The Practice Standard for Project Risk Management covers risk management as it is applied to single projects only. It does not cover risk in programs or portfolios. This practice standard is consistent with the PMBOK® Guide and is aligned with other PMI practice standards. Different projects, organizations and situations require a variety of approaches to risk management and there are several specific ways to conduct risk management that are in agreement with principles of Project Risk Management as presented in this practice standard.

Companies rarely track their performance against long-term plans, and results often fail to meet projections. When companies do track performance, it seldom matches the prior year's projection, and a great deal of value is lost in translation. This new title in The Economist series shows how businesses can overcome such failings and implement strategy effectively, using facts and anecdotal evidence from the real experiences of firms.

"Customers are the heart of any business. But we can't succeed if we develop only one talk addressed to the 'average customer.' Instead we must know each customer and build our individual engagements with that knowledge. If Customer Relationship Management (CRM) is going to work, it calls for skills in Customer Data Integration (CDI). This is the best book that I have seen on the subject. Jill Dyché is to be complimented for her thoroughness in interviewing executives and presenting CDI." -Philip Kotler, S. C. Johnson Distinguished Professor of International Marketing Kellogg School of Management, Northwestern University "In this world of killer competition, hanging on to existing customers is critical to survival. Jill Dyché's new book makes that job a lot easier than it has been." -Jack Trout, author, Differentiate or Die "Jill and Evan have not only written the definitive work on Customer Data Integration, they've made the business case for it. This book offers sound advice to business people in search of innovative ways to bring data together about customers-their most important asset-while at the same time giving IT some

practical tips for implementing CDI and MDM the right way." -Wayne Eckerson, The Data Warehousing Institute author of Performance Dashboards: Measuring, Monitoring, and Managing Your Business Whatever business you're in, you're ultimately in the customer business. No matter what your product, customers pay the bills. But the strategic importance of customer relationships hasn't brought companies much closer to a single, authoritative view of their customers. Written from both business and technical perspectives, Customer Data Integration shows companies how to deliver an accurate, holistic, and long-term understanding of their customers through CDI.

This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

Traditionally, economics training in public finances has focused more on tax than public expenditure issues, and within expenditure, more on policy considerations than the more mundane matters of public expenditure management. For many years, the IMF's Public Expenditure Management Division has answered specific questions raised by fiscal economists on such missions. Based on this experience, these guidelines arose from the need to provide a general overview of the principles and practices observed in three key aspects of public expenditure management: budget preparation, budget execution, and cash planning. For each aspect of public expenditure management, the guidelines identify separately the differing practices in four groups of countries - the francophone systems, the Commonwealth systems, Latin America, and those in the transition economies. Edited by Barry H. Potter and Jack Diamond, this publication is intended for a general fiscal, or a general budget, advisor interested in the macroeconomic dimension of public expenditure management.

