The Lomography phenomenon shows that interest in - and love for - cheap, fun cameras has never been stronger. But the few plastic-lens models that are still manufactured are only the tip of the iceberg, with hundreds of amazing, exciting, weird and wonderful models widely available - and at low prices. This book is the first to look at every significant 'people's camera' launched since Kodak's Box Brownie brought cameras to the masses in 1908 and launched the photo revolution - providing a fascinating insight into the tastes of previous generations. Beginning with 1953, entries for Motion pictures and filmstrips, Music and phonorecords form separate parts of the Library of Congress catalogue. Entries for Maps and atlases were issued separately 1953-1955.

Here's quick access to more than 490,000 titles published from 1970 to 1984 arranged in Dewey sequence with sections for Adult and Juvenile Fiction. Author and Title indexes are included, and a Subject Guide correlates primary subjects with Dewey and LC classification numbers. These cumulative records are available in three separate sets.

It's not just astronauts who get to travel into space anymore. Forward-thinking entrepreneurs have now made space flight a reality for adventure-seekers of all kinds. And just in time, here's a travel guide for kids to plan their own out-of-this-world journeys. Eight potential space vacations are described, one per chapter, complete with information about pre-trip preparations (like training to withstand extreme g-forces), accommodations and dining (hot dogs in zero gravity, anyone?), awesome activities (how about a real moon walk?) and so much more. The trips range from orbiting Earth (available now), to voyaging through Saturn's rings, which may be possible within the next few decades. Featuring the coolest things to see and do in the universe, these space vacations are not to be missed! Award-winning science journalist Peter McMahon has come up with an intriguing concept sure to pique a young reader's interest in all things outer space. Based on the latest science and featuring first-person accounts from experts in the field, this book is chock-full of opportunities for science and technology lessons. With kid-sized bursts of text (including loads of amazing, and sometimes icky, facts), fascinating photographs of everyday life on actual space flights,
