From the incomparable New York Times and New Yorker illustrator Tamara Shopsin, a debut novel about a NYC printer repair technician who comes of age alongside the Apple computer—featuring original artistic designs by the author. NAMED A MOST ANTICIPATED BOOK OF 2021 BY LIT HUB. *LaserWriter II* is a coming-of-age tale set in the legendary 90s indie NYC Mac repair shop TekServe—a voyage back in time to when the internet was new, when New York City was gritty, and when Apple made off-beat computers for weirdos. Our guide is Claire, a 19-year-old who barely speaks to her bohemian co-workers, but knows when it's time to snap on an antistatic bracelet. Tamara Shopsin brings us a classically New York novel that couldn't feel more timely. Interweaving the history of digital technology with a tale both touchingly human and delightfully technical, Shopsin brings an idiosyncratic cast of characters to life with a light touch, a sharp eye, and an unmistakable voice. Filled with pixelated philosophy and lots of printers, *LaserWriter II* is, at its heart, a parable about an apple.

Over the past 10 years I've constantly seen and met many IT professionals who have all the paper work to be qualified and even years of experience in the field (some even more than me) that simply don't understand how to fix a computer. They simply don't understand how a computer works. IT managers, technicians, students and even worst of all teachers, the same teachers who could be teaching your kids IT, are completely clueless on getting a computer to work as it should. The sad reality is those teachers or managers are the ones the students or interns learn from or look up to and it results in the new generation not being able to accomplish the task they were required to accomplish at their job. It's a process which repeats itself while I write this book and one day I hope this book can help chance that, one day I hope this book can help change the world. My name is Brandon Rago, and I have been an IT professional for ten years ongoing. I have both the paper work and years experience in the work environment to qualify as a professional, join me while I guide you through the process of repairing any computer within 24 hours.
