State Assessment Policy and Practice for English Language Learners presents three significant studies, each examining a different aspect of states' strategies for including English language learners in state assessments. *an Analysis of State Assessment Policies Regarding Accommodations for English Language Learners; *a Survey and Description of Test Translation Practices; and *an Examination of State Practices for Reporting Participation and Performance of English Language Learners in State Assessments. With the rise in population of English language learners and the subsequent stepped-up legislative focus on this student population over the past decade, states have been challenged to include English language learners in state assessment programs. Until now, the little data available on states' policies and practices for meeting this challenge has been embedded in various reports and professional journals and scattered across the Internet. This volume offers, for the first time, a focused examination of states' assessment policies and practices regarding English language learners. The three studies were supported by OELA, the U.S. Department of Education's Office of English Language Acquisition, Language Enhancement, and Academic Achievement for Limited English Proficient Students. State Assessment Policy and Practice for English Language Learners is of interest to researchers and professionals involved with the assessment of English language learners; state- and district-level policy makers; and academics, teacher educators, and graduate students in a number of fields, including educational and psychological assessment, testing and measurement, bilingual education, English as a

second language, and second language acquisition.

For many researchers, Python is a first-class tool mainly because of its libraries for storing, manipulating, and gaining insight from data. Several resources exist for individual pieces of this data science stack, but only with the Python Data Science Handbook do you get them all—IPython, NumPy, Pandas, Matplotlib, Scikit-Learn, and other related tools. Working scientists and data crunchers familiar with reading and writing Python code will find this comprehensive desk reference ideal for tackling day-to-day issues: manipulating, transforming, and cleaning data; visualizing different types of data; and using data to build statistical or machine learning models. Quite simply, this is the must-have reference for scientific computing in Python. With this handbook, you'll learn how to use: IPython and Jupyter: provide computational environments for data scientists using Python NumPy: includes the ndarray for efficient storage and manipulation of dense data arrays in Python Pandas: features the DataFrame for efficient storage and manipulation of labeled/columnar data in Python Matplotlib: includes capabilities for a flexible range of data visualizations in Python Scikit-Learn: for efficient and clean Python implementations of the most important and established machine learning algorithms

[The book] is intended to meet the need for a text to accompany the Advanced Placement Spanish Lanugae course. The overall goal ... is to prepare students to perform at a high level of proficiency in the four basic language skills: listening, speaking, reading and writing. Upon completing the course, students are expected to be able to comprehend formal and informal Spanish, and also speak, read and write cohesively and precisely at the third-year college level. [The authors] have attempted to create a series of exercises that will both meet the general objectives of the course and help the students prepare for the Advanced Placement examination ... Although geared primarily to the AP course and examination, the book is also intended to provide an opportunity for advanced learning. The exercises are desgined not only to review and reinforce students' knowledge, but also to increase their vocabulary and sharpen their grammatical skills. [The book] can be used as a complementary text in any advanced course in Spanish.-Intro.
