This book presents state-of-the-art practical guidance on material selection, construction, structural design, architectural detailing, maintenance and repair of rammed earth.

As early as AD 781, the writer of the Xi'an Fu inscription described the spread of Syriac Christianity (called Jingjiao in Chinese) to China as a wind blowing eastward. The discovery of the Xi'an Fu Stele, the Dunhuang Jingjiao Manuscripts, the numerous Syriac tombstones and fragments in Central Asia and many parts of China has unearthed a buried history of Syriac Christianity from the Tang Dynasty to the time of the Mongol Empire. The papers in this volume cover a wide range of topics from manuscripts and inscription, to the historical, liturgical and theological perspectives of Syriac Christianity in this geographic realm. Li Tang is Senior Research Fellow at the Department of Biblical Studies and Ecclesiastical History, University of Salzburg.. Dietmar W. Winkler is Professor of Patristic Studies and Ecclesiastical History at the University of Salzburg and Director of the Center for the Study of Eastern Christianity (ZECO) of the University of Salzburg. (Series: Orientalia - Patristica - Oecumenica, Vol. 9) [Subject: Religious Studies, History, Syriac Christianity, Chinese Studies]

The Church of the East is arguably the most interesting of all the Syriac-speaking Churches. Few outside the Middle East are familiar with it, yet between the ninth and fourteenth centuries the Church of the East was the largest Christian Church in the world, with dioceses stretching from the Mediterranean to Asia and China. The church has been harried and persecuted throughout its history. The tragic story of this `martyred church' is brought vividly to life in this impressive book.

"An achaeological mystery, the story of young American Bruce Brandon, eager to ascertain more about the graves of Egyptian gods, is set against a clearly focused background of the Land of the Pyramids. Bruce is determined to find mummified crocodiles, which he believes were spirited away by reactionary priests during the reign of the ruler Akhenaten, who tried to introduce monotheism into Egypt." --Preface.

The Bible has the astounding power to transform lives. The stories of people like Francis of Assisi, Antony of Egypt, Augustine of Hippo, Martin Luther and Martin Luther King Jr. vividly demonstrate this. Why aren't more of us transformed by Scripture today? Too often we study biblical texts without believing that God truly inhabits this book. Scripture seeks to capture our minds, not merely educate them. In these pages Chris Webb explains that we can transform our Christian life by reading as lovers rather than as theorists. This is possible by coming to the text prayerfully, expectantly, in humility and empty-handed. When we open the Bible, it does not say to us, "Listen: God is there!" Instead, the voice of the Spirit

whispers through each line, "Look: I am here." Reading the Bible this way can reconfigure the habits of your heart, refresh your imagination and memory, reshape and redeem your emotions, realign your reality individually and communally for kingdom life, and take us beyond the Bible into a renewed way of life. Here is the work of today—which is also the work of the whole of life—to open your heart afresh to the living Word of God.

The second volume on Christianity in China covers the period from 1800 to the present day, dealing with the complexities of both Catholic and Protestant aspects.

"The Rammed Earth House is an eye-opening example of how dramatic innovations frequently have their origins in the distant past. By rediscovering the most ancient of all building materials - the earth - homebuilders can now create structures that set new standards for beauty, durability, and extraordinarily efficient use of natural resources." -back cover.

Gravitation, the sphere symmetrical expanding acceleration of Earth means Earth's surface is "falling" under our feet! The surface of the Earth is accelerating together with us. We are taken by the surface of the Earth. Earth's surface is approaching us as if having been in "free fall". While we have all the evidence to prove it - through all of our everyday life and all of our actions - it is so strange that it is difficult to believe. We do not trust our intuition or experience, because it is so unbelievable. This book on Gravitation: our Quantum Treasure does not want to convince you of the truth of the above. The purpose of the book is to show that Nature is granting us the chance to use the infinite energy capacity of gravitation. The future is about motion and electricity generation, based on gravitation. The book's conclusions are based on process approach, on quantum energy and mass balance, on elementary (proton-, neutron-, electron-, quark- and other) processes, on the definition of time, and the understanding of intensity. Our life is constantly changing. The key is the balance. The book gives arguments and explanations, describes events on quantum basis. It provides the perspective for the utilisation of Gravitation: our Quantum Treasure.

