From supernovae and gamma-ray bursts to the accelerating Universe, this is an exploration of the intellectual threads that lead to some of the most exciting ideas in modern astrophysics and cosmology. This fully updated second edition incorporates new material on binary stars, black holes, gamma-ray bursts, worm-holes, quantum gravity and string theory. It covers the origins of stars and their evolution, the mechanisms responsible for supernovae, and their progeny, neutron stars and black holes. It examines the theoretical ideas behind black holes and their manifestation in observational astronomy and presents neutron stars in all their variety known today. This book also covers the physics of the

twentieth century, discussing quantum theory and Einstein's gravity, how these two theories collide, and the prospects for their reconciliation in the twenty-first century. This will be essential reading for undergraduate students in astronomy and astrophysics, and an excellent, accessible introduction for a wider audience. Praise for Ben Pastor's *Lumen*: "Pastor's plot is well crafted, her prose sharp. . . . A disturbing mix of detection and reflection."—Publishers Weekly "Rivets the reader with its twist of historical realities. A historical piece, it faithfully reproduces the grim canvas of war. A character study, it captures the thoughts and actions of real people, not stereotypes."—The Free Lance-Star "And don't miss *Lumen* by Ben Pastor. . . . An interesting, original, and melancholy tale."—Literary Review Italy, September 1943. The Italian government switches sides and declares war on Germany. The north of Italy is controlled by the fascist puppets of Germany; the south liberated by Allied forces fighting their way up the peninsula. Having survived hell on the Russian front, Wehrmacht major and aristocrat Baron Martin von Bora is sent to Verona. He is ordered to investigate the murder of a prominent local fascist: a bizarre death threatening to discredit the regime's public image. The prime suspect is the victim's twenty-eight-year-old widow Clara. Haunted by his record of opposition to SS policies in Russia, Bora must watch his step. Against the backdrop of relentless anti-partisan warfare and the

tragedy of the Holocaust, a breathless chase begins. Ben Pastor, born and now back in Italy, lived for thirty years in the United States, working as a university professor in Vermont. The first in the Martin Bora series, Lumen, was published by Bitter Lemon Press in May 2011.

A duck and an owl contemplate starting a friendship, despite their differences in appearance and behavior.

Galileo's Dialogue Concerning the Two Chief World Systems, published in Florence in 1632, was the most proximate cause of his being brought to trial before the Inquisition. Using the dialogue form, a genre common in classical philosophical works, Galileo masterfully demonstrates the truth of the Copernican system over the Ptolemaic one, proving, for the first time, that the earth revolves around the sun. Its influence is incalculable. The Dialogue is not only one of the most important scientific treatises ever written, but a work of supreme clarity and accessibility, remaining as readable now as when it was first published. This edition uses the definitive text established by the University of California Press, in Stillman Drake's translation, and includes a Foreword by Albert Einstein and a new Introduction by J. L. Heilbron.
