Why has the durable paper shopping bag been largely replaced by its flimsy plastic counterpart? What circuitous chain of improvements led to such innovations as the automobile cup holder and the swiveling vegetable peeler? With the same relentless curiosity and lucid, witty prose he brought to his earlier books, Henry Petroski looks at some of our most familiar objects and reveals that they are, in fact, works in progress. For there can never be an end to the quest for the perfect design. To illustrate his thesis, Petroski tells the story of the paper drinking cup, which owes its popularity to the discovery that water glasses could carry germs. He pays tribute to the little plastic tripod that keeps pizza from sticking to the box and analyzes the numerical layouts of telephones and handheld calculators. *Small Things Considered* is Petroski at his most trenchant and provocative, casting his eye not only on everyday artifacts but on their users as well.

Linda C. Wing and Bernard R. Gifford How should a society committed to the ideas of individual merit, equal opportunity, and the free marketplace allocate scarce educational and employment opportunities? How can that society draw distinctions fairly and justifiably-among people competing against each other for the same opportunity? These are among the central questions of a democracy. How a society answers them reveals a great deal about its values and its priorities, and determines a great deal about its future course. In recent decades, we have placed the standardized pencil-and-paper test at the center of these fundamental questions about the nature of opportunity allocation in American life. In more and more areas of our lives-schools, employment, the military-we rely upon the standardized test to rank or classify people, and to assure ourselves that we have done so fairly. The papers gathered here were prepared at the invitation of the National Commission on Testing and Public Policy. (The editors of this volume were involved in the commission from its inception in 1987 until shortly after the publication of its major public report in 1990-Bernard Gifford as Chair and Linda Wing as Associate Director. 1) Each chapter focuses on an aspect of employment testing-a topic that could hardly 1 POLICY ISSUES IN EMPLOYMENT TESTING 2 be more in need of calm deliberation and reasoned discussion than it is today.