Was there a genuine theological consensus about Christ in the early Church? Donald Fairbairn's persuasive study uses the concept of grace to clarify this question. There were two sharply divergent understandings of grace and christology. One understanding, characteristic of Theodore and Nestorius, saw grace as God's gift of co-operation to Christians and Christ as the uniquely graced man. The other understanding, characteristic of Cyril of Alexandria and John Cassian, saw grace as God the Word's personal descent to the human sphere so as to give himself to humanity. Dealing with, among others, John Chrysostom, John of Antioch, and Leo the Great, Fairbairn suggests that these two understandings were by no means equally represented in the fifth century: Cyril's view was in fact the consensus of the early Church.

By definition, winning means that you competed and you came out ahead. Human nature requires us to compete in order to survive. Therefore, winning and survival have the element of success in common. To ascend to a winning position, you need a goal, a desire to achieve it, and the qualities of discipline, perseverance and action to attain it. Having your goal and setting yourself up to achieve your goal is the first step in the process. You adjust your mindset and begin to plan diligently. Goals may be as different as DNA, but methodologies have much in common. Furthermore, your plans and expectations will need adjustments as you go along. That is why the knowledge shared by the CelebrityExperts(r) in this book will be of importance to you. The advice and suggestions of these CelebrityExperts(r) are based on their experiences - both their accomplishments and their shipwrecks. The knowledge they share will allow you to make plans that can propel you in the right direction. That is the function of a mentor - to guide you where you are going and to advise what to avoid. If you wish to develop The Winning Way to your goals, read on... You will never win if you never begin. Helen Row

An exceptionally beautiful and hospitable country, Oman is a researchers delight, with archives and manuscripts, archaeological and ethno-archaeological attractions ranging from pre-Islamic Arabia to the present, and modern multi-tribal communities. Located on the southern edge of the Persian Gulf, where the Arabian Sea and the Indian Ocean meet and control the entrance to the Persian Gulf, it has stood at a commercial and cultural crossroads for centuries. But with commercial sea routes also to Africa and Asia, it is simultaneously a contemporary state that combines modernity and tradition, religion and multiculturalism -- a place where the present meets the past without being bound by it. It is, thus, no accident that Ibadis have played and continue to play an important role in the history of Muslim theology and its political theory, a role that only in recent years has begun to be acknowledged in international academic circles. This volume presents the proceedings of the first international conference dedicated to Ibadism and the Sultanate of Oman, which was held at Aristotle University of Thessaloniki in November 2009. The goal of the conference was to introduce Ibadism

and Ibadī Studies to the worldwide research community and, indeed, it has served as the springboard for other conferences and the founding of academic groups dedicated to Ibadism and the Sultanate of Oman. In the first part of this volume, we are guided through Ibadī history, theology, and jurisprudence while the second part opens the reader to a broad vista on the dialectics between religion, society, and politics within contemporary Ibadī communities and especially that of Oman. By introducing Ibadism to the broader academic community, we hope to contribute to the mutual understanding and rapprochement of peoples, cultures, and religions. In this regard, each paper in the present volume has lasting value. (Luxury Edition)

For over 40 years, Warship has been the leading annual resource on the design, development, and deployment of the world's combat ships. Featuring a broad range of articles from a select panel of distinguished international contributors, this latest volume combines original research, new book reviews, warship notes, an image gallery, and much more, maintaining the impressive standards of scholarship and research with which Warship has become synonymous. In the 2019 edition of this celebrated title, articles include Hans Lengerer's exploration of the genesis of the Six-Six Fleet, Michele Cosentino's look at Project 1030, Italy's attempt to create a torpedo-armed attack and ballistic missile submarines, and A D Baker III's drawing feature on the USS Lebanon. Detailed and accurate information is the keynote of all the articles, which are fully supported by plans, data tables and stunning photographs.

