Following the requirements of OCR Geography specification A, this revision guide includes sample exam questions to build students' confidence. It can be used for additional practice either in the classroom or at home and offers advice on exam techniques, map skills and data analysis.

Budget literacy is defined as 'the ability to read, decipher, and understand public budgets to enable and enhance meaningful citizen participation in the budget process'. It is comprised of two main parts - (i) a technical understanding of public budgets, including familiarity with government spending, tax rates and public debt and; (ii) the ability to engage in the budget process, comprising of practical knowledge on day-to-day issues, as well as an elementary understanding of the economic, social and political implications of budget policies, the stakeholders involved and when and how to provide inputs during the annual budget cycle. Given that no international standards or guidelines have been established for budget literacy education to date, this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply-side actors in the budget process -- governments -- simplify and disseminate budget information for demand-side actors -- citizens -- this information will then be used by citizens to provide feedback on the budget. However, since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of "budget illiteracy" is to provide budget-literacy education in schools to youth,

helping them evolve into civic-minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures, and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches, learning outcomes, pedagogical strategies and assessment approaches for budget literacy education, and presents lessons that are relevant for the development, improvement, or scaling up of budget literacy initiatives. Written specifically for OCR's Certificate in Administration Level 2, the student book is a comprehensive and complete resource covering all the core units required for the qualification. An ideal companion for students who have taken the Level 1 certificate or who already have a basic understanding of administration.

GCSE Business Studies Revision Guides for the AQA (A), AQA (B), Edexcel and OCR (A) specifications: - outline the core knowledge students need to tackle each subject - highlight key points with data and full colour illustration - explain business terms and jargon - clarify what students are being tested on in their course - provide short tests for understanding and examination-style questions to prepare for the big day!

Written in association with the EBFA, this authoritative text provides a comprehensive and insightful study of current curriculum development and classroom practice with business education. Up-to-date, practical and covering the very latest issues, it presents: * Advice on planning courses and managing the curriculum * The latest developments in 14-19 * Guidance on the emerging work-related curriculum * A focus on key topics such as enterprise education, e-learning and citizenship * A teacher-reviewed annotated resource guide of text-based and web-based resources.

It's time to bring your GCSE Business resources into the 21st Century

The aim of this book is to provide an accessible text for students, covering each of the elements in the OCR GCSE (9-1) Computer Science specification J276. It will be invaluable both as a course text and in revision for students nearing the end of the course. It is divided into eight sections, each broken down into manageable chapters of roughly one lesson. Sections 5 and 6 of the textbook cover algorithms and programming concepts with a theoretical approach to provide students with experience of writing, tracing and debugging pseudocode solutions without the aid of a computer. These sections would complement practical programming experience. Each of the eight sections cover one of the major topics in this course, and each subtopic contains sample examination questions from past papers, which can be set as homework.

Exam Board: OCR Level: GCSE Subject: RS First Teaching: September 2016 First Exam: June 2018 Motivate every student to deepen their understanding and fulfil their potential by following a stimulating, well-paced course through the strengthened content requirements; produced by subject specialists and OCR's Publishing Partner. - Equips students with the detailed knowledge they need to succeed with clear, lively explanations that make key concepts accessible to all ability levels. - Provides opportunities for
