Cancer remains one of the most challenging issues in modern medicine, being responsible for a high number of deaths every year. Recent important developments in cancer diagnosis and therapy based on the versatility of nanosystems have made it possible to incorporate multifunctional synergistic actions into a single delivery system. This book compiles the research on the use of functional lipid nanosystems that combine different strategies in one single nanosystem to enhance overall cancer treatment. Besides providing an overview of the current functional nanosystem strategies, it also offers researchers essential theoretical background on cancer, the physiological barriers to its treatment, aspects related to the design and optimization of nanocarriers for cancer treatment, and clinical developments, including promises, safety issues, and the expected future. The editors bring together a group of scientists from all over the world to discuss the most relevant issues and to provide updates on functional lipid nanosystems and

A proven program for enhancing students' thinking and comprehension abilities Visible Thinking is a research-based approach to teaching thinking, begun at Harvard's Project Zero, that develops students' thinking dispositions, while at the same time deepening their understanding of the topics they study. Rather than a set of fixed lessons, Visible Thinking is a varied collection of practices, including thinking routines?small sets of questions or a short sequence of steps?as well as the documentation of student thinking. Using this process thinking becomes visible as the students' different viewpoints are expressed, documented, discussed and reflected upon. Helps direct student thinking and structure classroom discussion Can be applied with students at all grade levels and in all content areas Includes easy-to-implement classroom strategies The book also comes with a DVD of video clips featuring Visible Thinking in practice in different classrooms. Teachers make a difference. The success of any plan for improving educational outcomes depends on the teachers who carry it out and thus on the abilities of those attracted to the field and their preparation. Yet there are many questions about how teachers are being prepared and how they ought to be prepared. Yet, teacher preparation is often treated as an afterthought in discussions of improving the public education system. Preparing Teachers addresses the issue of teacher preparation with specific attention to reading, mathematics, and science. The book evaluates the characteristics of the candidates who enter teacher

preparation programs, the sorts of instruction and experiences teacher candidates receive in preparation programs, and the extent that the required instruction and experiences are consistent with converging scientific evidence. *Preparing Teachers* also identifies a need for a data collection model to provide valid and reliable information about the content knowledge, pedagogical competence, and effectiveness of graduates from the various kinds of teacher preparation programs. Federal and state policy makers need reliable, outcomes-based information to make sound decisions, and teacher educators need to know how best to contribute to the development of effective teachers. Clearer understanding of the content and character of effective teacher preparation is critical to improving it and to ensuring that the same critiques and questions are not being repeated 10 years from now.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website. Designed for teachers, school leaders, and professional learning communities looking to navigate the gap between their current literacy practices and the ideals of the Common Core, Pathways to the Common Core will help you: understand what the standards say, suggest, and what they don't say; recognize the guiding principles that underpin the reading and writing standards; identify how the Common Core's infrastructure supports a spiraling K-12 literacy curriculum; and scrutinize the context in which the CCSS were written and are being unrolled. In addition to offering an analytical study of the standards, this guide will also help you and your colleagues implement the standards in ways that lift the level of teaching and learning throughout your school.

