****The instant New York Times bestseller.**** ***An international bestseller.*** “Hugely impressive, a major work.”—NPR A pioneering and groundbreaking work of narrative nonfiction that offers a dramatic new perspective on the history of humankind, showing how through millennia, the mosquito has been the single most powerful force in determining humanity’s fate Why was gin and tonic the cocktail of choice for British colonists in India and Africa? What does Starbucks have to thank for its global domination? What has protected the lives of popes for millennia? Why did Scotland surrender its sovereignty to England? What was George Washington's secret weapon during the American Revolution? The answer to all these questions, and many more, is the mosquito. Across our planet since the dawn of humankind, this nefarious pest, roughly the size and weight of a grape seed, has been at the frontlines of history as the grim reaper, the harvester of human populations, and the ultimate agent of historical change. As the mosquito transformed the landscapes of civilization, humans were unwittingly required to respond to its piercing impact and universal projection of power. The mosquito has determined the fates of empires and nations, razed and crippled economies, and decided the outcome of pivotal wars, killing nearly half of humanity along the way. She (only females bite) has dispatched an estimated 52 billion people from a total of 108 billion throughout our relatively brief existence. As the greatest purveyor of extermination we have ever known, she has played a greater role in shaping our human story than any other living thing with which we share our global village. Imagine for a moment a world without deadly mosquitoes, or any mosquitoes, for that matter? Our history and the world we know, or think we know, would be completely unrecognizable. Driven by surprising insights and fast-paced storytelling, *The Mosquito* is the extraordinary untold story of the mosquito’s reign through human history and her indelible impact on our modern world order.

As the global ‘data revolution’ accelerates, how can the data rights and interests of indigenous peoples be secured? Premised on the United Nations Declaration on the Rights of Indigenous Peoples, this book argues that indigenous peoples have inherent and inalienable rights relating to the collection, ownership and application of data about them, and about their lifeways and territories. As the first book to focus on indigenous data sovereignty, it asks: what does data sovereignty mean for indigenous peoples, and how is it being used in their pursuit of self-determination? The varied group of mostly indigenous contributors theorise and conceptualise this fast-emerging field and present case studies that illustrate the challenges and opportunities involved. These range from indigenous communities grappling with issues of identity, governance and development, to national governments and NGOs seeking to formulate a response to indigenous demands for data ownership. While the book is focused on the CANZUS states of Canada, Australia, Aotearoa/New Zealand and the United States, much of the content and discussion will be of interest and practical value to a broader global audience. ‘A debate-shaping book ... it speaks to a fast-emerging field; it has a lot of important things to say; and the timing is right.’ — Stephen Cornell, Professor of Sociology and Faculty Chair of the Native Nations Institute, University of Arizona ‘The effort ... in this book to theorise and conceptualise data sovereignty and its links to the realisation of the rights of indigenous peoples is pioneering and laudable.’ — Victoria Tauli-Corpuz, UN Special Rapporteur on the Rights of Indigenous Peoples, Baguio City, Philippines

Our choices seal our fate. Hannah Reed is about to learn just how important one little decision can be. Hannah's plans for a nice, quiet senior

year of high school are rapidly disintegrating. It all starts when she innocently bursts in on Ethan Flynn in the change room of the clothing store where she works. Ethan's presence in Hannah's world is subtle but constant, and when he saves her life, they become linked by the workings of an ancient society and Ethan's sworn duty to protect Hannah. Working together to figure out what destiny wants with Hannah, the two of them stumble on a baffling mystery that leaves even Ethan questioning what is in store for her future. With Ethan's help, Hannah learns there is far more to this life, to her life, than she ever realized. As they attempt to untangle Hannah's unique past and emerging abilities, an unknown danger from Ethan's past looms ever closer. While racing to put together the pieces of the puzzle before it's too late, Hannah wrestles with the idea that she is anything but average, and that perhaps she is also more to Ethan than just a job. Hleo is the first book in the series with the same name. A story of destiny and how one decision can change everything. When you buy a copy of Hleo, your one decision also has the ability to change the lives of others across the globe. \$3.00CAD from every copy of Hleo purchased goes towards the amazing efforts of the Because I am a Girl Education initiative. Fighting to bring literacy and safe learning resources to girls living in some of the poorest nations in this world.

Developing countries lose billions each year through bribery, misappropriation of funds, and other corrupt practices. Much of the proceeds of this corruption find 'safe haven' in the world's financial centers. These criminal flows are a drain on social services and economic development programs, contributing to the impoverishment of the world's poorest countries. Many developing countries have already sought to recover stolen assets. A number of successful high-profile cases with creative international cooperation has demonstrated that asset recovery is possible. However, it is highly complex, involving coordination and collaboration with domestic agencies and ministries in multiple jurisdictions, as well as the capacity to trace and secure assets and pursue various legal options—whether criminal confiscation, non-conviction based confiscation, civil actions, or other alternatives. This process can be overwhelming for even the most experienced practitioners. It is exceptionally difficult for those working in the context of failed states, widespread corruption, or limited resources. With this in mind, the Stolen Asset Recovery (StAR) Initiative has developed and updated this Asset Recovery Handbook: A Guide for Practitioners to assist those grappling with the strategic, organizational, investigative, and legal challenges of recovering stolen assets. A practitioner-led project, the Handbook provides common approaches to recovering stolen assets located in foreign jurisdictions, identifies the challenges that practitioners are likely to encounter, and introduces good practices. It includes examples of tools that can be used by practitioners, such as sample intelligence reports, applications for court orders, and mutual legal assistance requests. StAR—the Stolen Asset Recovery Initiative—is a partnership between the World Bank Group and the United Nations Office on Drugs and Crime that supports international efforts to end safe havens for corrupt funds. StAR works with developing countries and financial centers to prevent the laundering of the proceeds of corruption and to facilitate more systematic and timely return of stolen assets.

"Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's Book of the Damned was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you"--Taken from Good Reads website.

"Under The Trestle" is the true story of the most compelling murder case in Virginia history. In 1980, beautiful Gina Renee Hall, a Radford University freshman, went to a Virginia Tech nightclub on a Saturday night. She was never seen again. Her abandoned car was found parked beneath a railroad trestle bridging the New River, with blood in the trunk. The investigation led police to a secluded cabin on Claytor Lake, where there was evidence of a violent attack. Former Virginia Tech football player Stephen Epperly was charged with murder, despite the fact that Gina's body was never found. In Virginia's "trial of the century," prosecutor Everett Shockley presented an entirely circumstantial case. Key witnesses against Epperly included his best friend, his mother and a tracking dog handler later believed by many to be a fraud. Three former Virginia Tech football players testified, including a Hokies quarterback once featured on the cover of Sports Illustrated. Would Epperly become the first person in Virginia history convicted of murder without the victim's body, an eyewitness or a confession? And would authorities ever find the body of Gina Renee Hall?

Vince Luca is just like any other high school guy. His best friend, Alex, is trying to score vicariously through him; his brother is a giant pain; and his father keeps bugging him to get motivated. There is just one thing that really sets him apart from other kids—his father happens to be the head of a powerful crime organization. Needless to say, while Vince's family's connections can be handy for certain things (like when teachers are afraid to give him a bad grade), they can put a serious crimp in his dating life. How is he supposed to explain to a girl what his father does for a living? But when Vince meets a girl who finally seems to be worth the trouble, her family turns out to be the biggest problem of all. Because her father is an FBI agent—the one who wants to put his father away for good.

In this classic study, Elliott Leyton challenges the conventional idea of serial murderers as deranged madmen. He explores the twisted – but comprehensible – motives of a half-dozen notorious killers: Edmund Emil Kemper, Theodore Robert Bundy, Albert DeSalvo ("The Boston Strangler"), David Richard Berkowitz ("Son of Sam"), Mark James Robert Essex, and Charles Starkweather. In the process of describing their crimes Leyton exposes the cold rationality that underlies their apparent pointlessness. The result is startling: a revelatory text on a deeply troubling topic.

Knowledge of the processes of educational change is said to be the missing ingredient in attempts to bring about educational innovation and reform. Whether these efforts involve grass roots innovation or large-scale societal reform, failure to understand and act on existing knowledge of the change process has accounted for the widespread lack of success in making educational improvements. This volume analyzes what is known about successful or productive change processes, and identifies corresponding action strategies at the individual, school, local and state levels. Included in this book is a major treatment of the topic of the 'ethics of planned change', a neglected topic in recent literature, especially since strategies for intervening in the change process are receiving more attention. This book is intended to be used by teachers in training and in service, teacher trainers, educational researchers, education historians and administrators.

Discusses the history and techniques of swimming and diving, safety rescue techniques, and skills for a variety of aquatic activities.

ON A COLD, SNOWY NIGHT IN 1985, TWO MEN BEGGED FOR THEIR LIVES. In 1985, two 27-year-old friends left their suburban Detroit homes for a hunting trip in rural Michigan. When they did not return, their families and police suspected foul play. For 18 years, no one could prove a thing. Then, a relentless investigator got a witness to talk, and a horrifying story emerged. **FOR NEARLY TWO DECADES, THEIR KILLERS WENT FREE.** In 2003, this bizarre case hit the glare of the criminal justice system, as prosecutors charged two brothers, Raymond and Donald Duvall, with murder. With no bodies ever found, the case hinged on the testimony of one terrified witness who saw a bloody scene unfold-and who was still nearly too frightened to talk. **THEN A WITNESS TOLD HER CHILLING STORY** Now, the truth behind an 18-year-old mystery is revealed against the backdrop of an unusual, electrifyingly dramatic trial. Raymond and Donald Duvall bragged to friends that they killed their victims, chopped up their bodies and fed them to pigs. A Michigan jury soon had evidence of this brutally methodical execution-evidence that would lead a shocked courtroom through the heart of evil and beyond a shadow of a doubt.

The Bad Bug Book 2nd Edition, released in 2012, provides current information about the major known agents that cause

foodborne illness. Each chapter in this book is about a pathogen—a bacterium, virus, or parasite—or a natural toxin that can contaminate food and cause illness. The book contains scientific and technical information about the major pathogens that cause these kinds of illnesses. A separate “consumer box” in each chapter provides non-technical information, in everyday language. The boxes describe plainly what can make you sick and, more important, how to prevent it. The information provided in this handbook is abbreviated and general in nature, and is intended for practical use. It is not intended to be a comprehensive scientific or clinical reference. The Bad Bug Book is published by the Center for Food Safety and Applied Nutrition (CFSAN) of the Food and Drug Administration (FDA), U.S. Department of Health and Human Services.
