

## November Paper2 Setswana 2013 Memo

This book was developed in order to deliver a unit standards-based curriculum that is in line with the National Qualifications-Framework (NQF).

Academic literacy - prepare to learn is different from traditional courses in that it is task-based: it requires of language learners who are developing their academic literacy to do authentic academic tasks and to solve real academic problems.

"The essays and public addresses of scholar, teacher, philosopher, and activist Es'kia Mphahlele are presented in this collection spanning 40 years of recent African history. The intellectual and distinctly South African perspective exhibited in these writings is enriched by humor and autobiographical anecdotes. Subjects addressed include African literature and literary criticism, education in a democratic South Africa, relations between Africans and African Americans, negritude, African identity, and African humanism. A critical introduction, full biography, bibliography, and brief synopsis of each essay are included."

This book examines the linguistic and discursive elements of social and economic policies and national political leader statements to read new meanings into debates on border protection, national sovereignty, immigration, economic indigenisation, land reform and black economic empowerment. It adds a fresh angle to the debate on nationalisms and transnationalism by pushing forward a more applied agenda to establish a clear and empirically-based illustration of the contradictions in current policy frameworks around the world and the debates they invite. The author's novel vernacular discourse approach contributes new points of method and interpretation that will advance scholarly conversations on nationalisms, transnationalism and other forms of identity imaginings in a transient world.

After retiring from a lifetime of teaching literature, Patricia Meyer Spacks embarked on a year-long project of rereading dozens of novels: childhood favorites, fiction first encountered in young adulthood and never before revisited, books frequently reread, canonical works of literature she was supposed to have liked but didn't, guilty pleasures (books she oughtn't to have liked but did), and stories reread for fun vs. those read for the classroom. *Rereading* records the sometimes surprising, always fascinating, results of her personal experiment. Spacks addresses a number of intriguing questions raised by the purposeful act of rereading: Why do we reread novels when, in many instances, we can remember the plot? Why, for example, do some lovers of Jane Austen's fiction reread her novels every year (or oftener)? Why do young children love to hear the same story read aloud every night at bedtime? And why, as adults, do we return to childhood favorites such as *The Hobbit*, *Alice in Wonderland*, and the *Harry Potter* novels? What pleasures does rereading bring? What psychological needs does it answer? What guilt does it induce when life is short and there are so many other things to do (and so many other books to read)? *Rereading*, Spacks discovers, helps us to make sense of ourselves. It brings us sharply in contact with how we, like the books we reread, have both changed and remained the same.

This clear and lively introduction to probability theory concentrates on the results that are the most useful for applications, including combinatorial probability and Markov chains. Concise and focused, it is designed for a one-semester introductory course in probability for students who have some familiarity with basic calculus. Reflecting the author's philosophy that the best way to learn probability is to see it in action, there are more than 350 problems and 200 examples. The examples contain all the old standards such as the birthday problem and Monty Hall, but also include a number of applications not found in other books, from areas as broad ranging as genetics, sports, finance, and inventory management.

This series features classic Shakespeare retold with graphic color illustrations. Educators using the Dale-Chall vocabulary system adapted each title. Each 64-page, book retains key phrases and quotations from the original play. Research shows that the more students read, the better their vocabulary, their ability to read, and their knowledge of the world. Containing 11 reproducible exercise to maximize vocabulary development and comprehension skills, these guides include pre-and post-reading activities, story synopses, key vocabulary, and answer key. The guides are digital, you simply print the activities you need for each lesson.

Big, bright illustrations make finding information fun and easy for your geographers. Schoolhouse's Beginner Geography & Map Activities workbook is the perfect tool for introducing kids to geography and basic map and globe skills through hands-on activities.

Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*

Rap and hip-hop music is the most successful genre in a generation and the sound has become an unsurpassed cultural phenomenon. *Rap and Hip-Hop* discusses what today's musicians are doing, how they attract a following, and what they are saying through their music.
