For the sensible Bailee, however, marrying Carter McKoy is like exchanging one life sentence for another—especially since her new husband hasn't even seen fit to utter a single word in her presence. But still, she can't help thinking that something about this strong, silent farmer could be the key to leaving her troubled past behind...and making a worthy wager with her heart.

God delivered Israel from Egyptian bondage to captivate them for Himself. In the arid wilderness He planned to reveal His nature and ways to them, but they drew back. How different are we today? Many confess the Lordship of Jesus and acknowledge His saving power, yet like Israel, they've drawn back. Rather than pursuing His heart they have cleaved to this world's form of worship--the worship of self. As a result we have changed the image of Jesus to be like us. Fire can alter these images. The fire we need is found in the Holiness of God. God is calling us to draw nearer still...to tremble on Mt. Zion...transformed to touch others.

"This book analyses and compares the origins, evolutionary patterns and consequences of different science and technology controversies in China, including hydropower resistance, disputes surrounding genetically modified organisms, and the nuclear power debate. The examination combines social movement theories, communication studies and science and technology studies. Taking a multidisciplinary approach, the book provides an insight into the interwoven relationship between social and political controls and knowledge monopoly and looks into a central issue neglected by previous science communication studies: why have different controversies shown divergent patterns despite similar social and political contexts? It is revealed that the media environment, political opportunity structures, knowledge-control regimes, and activists' strategies have jointly triggered, nurtured, and sustained these controversies and led to the development of different patterns. Based on these observations, the author also discusses the significance of science communication studies in promoting China's social transformation and further explores the feasible approach to a more generic framework to understand science controversies across the world. The book will be of value to the academics of science communication, science and technology studies, political science studies and sociology, as well as general readers interested in China's science controversies and social movements"--

When Elsa's father is killed in a tornado, all she wants is to escape—from New York, her job, her boyfriend—to somewhere new, anonymous, set apart. For some years she has been haunted by a sight once seen from an airplane: a tiny, isolated settlement called Thunderstown. Thunderstown has received many a pilgrim, and young Elsa becomes its latest, drawn to this weather-ravaged backwater, this place rendered otherworldly by the superstitions of its denizens. In Thunderstown, they say, the weather can come to life, and when Elsa meets Finn Munro, an outcast living in the mountains above the town, she wonders whether she has witnessed just that. For Finn has an incredible secret: he has a thunderstorm inside of him. Not everyone in town wants happiness for Elsa and Finn. As events turn against them, can they weather the tempest—can they survive at all? This work of lyrical, mercurial magic and imagination is a modern-day fable about the elements of love.
