- The first complete book dedicated to one of the most desirable chronographs of the 1960s, Chronomaster Aviator Sea Diver by NIVADA & CROTON Chronomaster Aviator Sea Diver: this singular name belongs to one of the most original professional watches of the 1960s, combining an unparalleled number of functions with a timeless design. Created in 1961, this chronograph was produced for around ten years under several brand names, through a partnership between the Swiss company NIVADA SA and the American firm CROTON WATCH CO. This led to some of its dials bearing probably the most complicated name in watchmaking history: CROTON NIVADA GRENCHEN Chronomaster

Aviator Sea Diver. Thanks to the authors' trademark rigorous methodology, the signature of the 'ONLY' reference works, this book reveals the incredible diversity of the Chronomaster models. It is intended both as an initiation for connoisseurs of exceptional watches and as a reference guide for collectors. This legendary watch will doubtless thus regain the place it deserves among the most desirable 1960s chronographs. - A new edition of this bestseller, updated and expanded to

include watches from 2020 One small step for a man, a giant leap for mankind and an extraordinary destiny for the watch that accompanied Man's first steps on the Moon, thereby becoming the greatest icon in watchmaking history: the Omega Speedmaster "Moonwatch". Introduced to the public by Omega in 1957, the Speedmaster was designed for mainly sporting purposes, such as in motor racing. However, its fate took a completely different turn in the early 1960s. Astronauts going to space, some of whom wore a Speedmaster for private use, wanted to be officially equipped with a reliable, accurate and resistant watch. For this reason, NASA undertook a series of rigorous tests in extreme conditions in 1964 to select the best chronograph to accompany them on their space missions. The Omega Speedmaster won these tests and was officially certified ("Flight Qualified for All Manned Space Missions") by NASA on March 1, 1965 for the Gemini project. It was in July 1969 that it truly made history, serving the astronauts of the Apollo 11 mission (Neil Armstrong, Buzz Aldrin and Michael Collins) for man's first steps on the Moon. This book retraces an extraordinary epic and the evolution of a unique and timeless watch which, from its beginnings in 1957 through to the current models, has remained endlessly fascinating. Updated and expanded to include watches from 2020.
