- A new edition of this bestseller, updated and expanded to include watches from 2020 One small step for a man, a giant leap for mankind and an extraordinary destiny for the watch that accompanied Man's first steps on the Moon, thereby becoming the greatest icon in watchmaking history: the Omega Speedmaster "Moonwatch". Introduced to the public by Omega in 1957, the Speedmaster was designed for mainly sporting purposes, such as in motor racing. However, its fate took a completely different turn in the early 1960s. Astronauts going to space, some of whom wore a Speedmaster for private use, wanted to be officially equipped with a reliable, accurate and resistant watch. For this reason, NASA undertook a series of rigorous tests in extreme conditions in 1964 to select the best chronograph to accompany them on their space missions. The Omega Speedmaster won these tests and was officially certified ("Flight Qualified for All Manned Space Missions") by NASA on March 1, 1965 for the Gemini project. It was in July 1969 that it truly made history, serving the astronauts of the Apollo 11 mission (Neil Armstrong, Buzz Aldrin and Michael Collins) for man's first steps on the Moon. This book retraces an extraordinary epic and the evolution of a unique and timeless watch which, from its beginnings in 1957 through to the current models, has remained endlessly fascinating. Updated and expanded to include watches from 2020.

Not to be able to communicate with them, to hear them learn, grow, and express themselves verbally. How fortunate, how blessed I am. This overwhelmed me. Fifty years (and five billion dollars in ticket sales) ago, the dashing Scottish actor Sean Connery declared suavely that he was "Bond, James Bond." Thus began a cinematic series unlike any other. In November 2012, Skyfall, the 23rd movie in what is seen as the authorized line of Bond films, will be released, with Daniel Craig (the sixth Bond) again in the lead role. The world will once more stream to the theaters for another dose of Bond. LIFE was on the scene in the swinging '60s when James Bond became a cultural icon (in fact, when we put the gold-painted actress Shirley Eaton on the cover in 1964, we helped him along), and now LIFE tells the whole story in this commemorative book. Ian Fleming, a high-ranking officer in British Naval Intelligence of World War II, dreamt up his MI6 spy, code number 007, in 1953, and a decade later, with Dr. No, From Russia With Love and then the smash Goldfinger, saw his creation take on a life entirely his own. All the fun of Bond is here: The movies; the reminiscences by the stars; the LIFE photo shoots; the knockoffs and spoofs ("The Man from U.N.C.L.E.;" "Get Smart;" "I Spy;" the first Casino Royale); the artifacts (a model of Bond's Aston Martin DB5 was one of the best-selling toy of 1965); the trivia and inside information on M, Q and Moneypenny-anything a Bond fan would want, packed into one book and then shaken, not stirred. James Bond was, back in the day, one of those cultural phenomena tailor-made for LIFE: It was bright and colorful and vibrant. Today, it still is.

Happy birthday, and welcome back, Commander Bond.

This large coffee table book, about Cartier watches, should be seen as an addition to the collection of excellent books about Cartier, already on the market. Most of these excellent books give an overview of the history of 'La Maison', combined with photographs of watches, jewels tiaras and the famous people that wore those items. 'The 'Gentleman's Files' narrows this down to just men's watches, highlighting the period between 1985 and 2018. It was then that Cartier, for the first time, concentrated on a large range of men's models, from simple time-only models to highly complicated timepieces, often with visually strong ties to their designs from very early years. The watches described in the 'Gentleman's files' are my personal choice and just a selection of what Cartier released in that period. While form and function were united in harmony by 'La Maison' in these creations, it is their unique style that set them apart from any other brand. To do justice to this, the setup of this book is not chronological or aimed to provide you with every single detail of the watches shown, but rather to highlight their style in a unique way. It will, therefore, serve as a visual memento to some of the most stylish and tantalizing watch designs ever created.

Bond is back with a license to thrill. Forty-three years ago, Ian Fleming wrote his last great 007 adventure. Now, in *Devil May Care*, the world's most iconic spy returns in a Cold War story spanning the world's exotic locations. By invitation of the Fleming estate to mark the centenary of his birth, acclaimed novelist Sebastian Faulks picks up where Fleming left off, writing a tour de force that will electrify every James Bond fan. A fitting tribute to the Bond tradition, *Devil May Care* stands on its own as a triumph of witty prose and plenty of double-0 action. "In his house in Jamaica, Ian Fleming used to write a thousand words in the morning, then go snorkeling, have a cocktail, lunch on the terrace, more diving, another thousand words in the late afternoon, then more martinis and glamorous women. In my house in London, I followed this routine exactly, apart from the cocktails, the lunch, and the snorkeling." —Sebastian Faulks

expert, Mike Molatt, ROLEX REPLICATIONS is a pictorial guide of imitation Rolex watches currently being manufactured and marketed, many to unsuspecting buyers as genuine Rolex watches. With modern technology the day of tacky tell-tale quartz movement, inaccurately weighed counterfeits is now replaced with high-end ETA replicas that are designed just like the real watches and can fool even some jewelers. These watches command upwards to \$1500 and are virtually undetectable from the real Rolex to the layman. According to the Swiss Customs Service, counterfeit watches can be made in such a manner as to require special equipment to confirm near authenticity. Counterfeiters are manufacturing rare, vintage Rolex models that most laymen would never consider being fake and they are manufacturing them to the highest quality. According to estimates by the Swiss Customs Service, there are some 30 to 40 million counterfeit watches put into circulation each year. This guide provides reference photographs to various models of Rolex watches that are being mass-produced. These counterfeits are mainly produced in Asia and at least 54% of fakes seized annually originated in China.
