In her new book, prominent professional developer Yvette Jackson focuses on students' strengths, rather than their weaknesses, to reinvigorate educators to inspire learning and high intellectual performance. Through the lens of educational psychology and historical reforms, Jackson responds to the faltering motivation and confidence of educators in terms of its effects on closing the achievement gap. The author seeks to rekindle the belief in the vast capacity of underachieving urban students, and offers strategies to help educators inspire intellectual performance. Jackson proposes that a paradigm shift towards a focus on strengths will reinvigorate educators passion for teaching and belief in their ability to raise the intellectual achievement of their students. Jackson addresses how educators can systematically support the development of motivation, reflective and cognitive skills, and high performance when standards and assessments are predisposed to non-conceptual methods. Furthermore, she examines challenges and offers strategies for dealing with cultural disconnects, the influence of new technologies, and language preferences of students.

These essays, written at the time when the Bill for Human Fertilization and Embryology Act (1990) was going through Parliament, touch on the British debate (on in vitro fertilization, gamete donation and maternal surrogacy) from an anthropological perspective. The implications of the medical developments that lay behind the Act are world-wide and these new procreative possibilities formulate new possibilities for thinking about kinship. The essays are informed by recent re-thinking of models of kinship in Melanesia. From the best-selling author of *The Wind-Up Bird Chronicle* and *After Dark*, a rich and revelatory memoir about writing and running, and the integral impact both have made on his life. In 1982, having sold his jazz bar to devote himself to writing, Haruki Murakami began running to keep fit. A year later, he’d completed a solo course from Athens to Marathon, and now, after dozens of such races, not to mention triathlons and a slew of critically acclaimed books, he reflects upon the influence the sport has had on his life and—even more important—on his writing. Equal parts training log, travelogue, and reminiscence, this revealing memoir covers his four-month preparation for the 2005 New York City Marathon and includes settings ranging from Tokyo’s Jingu Gaien gardens, where he once shared the course with an Olympian, to the Charles River in Boston among young women who outpace him. Through this marvellous lens of sport emerges a cornucopia of memories and insights: the eureka moment when he decided to become a writer, his greatest triumphs and disappointments, his passion for vintage LPs, and the experience, after the age of fifty, of seeing his race times improve and then fall back. By turns funny and sobering, playful and philosophical, *What I Talk About When I Talk About Running* is both for fans of this masterful yet guardedly private writer and for the exploding population of athletes who find similar satisfaction in distance running.

"This is not a book about charismatic visionary leaders. It is not about visionary product concepts or visionary products or visionary market insights. Nor is it about just having a corporate vision. This is a book about something far more important, enduring, and substantial. This is a book about visionary companies." So write Jim Collins and Jerry Porras in this groundbreaking book that shatters myths, provides new insights, and gives practical guidance to those who would like to build landmark companies that stand the test of time. Drawing upon a six-year research project at the Stanford University Graduate School of Business, Collins and Porras took eighteen truly exceptional and long-lasting companies -- they have an average age of nearly one hundred years and have outperformed the general stock market by a factor of fifteen since 1926 -- and studied each company in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from other companies?" What separates General Electric, 3M, Merck, Wal-Mart, Hewlett-Packard, Walt Disney, and Philip Morris from their rivals? How, for example, did Procter & Gamble, which began life substantially behind rival Colgate, eventually prevail as the premier institution in its industry? How was Motorola able to move from a humble battery repair business into integrated circuits and cellular communications, while Zenith never became dominant in anything other than TVs? How did Boeing unseat McDonnell Douglas as the world's best commercial aircraft company -- what did Boeing have that McDonnell Douglas lacked? By answering such questions, Collins and Porras go beyond the incessant barrage of management buzzwords and fads of the day to discover timeless qualities that have consistently distinguished out-standing companies. They also provide inspiration to all executives and entrepreneurs by destroying the false but widely accepted idea that only charismatic visionary leaders can build visionary companies. Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the twenty-first century and beyond.

The Role of English Teaching in Modern Japan examines the complex nature of Japan's promotion of English as a Foreign Language (EFL). In globalized societies where people with different native languages communicate through English, multicultural and multilingual interactions are widely created. This book takes the opportunity to look at Japan and examines how these multiple realities have affected its English language teaching within the domestic context. The myth of Japan's racial and ethnic homogeneity may hinder many Japanese in recognizing realities of its own minority groups such as Ainu, Zainichi Koreans, and Brazilian Japanese, who are in the same EFL classrooms. Acknowledging a variety of English uses and users in Japan, this book emphasizes the influence of Japan's recent domestic diversity on its EFL curriculum and urges that such changes should be addressed. It suggests new directions for incorporating multicultural perspectives in order to develop English language education in Japan and other Asian contexts where English is often taught as a foreign language. Chapters include: Social, cultural, and political background of Japan's EFL education Race, ethnicity, and multiculturalism Representations of diversity in Japanese EFL Textbooks Perceptions of English learning and diversity in Japan The role of EFL education in multicultural Japan This book demonstrates the scope that already exists for using international human rights law in English courts.