The Business of Partying examines the production, creativity, and strategy behind nightlife hospitality. The nightlife industry encompasses operating a nightclub, bar or other evening destination and marketing the "night out" experience. While not an easy business, it can be a lucrative one with numerous perks if it is done right. The author delves into the minds of nightlife's leading experts and the business models of some of the top nightlife groups and venues in the United States. Tying two main topics together, the book explores how these venues break out of the clutter and how industry-specific marketing tactics have evolved in this digital age. Each generation typically employs some form of the "work hard, play hard" lifestyle, and nightlife brands must fight for their "play hard" attention and money. What makes each individual venue a unique nightlife experience, and what influences partygoers to choose that brand over another? This book is a collection of stories from an array of industry professionals who have created successful nightlife experiences. The history of Christianity in Asia is little dealt with either by Church historians or by historians of religion. It is generally unknown, even amongst theologians, that there was a long history of Christianity in Persia, India, Central Asia and China before the appearance on the scene of the first missionaries from the West. A systematic history of the Christian Church in Asia before 1500 is needed. Drawing on material hitherto unknown in the English speaking world, this is a timely and important book because there is a heightened interest today in the early forms of Asian Christianity. The Church in Asia today seeks to find forms of religious expression that are in harmony with Asian culture as was the case in the earlier period. The book covers the period up to 1500 CE. The geographical areas dealt with are Palestine, Syria, Mesopotamia, Persia, India, Central and South East Asia, China and Japan. The book takes into account the outward development of the Church in these areas as well as the inner, theological issues.

The first part of this book deals with grammatical structures and includes comprehension exercises. The second section deals with composition. Detailed notes are given for the benefit of the student.

Mind-opening writing on what kids need from school, from one of education's most outspoken voices Almost no writer on schools asks us to question our fundamental assumptions about education and motivation as boldly as Alfie Kohn. The Washington Post says that "teachers and parents who encounter Kohn and his thoughts come away transfixed, ready to change their schools." And Time magazine has called him

“perhaps the country’s most outspoken critic of education’s fixation on grades [and] test scores.” Here is challenging and entertaining writing on where we should go in American education, in Alfie Kohn’s unmistakable voice. He argues in the title essay with those who think that high standards mean joylessness in the classroom. He reflects thoughtfully on the question “Why Self-Discipline Is Overrated.” And in an essay for the New York Times, which generated enormous response, he warns against the dangers of both punishing and praising children for what they do instead of parenting “unconditionally.” Whether he’s talking about school policy or the psychology of motivation, Kohn gives us wonderfully provocative—and utterly serious—food for thought. This new book will be greeted with enthusiasm by his many readers, and by teachers and parents seeking a refreshing perspective on today’s debates about kids and schools.

The contributions in this volume were mostly first presented at the conference "Research on Nestorianism in China. Zhongguo jingjiao yanjiu ??????" held in Salzburg, 20– 26 May 2003. Like the conference, the volume explores the subject of "Nestorianism" (jingjiao, "Luminous Religion") in a variety of aspects. The material of the present collection is organized in five parts. The first part presents different aspects of the past and current research on jingjiao. The second part discusses jingjiao in the Tang dynasty, especially the question of the "Nestorian" texts and documents, their authenticity and theology. The third part deals with the "Nestorian" inscriptions and remains from the Yuan dynasty, especially from Quanzhou. Part four is dedicated to questions of the Church of the East in Central Asia and other historically relevant countries. The last part of the book presents a "Preliminary Bibliography on the Church of the East in China and Central Asia" prepared especially for this volume.

This volume of original stories is all for furry feline friends. A unique collection of fantastical cat tales.

The Church of the East is currently the only complete history in English of the East Syriac Church of the East. It covers the periods of the Sassanians, Arabs, Mongols, Ottomans, the 20th century, and informs about the Syriac, Iranian and Chinese literature of this unique and almost forgotten part of Christendom.

Drawing on the latest research and scholarship, this newly revised and updated edition of Religions of the Silk Road explores the majestically fabled cities and exotic peoples that make up the romantic notions of the colonial era.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and o (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

DIV Artemis of Ephesos was one of the most widely worshiped deities of the Graeco-Roman World. Her temple, the Artemision, was one of

the seven wonders of the ancient world, and for more than half a millennium people flocked to Ephesos to learn the great secret of the mysteries and sacrifices that were celebrated every year on her birthday. In this work Guy MacLean Rogers sets out the evidence for the celebration of Artemis's mysteries against the background of the remarkable urban development of the city during the Roman Empire and then proposes an entirely new theory about the great secret that was revealed to initiates into Artemis's mysteries. The revelation of that secret helps to explain not only the success of Artemis's cult and polytheism itself but, more surprisingly, the demise of both and the success of Christianity. Contrary to many anthropological and scientific theories, the history of polytheism, including the celebration of Artemis's mysteries, is best understood as a Darwinian tale of adaptation, competition, and change. /div
