This collection of the Anti-Donatist Writings of Saint Augustine has all of the following works: On Baptism Answer to Letters of Petilian, Bishop of Cirta On the Correction of the Donatists Augustine, the man with upturned eye, with pen in the left hand, and a burning heart in the right (as he is usually represented), is a philosophical and theological genius of the first order, towering like a pyramid above his age, and looking down commandingly upon succeeding centuries. He had a mind uncommonly fertile and deep, bold and soaring; and with it, what is better, a heart full of Christian love and humility. He stands of right by the side of the greatest philosophers of antiquity and of modern times. We meet him alike on the broad highways and the narrow footpaths, on the giddy Alpine heights and in the awful depths of speculation, wherever philosophical thinkers before him or after him have trod. As a theologian he is facile princeps, at least surpassed by no church father, schoolman, or reformer. With royal munificence he scattered ideas in passing, which have set in mighty motion other lands and later times. He combined the creative power of Tertullian with the churchly spirit of Cyprian, the speculative intellect of the Greek church with the practical tact of the Latin. He was a Christian philosopher and a philosophical theologian to the full.

I truly believe someone can improve his/her own life by improving his/her knowledge. Since i was in medical school and later on continued my training that led me to become a transplant specialist, I found one recurrent problem that impacted medical results : Patient Education. I found over and over patients run into serious medical problems because they did not know enough about their illness. In the transplant field this lack of education can even be life threatening. This is why I wrote this book. This book's aim is to provide you with education and knowledge on the common events, complications, precautions,etc after a kidney transplant. The ultimate goal is to help you succeed after a kidney transplant.This educational material includes five main sections and there is no set order in which you can start.SECTION I: THE BASICS BEFORE KIDNEY TRANSPLANT: Introduction about how the kidneys works and what their main functions are, the usual labs that doctors use to evaluate kidney problems.SECTION II: FIRST 100 DAYS AFTER KIDNEY TRANSPLANT: Day by day explanation following transplant. We concentrate on important events that impact patient and graft's survival. We provide helpful insights on important topics daily; most often in chronological occurrence.SECTION III: HOT TOPICS IN KIDNEY TRANSPLANTATION: A list of more than 100 topics is explained putting emphasis on prevention.SECTION IV: GERIATRIC ISSUES AND THE ROLE OF PALLIATIVE AND HOSPICE CARE: Here we discuss, important considerations for older adults with kidney disease, what happens when a transplant fails and the role of palliative / hospice care.SECTION V: FREQUENTLY ASKED QUESTIONS AND ANSWERS AFTER KIDNEY TRANSPLANTATION: A list of Q & A that have been carefully selected from staff with several years of experience in the transplant field.SECTION VI: WHAT LIVING KIDNEY DONORS NEED TO KNOW: We discuss important current aspects of kidney living donation and provide important tips to living donors.I hope

you enjoy reading this book and that it helps you understand more about how a kidney transplant impacts recipient's life. My wish is that this book will help you gain the most of this precious gift (transplant).Fidel Barrantes, M.D.

Propelled by standards-based technologies like XML, Web Services, and SOAP, SOA is quickly moving from pilot projects to mainstream applications critical to business operations. One of the key standards accelerating the adoption of SOA is Business Process Execution Language for Web Services (BPEL). BPEL was created to enable effective composition of web services in a service-oriented environment. In the past two years, BPEL has become the most significant standard to elevate the visibility of SOA from IT to business level. BPEL is not only commoditizing the integration market, but it is also offering organizations a whole new level of agility â€" ability to rapidly change applications in response to the changing business landscape. BPEL enables organizations to automate their business processes by orchestrating services within and across the firewall. It forces organizations to think in terms of services.
