-up conducted at the highest levels of the British government, which enabled the facts of one of the most hideous civilian massacres of all time to be concealed, and the perpetrators to walk free.
