In the Johannesburg township of Soweto, a young, black gangster in South Africa, who leads a group of violent criminals, slowly discovers the meaning of compassion, dignity, and his own humanity. Reprint. A South African film, releasing February 2006 by Miramax) (General Fiction)

Social science researchers have become increasingly attentive to the role of numbers in contemporary life. Issues around big data, national test results, and output and performance statistics are now routinely reported and debated in the media. Numbers are a powerful resource for governments as a means to manage and 'improve' their populations, and we are increasingly represented, organized and driven by an economy of numbers, which inserts itself into more and more aspects of our lives. This book critically addresses some of the ways in which numbers are deployed in educational governance and practice, and some of the consequences of this deployment for what it means to be educated, to teach, and to learn. Recognising that numbers do not simply represent, but that they change things and have real effects, allows us to move beyond a system where difficult and important issues about what we want from education and from teachers are side-stepped in the push to 'improve our numbers'. This collection offers a set of starting points from which we might speak back to numbers, drawing on research to explore how numbers change the way we think about ourselves and what we do. This book was originally published as a special issue

of the Journal of Education Policy.

• Latest Solved Paper-KVS (Kendriya Vidyalaya Sangathan) • NCERT Textbook Questions-Fully solved • Questions based on latest typologies introduced by the board-Objective types, VSA, SA, LA & Visual Case-based Questions • Commonly Made Errors & Answering Tips for concepts clarity • 'AI' for academically important questions • Concept videos for hybrid learning Questions from Business Studies past exam papers 2011-2016, with detailed answers and explanations, and revision notes for each Grade 11 & 12 Syllabus Unit.

This book provides readers with an overview of recent international research and developments in the teaching and learning of modelling and applications from a variety of theoretical and practical perspectives. There is a strong focus on pedagogical issues for teaching and learning of modelling as well as research into teaching and practice. The teaching of applications of mathematics and mathematical modelling from the early years through primary and secondary school and at tertiary level is rising in prominence in many parts of the world commensurate with an ever-increasing usage of mathematics in business, the environment, industry and everyday life. The authors are all members of the International Community of Teachers of Mathematical Modelling and Applications and important researchers in mathematics education and mathematics. The book will be of interest to teachers, practitioners and researchers in universities, polytechnics, teacher education, curriculum and policy.?

Questions from Chemistry past exam papers 2011-2016, with detailed answers and explanations, and revision notes for each Grade 11 & 12 Syllabus Unit.
