Based on ethnographic data, this book looks at the self-fashioning of various healers and promoters of well-being. It also considers how caregivers are viewed by others, and how their identities are influenced by social and cultural factors.

"History of the American society of mechanical engineers. Preliminary report of the committee on Society history," issued from time to time, beginning with v. 30, Feb. 1908.

SUMMARY The purpose of this book is to how to pursue employment when the economy is in transition. As I stated in my Preface, this book is intended as an experience from a person who has 85 jobs and counting. I don't pretend to be an expert, I am serving as a guidepost from experience. The only way to learn something is by doing; and, as far as obtaining a job, I have a wealth of knowledge. The book is intended for the unemployed as well as the employed, veterans and college students; as well as advice and a warning to employers. Finally, I point to the foreign based employers as possibly a trend which can remake the American job market. I hope these chapters can lift your spirits, and use it as a primer to staying employed.

Nineteen months before the D-Day invasion of Normandy, Allied assault forces landed in North Africa in Operation TORCH, the first major amphibious operation of the war in Europe. Under the direction of Gen. Dwight D. Eisenhower, AUS, Adm. Andrew B. Cunningham, RN, Admiral H. Kent Hewitt, USN, and others, the Allies kept pressure on the Axis by attacking what Winston Churchill dubbed "the soft underbelly of Europe." The Allies seized the island of Sicily, landed at Salerno and Anzio, and established a presence along the coast of southern France. With Utmost Spirit takes a fresh look at this crucial naval theater of the Second World War. Barbara Brooks Tomblin chronicles the US Navy's and the Royal Navy's struggles to wrest control of the Mediterranean Sea from Axis submarines and aircraft, to lift the siege of Malta, and to open a through convoy route to Suez while providing ships, carrier air support, and landing craft for five successful amphibious operations. Examining official action reports, diaries, interviews, and oral histories, Tomblin describes each of these operations in terms of ship-to-shore movements, air and naval gunfire support, logistics, countermeasure measures, antisubmarine warfare, and the establishment of ports and training bases in the Mediterranean. Firsthand accounts from the young officers and men who manned the ships provide essential details about Mediterranean operations and draw a vivid picture of the war at sea and off the beaches.

Army experience with a small mechanized stock accounting system, the NCR 500, was studied with respect to personnel and training, in order to improve implementation of newer and more complex computer-based logistics systems. Officers and enlisted personnel in various duty positions connected with NCR 500 systems in four Far Eastern commands were interviewed. Data showed there had been a continual input of underskilled personnel into nearly all of the duty positions in the mechanized stock accounting system and at its major interfaces. Interviews indicated that efficiency would have been promoted by (a) integrating NCR 500 procedures and concepts with repair parts supply procedures and concepts, (b) a total systems approach to training, (c) upgrading the storage operation as well as the supporting stock accounting system, (d) assigning more well-qualified technical supply officers, and (e) training in the NCR 500 system for more noncommissioned officers with repair parts supply experience.
