This is one of six volumes that present the results of the PISA 2018 survey, the seventh round of the triennial assessment. Volume I, What Students Know and Can Do, provides a detailed examination of student performance in reading, mathematics and science, and describes how performance has changed since previous PISA assessments.

The Operations Test Battery (OTB) Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to; mechanical aptitude; arithmetical reasoning related to trades and maintenance; reading comprehension; and more.

While economists continue to debate whether particular economic policies, such as those referred to in Williamson's (1993) "Washington Consensus," can spur growth in developing countries, this paper demonstrates that it is combinations of policies that are more critical for growth. Policy complementarity refers to the mutually reinforcing benefits of policies that create an environment that is conducive to investment and growth. Quantitative measures of policy complementarity are developed, and the study shows empirically, through both an outcomes-based probability framework and a standard regression analysis, that these complementarities are significant and robust in explaining growth outcomes over the period 1985–95.

This report presents the conceptual foundations of the OECD Programme for International Student Assessment (PISA), now in its seventh cycle of comprehensive and rigorous international surveys of student knowledge, skills and well-being. Like previous cycles, the 2018 assessment covered reading, mathematics and science, with the major focus this cycle on reading literacy, plus an evaluation of students' global competence – their ability to understand and appreciate the perspectives and world views of others. Financial literacy was also offered as an optional assessment.
