In 1948, Ben Carlin set out from New York City with an audacious, lunatic plan to circumnavigate the world in an army surplus amphibious jeep called Half-Safe. Fuelled by cigarettes and adrenaline, the Australian army major pushed his fragile, claustrophobic vehicle through fierce Atlantic hurricanes, across uncharted North African desert, into dense South-East Asian jungle and over the icy dark swells of the North Pacific. It was a 50,000-mile roll of the dice that by all rights should have killed him. When Ben finally pulled into Times Square a decade later, he found himself alone and forgotten, his legacy little more than a wake of women and empty whiskey bottles. And the worst was yet to come. Was it all a fool's errand? Or a pure manifestation of spirit? Where does a dream end and an obsession begin? What's an acceptable cost to pay, and to what lengths will a person go not to be left with the haunting question: what if? The Last Great Australian Adventurer is the compelling account of Ben Carlin's attempt to make an enduring mark on the world at the twilight of the Golden Age of Adventure.

Engine production for the typical car manufactured today is a study in mass production. Benefits in the manufacturing process for the manufacturer often run counter to the interests of the end user. What speeds up production and saves manufacturing costs results in an engine that is made to fall within a wide set of standards and specifications, often not optimized to meet the original design. In short, cheap and fast engine production results in a sloppy final product. Of course, this is not what enthusiasts want out of their engines. To maximize the performance of any engine, it must be balanced and blueprinted to the exact tolerances that the factory should have adhered to in the first place. Four cylinder, V-8, American or import, the performance of all engines is greatly improved by balancing and blueprinting. Dedicated enthusiasts and professional racers balance and blueprint their engines because the engines will produce more horsepower and torque, more efficiently use fuel, run cooler and last longer. In this book, expert engine builder and veteran author Mike Mavrigian explains and illustrates the most discriminating engine building techniques and perform detailed procedures, so the engine is perfectly balanced, matched, and optimized. Balancing and blueprinting is a time consuming and exacting process, but the investment in time pays off with superior performance. Through the process, you carefully measure, adjust, machine and fit each part together with precision tolerances, optimizing the design and maximizing performance. The book covers the block, crankshaft, connecting rods, pistons, cylinder heads, intake manifolds, camshaft, measuring tools and final assembly techniques. For more than 50 years, balancing and blueprinting has been an accepted and common practice for maxim

What could possibly go wrong in paradise? Tired of mortgage payments, thirty-something Andrew and Gwynn sold nearly everything they owned but their Siamese cat and escaped their humdrum nine-to-five existence for life in paradise—a tiny island in one of the remotest spots on Earth: the Okavango Delta in Botswana. Woefully inexperienced, they took control of a luxury game lodge that catered to the likes of French aristocrats, Hollywood directors, Mafia lawyers, and the captain of the England cricket team. Not forgetting the hippos who liked to crash cocktail hour. Trouble soon followed as the reality of running a hotel on an island accessible only by boat or plane burst upon them. Andrew and Gwynn learned it's one thing for guests to wake up with gentle giraffes outside their windows, but it's quite another to keep them safe from poisonous snakes, temperamental elephants, and a hyena with a taste for plastic. All that was child's play compared to figuring out how to feed their guests when a 'quick run' to the grocery store required a plane, a bush pilot, and moderate risk to life, limb, and property. By turns funny, touching, and suspenseful, *Torn Trousers* is a real modern fairytale about getting exactly what you wished for...and then having to live with it. It is often said that Rumi (aka Jalal al-Din, 1207-73) is now the most popular poet in the United States. This conquest of the new world by a middle-eastern medieval writer who died before Chaucer was even born has been achieved with extraordinary speed in less than thirty years. The main key to Rumi's success is the spiritual appeal of his work. It combines lyrical beauty with philosophical profundity, a sense of rapture and an acute awareness of human suffering in ways which speak directly to contemporary audiences. Like the metaphysical poets, Donne, Vaughan and Herbert, Rumi yokes together everyday images with

complex ideas. He talks about divine love in vivid human terms. As a religious teacher of the Dervish order, he expounds the mystical doctrines of Sufism which focus on the notion of union with the Beloved to whom many of the poems are addressed. Persian poetry of this period is not easy to translate. In order to give the greatest possible access to a wonderful poet this selection draws on a variety of translations from the early 20th century to the present, ranging from scholarly renderings to free interpretations.

A new collection that captures the austere serenity of the Southwest American desert. Award-winning, Paris-based poet Alice Notley's adventurous new book is inspired by the life of Marie, a woman who resided in the dump outside Notley's hometown in the Southwestern desert of America. In this poetical fantasy, Marie becomes the ultimate artist/poet, composing a codex-calligraphy, writings, paintings, collage-from materials left at the dump. She is a "culture of one." The story is told in long-lined, clear-edged poems deliberately stacked so the reader can keep plunging headlong into the

events of the book. Culture of One offers further proof of how Notley "has freed herself from any single notion of what poetry should be so that she can go ahead and write what poetry can be" (The Boston Review).