Sistem pembayaran, yang merupakan suatu sistem dari rangkaian panjang pengeluaran negara, adalah sistem yang dimiliki Bendahara Umum Negara (BUN) dalam mengeluarkan uang dari rekening pengeluaran untuk keperluan pembayaran kepada yang berhak. Saat ini sistem pembayaran dilakukan dengan metode tunggal yakni melalui penerbitan Surat Perintah Pencairan Dana (SP2D) yang berfungsi sebagai bilyet giro yang menjadi dasar bagi bank untuk mendebit sejumlah dana pada rekening milik BUN dan memindahkannya ke rekening pihak ketiga. Dari rangkaian berbagai aktivitas pada sistem pembayaran, settlement SP2D merupakan akhir dari seluruh rangkaian pada sistem pembayaran. Tepat jumlah, tepat orang dan tepat waktu merupakan tiga elemen dasar yang harus dimiliki oleh sebuah sistem pembayaran. Proses penerbitan dan settlement SP2D sendiri telah mengalami banyak penyempurnaan, seperti percepatan penerbitan SP2D dan penyampaian soft copy SP2D kepada Bank Operasional. Meskipun demikian, masih terdapat beberapa potensi kelemahan yang perlu dicari solusinya. Dua kelemahan yang paling dirasakan adalah tidak dapat dipastikannya kapan aliran dana pencairan SP2D dapat diterima yang berhak serta kemungkinan terjadinya retur transaksi SP2D. Meski penyebab retur telah dapat diidentifikasi, namun sejauh ini belum terdapat upaya yang komprehensif dan tuntas untuk pencegahannya. Selain dua kelemahan tersebut, aktivitas settlement SP2D saat ini masih didominasi dengan proses manual dan terlalu banyak membutuhkan intervensi manusia. Penulisan buku ini ditujukan untuk menghasilkan solusi yang sistematis dan upaya pencegahan atas berbagai permasalahan yang timbul. Penyempurnaan settlement SP2D didasarkan atas penyempurnaan proses bisnis seluruh aktivitas yang terjadi dengan memanfaatkan teknologi informasi yang sudah berlaku umum di dunia perbankan. Untuk mencegah terjadinya retur – sebuah proses yang sangat memakan waktu dan biaya – diusulkan untuk menerapkan metode validasi atas data dan status rekening tujuan pembayaran dengan menggunakan koneksitas dengan penyedia jaringan data perbankan. Untuk tujuan yang sama, perlu dilakukan penyempurnaan atas aplikasi satker berupa database rekening yang menyimpan data rekening pihak ketiga sehingga mengurangi aktivitas entry dan re-entry nomor rekening pada aplikasi satker termasuk pembangunan model aliran dan keamanan informasi data rekening dari satker kepada KPPN hingga diteruskan kepada pihak perbankan. Sejalan dengan penyempurnaan proses bisnis di atas, turut diusulkan untuk membangun relasi langsung antara rekening pengeluaran yang didebit dengan rekening penerima dana, dengan cara membebaskan Rekening Pengeluaran Kuasa BUN Pusat pada bank yang sama dengan bank pada rekening tujuan. Selain untuk mengurangi jumlah jaringan perbankan yang terlibat, juga untuk penyederhanaan jumlah rekening yang dikelola BUN dan sebagai sentralisasi settlement kas melalui Direktorat Pengelolaan Kas Negara. Implementasi berbagai usulan pada buku ini dibagi ke dalam dua periode, yakni sebelum Sistem Perbendaharaan dan Anggaran Negara (SPAN) dan pada saat SPAN dijalankan. Periodisasi implementasi perlu dilakukan karena terdapat dua sistem yang berbeda pada dua kurun waktu yang berbeda pula. Selain untuk mendapatkan pengalaman dari setiap aktivitas baru, periodisasi tersebut juga untuk memberikan jaminan bahwa seluruh usulan penyempurnaan dapat diimplementasikan dengan baik.

Pembangunan Sistem Perbendaharaan dan Anggaran Negara (SPAN) – yang akan menjadi sistem manajemen keuangan dalam pengelolaan APBN di tahun 2012 – akan membawa implikasi pada perubahan proses bisnis pengelolaan anggaran. Meski desain utama pembangunan SPAN berada pada Direktorat Jenderal Perbendaharaan (DJPBN) dan Direktorat Jenderal Anggaran (DJA), perubahan yang diusung akan berpengaruh pada proses bisnis di Direktorat Jenderal Perimbangan Keuangan (DJPK) selaku Kuasa Pengguna Anggaran Transfer ke Daerah. Hal tersebut adalah suatu yang wajar mengingat bahwa nantinya seluruh mekanisme penganggaran dan penyaluran APBN akan melalui sistem dan prosedur yang terdapat pada SPAN. Di dalam kajian ini, poin-poin penting terkait perubahan proses bisnis pengelolaan Transfer ke Daerah adalah (i) pemberian akses langsung ke dalam SPAN secara real time dan online bagi pejabat/petugas pengelola anggaran Transfer ke Daerah pada DJPK, (ii) penggunaan kode satker dengan kode lokasi provinsi/kabupaten/kota penerima dana sehingga halaman II DIPA sudah terperinci per propinsi/kabupaten/kota, (iii) kode lokasi sebagaimana disebut pada butir (ii) adalah mengacu pada kode daerah yang digunakan oleh Badan Pusat Statistik, (iv) reklasifikasi akun untuk tiap jenis anggaran Transfer ke Daerah dari satu akun menjadi beberapa akun dan (v) penyaluran dana bagi hasil didasarkan atas realisasi penerimaan. Kajian ini dibatasi pada cakupan pengelolaan transfer ke daerah yang saat ini menjadi tugas DJPK. Namun demikian, sebagai bagian dari Bagian Anggaran 999, anggaran Transfer ke Daerah mengambil porsi yang signifikan terhadap anggaran belanja negara. Dengan demikian, integrasi proses bisnis dan informasi pengelolaan Anggaran Transfer ke Daerah ke dalam SPAN diharapkan dapat meningkatkan kualitas pengelolaan keuangan negara dan pelayanan kepada seluruh pemangku kepentingan yang terkait. Keberhasilan pembangunan interkoneksi proses bisnis antara DJPK selaku satker dan SPAN, ke depannya, akan menjadi cikal bakal integrasi pengelolaan keuangan negara secara nasional.
