Performance is critical to the success of any web site, and yet today's web applications push browsers to their limits with increasing amounts of rich content and heavy use of Ajax. In this book, Steve Souders, web performance evangelist at Google and former Chief Performance Yahoo!, provides valuable techniques to help you optimize your site's performance. Souders' previous book, the bestselling High Performance Web Sites, shocked the web development world by revealing that 80% of the time it takes for a web page to load is on the client side. In Even Faster Web Sites, Souders and eight expert contributors provide best practices and pragmatic advice for improving your site's performance in three critical categories: JavaScript—Get advice for understanding Ajax performance, writing efficient JavaScript, creating responsive applications, loading scripts without blocking other components, and more. Network—Learn to share resources across multiple domains, reduce image size without loss of quality, and use chunked encoding to render pages faster. Browser—Discover alternatives to iframes, how to simplify CSS selectors, and other techniques. Speed is essential for today's rich media web sites and Web 2.0 applications. With this book, you'll learn how to shave precious seconds off your sites' load times and make them respond even faster. Offering both practical advice for teachers, counsellors, and administrators, and provocative essays on the politics of gender in schools, this collection brings together established and emerging scholars of trans issues in education. As more young people identify as trans, or outside

normative gender categories, schools must find ways to support their educational success. The authors in this volume explore the diverse experiences of trans youth in schools and insist on understanding trans experiences intersectionally. The chapters grapple with policies, procedures, curricula, and administrative practices that too often neglect the needs of trans students; but also present stories about the ordinary challenges and pleasures that trans youth experience in adolescence. This volume will be of interest to all inclusivity-minded educators and scholars of trans youth. This book was originally published as a special issue of *Sex Education*.

By quadrupling the number of people behind bars in two decades, the United States has become the world leader in incarceration. Much has been written on the men who make up the vast majority of the nation's two million inmates. But what of the women they leave behind? Doing Time Together vividly details the ways that prisons shape and infiltrate the lives of women with husbands, fiancés, and boyfriends on the inside. Megan Comfort spent years getting to know women visiting men at San Quentin State Prison, observing how their romantic

relationships drew them into contact with the penitentiary. Tangling with the prison's intrusive scrutiny and rigid rules turns these women into "quasi-inmates," eroding the boundary between home and prison and altering their sense of intimacy, love, and justice. Yet Comfort also finds that with social welfare weakened, prisons are the most powerful public institutions available to women struggling to overcome untreated social ills and sustain relationships with marginalized men. As a result, they express great ambivalence about the prison and the control it exerts over their daily lives. An illuminating analysis of women caught in the shadow of America's massive prison system, Comfort's book will be essential for anyone concerned with the consequences of our punitive culture.

And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, *Notes from the Hyena's Belly* offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Poetry. Latino/Latina Studies. LGBT Studies. "Like Whitman, Quesada is a poet of motion—journeying to the center of the US, where the traditions and innovations of first-generation Americans traverse the meditative starbursts of hills; ford rivers; cross prairies; and seek out 'the alpenglow of tomorrow and tomorrow.' From Costa Rica to Los Angeles and across the continent, Quesada's poems chronicle one family's history: from the courtship of his parents to their separation, from his childhood struggles to awakening desire from his mother's lottery winnings to his own personal losses, Ruben Quesada carries us toward 'that seam in space' where dream and experience intersect. This isn't the story of what it means to come to this country. It's the story of what it means to belong here"—D. A. Powell.

In October 1939, Albert Einstein warns President Franklin D. Roosevelt that Nazi Germany is actively pursuing an atomic bomb and urges him to make sure that the United States develops the bomb first. Roosevelt heeds the warning and launches the "Manhattan Project" in June 1942.

On 12 October 2010 the world's attention was fixed on a remote copper mine in the Atacama desert in Chile. Final preparations were underway for a daring rescue to bring to an end the longest underground entrapment in human history. 69 days earlier, 33 men were midway through a routine shift, deep in the San Jose mine. They stopped for their lunch break at the tiny safety shelter, 688 meters below the surface. Ten minutes later they heard an almighty crack and a deep rumbling sound. Clouds of dust and debris poured down on the choking men. The bombardment lasted for five hours. When it finally cleared the men began to explore the 6km of underground tunnels, caves and dead ends - only to discover they were trapped under tonnes of collapsed rock. They survived on the most meagre of rations believing an attempt to rescue them was underway: a spoonful of tuna fish and a half glass of milk every 48 hours. But as days turned to weeks, hope began to fade and as starvation set in, they prepared for a slow and agonizing death. 17 days after the collapse a drill finally reached them, they sent a note back to the surface: 'all 33 of us are well inside the shelter'. Now a 700 meter-long tunnel, the width of an orange, connected them to the surface. Above ground at 'Camp Hope' the rescue team now included hundreds of geologists, engineers, psychologists, as well as the families of the men. Three separate rescue missions were launched, but hit one setback after another. 10 weeks after the collapse, and with the world watching, all 33 men would be brought safely to the surface. The 33 is the remarkable story of their 10-week incarceration, half a mile below the surface - and the epic rescue mission which finally brought them back to life.
