General George Crook planned and organized the principal Apache campaign in Arizona, and General Nelson Miles took credit for its successful conclusion on the 1800s, but the men who really won it were rugged frontiersmen such as Al Sieber, the renowned Chief of Scouts. Crook relied on Sieber to lead Apache scouts against renegade Apaches, who were adept at hiding and raiding from within their native terrain. In this carefully researched biography, Dan L. Thrapp gives extensive evidence for Sieber's expertise, noting that the expeditions he accompanied were highly successful whereas those from which he was absent met with few triumphs. Perhaps the greatest tribute to his abilities was paid by a San Carlos Apache who, no matter how miserable life might become, because, he said, Sieber would find him even if he left no tracks.

This fascinating study examines how Victorian fixation on disastrous Northwest Passage expeditions has conditioned our understanding of the Arctic and Polar exploration.

The 2014 discovery of HMS *Erebus* - a ship lost during Sir John Franklin's 1845 expedition to find the Northwest Passage - reignited popular, economic, and political interest in the Arctic's exploration, history, anthropology, and historical geography. *Lines in the Ice* investigates the allure of the North through topographical views, maps, explorers' diaries, and historic photographs. Following the course of major journeys to the Arctic, including those of Martin Frobisher, Henry Hudson, and John Franklin, Philip Hatfield assesses the impact of these incursions on the North's numerous indigenous communities and reveals the role of exploration in making the modern world. Besides detailing the area's vivid history, *Lines in the Ice* also focuses on beautiful works created over the last 500 years by people who live and travel in the Arctic. Lavishly illustrated with reproductions of items rarely seen outside of the British Library, this volume meditates on humans' relationships with the Arctic at a time when climate change poses a catastrophic threat to the peoples and ecosystems of this enigmatic region. A timely work that traces the past's influence on the present day, *Lines in the Ice* showcases the rich visual history of Arctic exploration, indigenous cultural works, and the longstanding ways in which the North has captivated the public.

This book examines the little studied story of Bellinghausen, and includes the fullest biography of the celebrated Russian explorer ever published, and with thoughtful discussion of the achievements and limitations of the expedition and suggestions for further research.

In 1985 T. Lindsay Baker edited the diary and the manuscript of the official report from the National Archives and published them for a limited readership as a special issue of the *Panhandle-Plains Historical Review*. Not included in the 1985 publication was the survey party's ornithological report, written by Charles A. H. McCauley, which Baker subsequently found and published in 1988 as an article in the *Panhandle-Plains Historical Review*, including ornithological annotation by Kenneth D.

A collection of novelist's non-fiction writings spanning more than thirty years addresses topics including the arts, science, literature, popular culture, and his own life

In November 1528, almost a century before the Pilgrims landed at Plymouth Rock, the remnants of a Spanish expedition reached the Gulf Coast of Texas. By July 1536, eight years later, Álvar Núñez Cabeza de Vaca (c. 1490–1559) and three other survivors had walked 2,500 miles from Texas, across northern Mexico, to Sonora and ultimately to Mexico City. Cabeza de Vaca's account of this astonishing journey is now recognized as one of the great travel stories of all time and a touchstone of New World literature. But his career did not begin and end with his North American ordeal. Robin Varnum's biography, the first single-volume cradle-to-grave account of the explorer's life in eighty years, tells the rest of the story. During Cabeza de Vaca's peregrinations through the American Southwest, he lived among and interacted with various Indian groups. When he and his non-Indian companions finally reconnected with Spaniards in northern Mexico, he was horrified to learn that his compatriots were enslaving Indians there. His *Relación* (1542) advocated using kindness and fairness rather than force in dealing with the native people of the New World. Cabeza de Vaca went on to serve as governor of Spain's province of Río de La Plata in South America (roughly modern Paraguay). As a loyal subject of the king of Spain, he supported the colonialist enterprise and believed in Christianizing the Indians, but he always championed the rights of native peoples. In Río de La Plata he tried to keep his men from robbing the Indians, enslaving them, or exploiting them sexually—policies that caused grumbling among the troops. When Cabeza de Vaca's men

mutinied, he was sent back to Spain in chains to stand trial before the Royal Council of the Indies. Drawing on the conquistador's own reports and on other sixteenth-century documents, both in English translation and the original Spanish, Varnum's lively narrative braids eyewitness testimony of events with historical interpretation benefiting from recent scholarship and archaeological investigation. As one of the few Spaniards of his era to explore the coasts and interiors of two continents, Cabeza de Vaca is recognized today above all for his more humane attitude toward and interactions with the Indian peoples of North America, Mexico, and South America.