Now in its fifth edition, Reading Pathways (with help from Dewey the Bookworm) offers an easy-to-use, highly effective approach to teaching reading accuracy and fluency to students of all ages, using a unique pyramid format. Reading pyramids begins with one word, and slowly build into phrases and sentences of gradually increasing complexity. As the student moves from the pinnacle to the base of each pyramid, the phrase or sentence becomes a more interesting and expansive, and the student's confidence grows with each line completed. Progressively building up the amount of text per line increases eyespan, strengthens eye tracking, and develops reading fluency. The book also features more challenging multi-syllable word pyramid exercises and games to further develop fluency and vocabulary. Learning to read long words by syllables removes the fear and mystique of multi-syllable words and helps students build the strong vocabulary so critical for success in reading and writing. Pathways is a dual skills course that can be taught in parallel or as individual strands - Reading and Writing, and Listening and Speaking - and topics and language complement and mirror each other. Students benefit from a targeted skills syllabus where they can really develop, not just practice, the skills they will need for effective use of language. Pathways particularly lends itself to academic learners of English, with the topics and language input texts taken from a more academic context. In addition, the strong critical thinking element present in both strands encourages and stimulates the 'higher order' thinking skills and the students' ability to evaluate, analyse, and synthesise information from a wide range of sources. Meaningful and authentic content from National Geographic stimulates creates the perfect environment for this and stimulates learners' curiosity and participation. students develop essential skills, locate and train college- and career-ready advisors, establish business partnerships, build college readiness, leverage technology, build interest in science, technology, engineering and math (STEM) careers, and understand how to pay for college. Based on research and drawing on best practice and poignant stories, Dalton shares examples of success and challenges from interviews conducted with over 200 individuals who have participated in programs across the country. By helping rural youth learn about the opportunities available and by providing them with the support they need to succeed, this book serves as an actionable guide to helping students in rural schools attain postsecondary school success.

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine).

Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to

reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

`A comprehensive, well-written and beautifully organized book on publishing articles in the humanities and social sciences that will help its readers write forward with a first-rate guide as good company.' - Joan Bolker, author of *Writing Your Dissertation in Fifteen Minutes a Day* `Humorous, direct, authentic ... a seamless weave of experience, anecdote, and research.' - Kathleen McHugh, professor and director of the UCLA Center for the Study of Women Wendy Laura Belcher's *Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success* is a revolutionary approach to enabling academic authors to overcome their anxieties and produce the publications that are essential to succeeding in their fields. Each week, readers learn a particular feature of strong articles and work on revising theirs accordingly. At the end of twelve weeks, they send their article to a journal. This invaluable resource is the only guide that

“Make sure your students follow your instructions.”

That sounds like a straightforward instruction, but in fact, it’s fairly abstract. What does a teacher actually have to do to make sure students are following?

Even the leader delivering this direction may not know, and the first-year teacher almost certainly doesn’t. The vast majority of teachers are only observed one or two times per year on average—and even among those who are observed, scarcely any are given feedback as to how they could improve.

The bottom line is clear: teachers do not need to be evaluated so much as they need to be developed and coached. In *Get Better Faster: A 90-Day Plan for Coaching New Teachers*, Paul Bambrick-Santoyo shares instructive tools of how school leaders can effectively guide new teachers to success. Over the course of the book, we break down the most critical actions leaders and teachers must enact to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. It’s the book’s focus on the actionable—the practice-able—that drives effective coaching. By practicing the concrete actions and micro-skills listed here, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success.

Though focused heavily on the first 90 days of teacher development, it's possible to implement this work at any time. New and old teachers alike can benefit from the guidance of *Get Better Faster* and close their existing instructional gaps. Packed with practical training tools, including agendas, presentation slides, a coach's guide, handouts, planning templates, and 35 video clips of real teachers at work, *Get Better Faster* will teach you:

- The core principles of coaching: Go Granular, Make Feedback More Frequent, Top action steps to launch a teacher's development in an easy-to-read scope and sequence guide
- The four phases of skill building:
 - Phase 1 (Pre-Teaching): Dress Rehearsal
 - Phase 2: Instant Immersion
 - Phase 3: Getting into Gear
 - Phase 4: The Power of Discourse

A bold, brain-based teaching approach to culturally responsive instruction To close the achievement gap, diverse classrooms need a proven framework for optimizing student engagement. Culturally responsive instruction has shown promise, but many teachers have struggled with its implementation—until now. In this book, Zaretta Hammond draws on cutting-edge neuroscience research to offer an innovative approach for designing and implementing brain-compatible culturally responsive instruction. The book includes:

- Information on how one's culture programs the brain to process data and affects learning relationships
- Ten "key moves" to build
