Dear reader! Online dating is communication, which not only promises positive emotions but also conceals really dangerous threats. Online-scammers turned romantic acquaintances into some form of "art," whose goal is to profit from one of the most vulnerable needs of people - to be loved and to love. Professional scammers successfully earn hundreds of millions of different monetary units per year on their victims. They so polished their skills that even those who are usually not susceptible to deception become victims under the onslaught of professional tricks. But people's broken dreams are not the worst. Virtual acquaintances can endanger your physical, emotional and spiritual health. On the Internet, scammers find it easier to hide their evil intentions. And in matters concerning feelings, dishonesty is especially dangerous. How does this dishonesty manifest itself on the Internet? And what kind of danger does it represent for those who are looking for a romantic acquaintance? The answers to these questions can be found in this book. So, if online dating organized correctly and wisely - is an excellent way to build a happy relationship of a lifetime. But, in the first place, you need to remember that you can fully know a person only after a real communication with him. And before it takes place, follow the tips in this book. If you are informed of the threat, it is easier for you to protect yourself from the dangers that may arise from online dating. Pleasant and Safe Online Dating! Read Further! Library Journal Best Reference 2009 "An excellent gateway to further examination of any of the subdisciplines of relationship science, or as a research tool in its own right." —Library Journal Relationships are fundamental to nearly all domains of human activity, from birth to death. The Encyclopedia of Human Relationships offers an interdisciplinary view of all types of human associations—friends, lovers, spouses, roommates, coworkers, teammates, parents and children, cousins, siblings, acquaintances, neighbors, business associates, and so forth. Although each of these connections is unique in some respect, they share a common core of principles and processes. The implementation of digital media in our today's communication has a strong impact on the media behaviours in the society. In the last decades, great importance is given to the protection of the personality rights in the context of the new media. Since our communication is a media based communication, its impact on the construction of reality affects the normative value pattern of societies. To understand new media as a central aspect of our mediated world, it has to be located and analysed both in the communicative and normative system. Today, social media is not anymore based on user generated content, but is now turned to a platform for business makers with and in the context of Big Data. This book will discuss the formation of different identities as a result of different ways of new media usage. It includes on the one hand online communication between personal and virtual identities. It discusses researches about online identity and online anonymity, Self-presentation strategies by using online dating platforms, the phenomenon of Internet Mothers, as well as the potential of cyberbullying of Snapchat. On the other hand online communication between corporate and new business strategies. It describes and discusses the evolution of television, changes of music consumer habits caused by music on-demand trends, and the impact of social media operations in maintaining brand reputation. This book is located between user generated content and professional applications and regards itself as a contribution to a media discourse in a mediated and globalized world.

Internet Dating deals primarily with the experiences of UK and Australian daters, examining their online accounts to see what kinds of narratives, norms, emotions and 'chemistry' shape their dating. Has the emergence and growth of internet dating changed the dating landscape for the better? Most commentators, popular and academic, ask whether online dating is more efficient for individuals than offline dating. We prefer a socio-political perspective. In particular, the book illustrates the extent to which internet dating can advance gender and sexual equality. Drawing on the voices of internet daters themselves, we show that internet dating reveals how social change often arises in the unassuming, everyday and familiar. We also pay attention to often ignored older daters and include consideration of daters in Africa, Scandinavia, South America, Asia and the Middle East. Throughout, we explore the pitfalls and pleasures of men and women daters navigating unconventional directions towards more equitable social relations.

Based on a study using online ethnography as the major research method, this book explains why and how men in Hong Kong use QQ—an online instant messenger—to “chase” women in mainland China, especially in the neighboring city of Shenzhen. Chasing women through QQ is a reciprocal exchange process during which the resources to be exchanged in the interaction are not negotiated. Rather, the men provide resources to the women, hoping for rewards in return that are not guaranteed. This characteristic of the exchange makes men who chase women through QQ very strategic in their action. They try to maximize the rewards and minimize the costs by adopting myriad strategies, such as constructing an attractive online identity by strategic self-presentation. The role of emotions in the exchange process is also examined. Men learn the emotional norms through the online forum, but sometimes it is difficult for them to control their emotions; some men fall in love when they are not supposed to. As it happens, they have failed to calculate the costs and rewards rationally in that they may provide too many resources to the women without getting enough rewards in return. This book provides original insights into the thought processes, motivations, desires, anxieties and risks of Hong Kong men seeking short-term sexual relations with women on the mainland. These insights are highly relevant to our understanding of the quickly evolving use of social media, a phenomenon of worldwide importance and deep implications.

Computers have changed not just the way we work but the way we love. Falling in and out of love, flirting, cheating, even having sex online have all become part of the modern way of living and loving. Yet we know very little about these new types of relationship. How is an online affair where the two people involved may never see or meet each other different from an affair in the real world? Is online sex still cheating on your partner? Why do people tell complete strangers their most intimate secrets? What are the rules of engagement? Will online affairs change the monogamous nature of romantic relationships? These are just some of the questions Professor Aaron Ben Ze'ev, distinguished writer and academic, addresses in this book, a full-length study of love online. Accessible, shocking, entertaining, enlightening, this book will change the way you look at cyberspace and love forever.

realm of the lonely and desperate, sites like eHarmony, Match, OkCupid, and Plenty of Fish have been embraced by pretty much every demographic. Dating has been transformed from a daunting transaction based on scarcity to one in which the possibilities are almost endless. Now anyone can search for exactly what they want, connect with more people, and get more information about those people than ever before. As journalist Dan Slater shows, online dating is changing society in more profound ways than we imagine. He explores how these new technologies, by altering our perception of what's possible, are reconditioning our feelings about commitment and challenging the traditional paradigm of adult life. Slater takes readers behind the scenes of a fascinating business. The Burden of Choice examines how recommendations for products, media, news, romantic partners, and even cosmetic surgery operations are produced and experienced online. Fundamentally concerned with how the recommendation has come to serve as a form of control that frames a contemporary American as heteronormative, white, and well off, this book asserts that the industries that use these automated recommendations tend to ignore and obscure all other identities in the service of making the type of affluence they are selling appear commonplace. Focusing on the period from the mid-1990s to approximately 2010 (while this technology was still novel), Jonathan Cohn argues that automated recommendations and algorithms are far from natural, neutral, or benevolent. Instead, they shape and are shaped by changing conceptions of gender, sexuality, race, and class. With its cultural studies and humanities-driven methodologies focused on close readings, historical research, and qualitative analysis, The Burden of Choice models a promising avenue for the study of algorithms and culture.

The Internet needs no introduction, and its significance today can hardly be exaggerated. Today, more people are more connected technologically to one another than at any other time in human existence. For a large share of the world's people, the Internet, text messaging, and various other forms of digital social media such as Facebook have become thoroughly woven into the routines and rhythms of daily life. The Internet has transformed how we seek information, communicate, entertain ourselves, find partners, and, increasingly, it shapes our notions of identity and community. The SAGE Encyclopedia of the Internet addresses the many related topics pertaining to cyberspace, email, the World Wide Web, and social media. Entries will range from popular topics such as Alibaba and YouTube to important current controversies such as Net neutrality and cyberterrorism. The goal of the encyclopedia is to provide the most comprehensive collection of authoritative entries on the Internet available, written in a style accessible to academic and non-academic audiences alike.