Shine a light into the unknown There are still dark corners of our planet that are yet to be explored. In this remarkable book, Steve Backshall offers an unflinching account of his adventures into these uncharted territories around the globe, in search of world firsts. Each location brings its own epic challenges - whether it's the first climb of an arctic ice fall in Greenland, the first recorded navigation of a South American river, or the first exploration of the world's longest cave system in Mexico. But all of them represent new tests of the limits of human endeavour. Accompanying a major 10-part series on BBC and Dave, Expedition is a breathtaking journey into the unknown, and a brilliantly written celebration of the pleasures of genuine discovery.

When Robert O'Hara Burke and William John Wills set out on their fateful journey with the Victorian Exploring Expedition, Wills brought with him a diary in which to record his experiences. His entries would go on to help historians understand the circumstances that led to the tragic end of the expedition. Today, the diary is held by the National Library of Australia and forms the foundation of Starvation in a Land of Plenty. Between 23 April and 28 June 1861, Wills documented the torments and disappointments that led to his and Burke's destruction. Surprising to many, though, Wills was not the second-in-command but, rather, the party's 'surveyor, astronomical and meteorological observer'. His resulting misfortune and the words he left behind have transformed the young English surveyor into both an Australian martyr and hero. Combined with images from the Library's collection, this poignant and telling publication draws on Wills' at times matter-of-fact account of his fatal weeks, revealing him to have been a man of great dignity and bravery.

In 1999, Conrad Anker found the body of George Mallory on Mount Everest, casting an entirely new light on the mystery of the lost explorer. On 8 June 1924, George Leigh Mallory and Andrew 'Sandy' Irvine were last seen climbing towards the summit of Everest. The clouds closed around them and they were lost to history, leaving the world to wonder whether or not they actually reached the summit - some 29 years before Edmund Hillary and Tensing Norgay. On 1 May 1999, Conrad Anker, one of the world's foremost mountaineers, made the momentous discovery - Mallory's body, lying frozen into the scree at 27,000 feet on Everest's north face. Recounting this day, the authors go on to assess the clues provided by the body, its position, and the possibility that Mallory had successfully climbed the Second Step, a 90-foot sheer cliff that is the single hardest obstacle on the north face. A remarkable story of a charming and immensely able man, told by an equally talented modern climber.

This is the first-time flexi-cover edition of this classic field guide, which is the definitive volume on the region's birdlife. This award-winning book, which was first published in 2000, was fully updated in 2009 to include 76 new species for the region that were recent new discoveries for science, taxonomic 'splits' or had been recorded there for the first time. This comprehensive field guide to the birds of South-East Asia covers all of the 1,327 species recorded in the region and each has been fully illustrated. This edition has many new artworks and 16 more colour plates than the original guide, and the text has been meticulously updated to take in all the most recent information. The vast diversity of South-East Asian birdlife attracts increasing numbers of birdwatchers each year. Covering Thailand, Vietnam, Singapore, Peninsular Malaysia, Myanmar, Laos and Cambodia, this unique and indispensable guide covers in detail the identification, voice, breeding, status, habitat and distribution of all the species and distinctive subspecies of the region.

Traces the life of the Shoshoni Indian girl who was stolen from her tribe at the age of twelve, sold to a French trapper, and served as a guide in the Lewis and Clark expedition.

The first biography to appear in English of the Augustinian friar who discovered the true return route across the Pacific from west to east.

This magisterial volume unveils Richard and Shirley Flint's deep research into the Latin American and Spanish archives in an effort to track down the history of the participants who came north with the Coronado expedition in 1540. Through their investigation into thousands of legal cases, financial records, proofs of service, letters, journals, and other primary materials, they provide social and cultural documentation on the backgrounds of hundreds of individuals who made up the Coronado expedition and show that the expedition was the first phase of a three-phase effort to complete the Columbian project: to delineate a westward route to Asia from Spain.

Written in the second century AD by a Greek traveller for a predominantly Roman audience, Pausanias' Guide to Greece is an extraordinarily literate and well-informed guidebook. A study of buildings, traditions and myth, it describes with precision and eloquence the glory of classical Greece shortly before its ultimate decline in the third century. This volume, the first of two, concerns the five provinces of central Greece, with an account of cities including Athens, Corinth and Thebes and a compelling depiction of the Oracle at Delphi. Along the way, Pausanias recounts Greek legends that are unknown from any other source and quotes a wealth of classical literature and poetry that would otherwise have been lost. An inspiration to Byron and Shelley, the Guide to Greece remains one of the most influential travel books ever written.
