No topic is more polarizing than guns and gun control. From a gun culture that took root early in American history to the mass shootings that repeatedly bring the public discussion of gun control to a fever pitch, the topic has preoccupied citizens, public officials, and special interest groups for decades. *The Gun Debate: What Everyone Needs to Know®* delves into the issues that Americans debate when they talk about guns. With a balanced and broad-ranging approach, noted economist Philip J. Cook and political scientist Kristin A. Goss thoroughly cover the latest research, data, and developments on gun ownership, gun violence, the firearms industry, and the regulation of firearms. The authors also tackle sensitive issues such as the effectiveness of gun control, the connection between mental illness and violent crime, the question of whether more guns make us safer, and ways that video games and the media might contribute to gun violence. No discussion of guns in the U.S. would be complete without consideration of the history, culture, and politics

that drive the passion behind the debate. Cook and Goss deftly explore the origins of the American gun culture and the makeup of both the gun rights and gun control movements. Written in question-and-answer format, the book will help readers make sense of the ideologically driven statistics and slogans that characterize our national conversation on firearms. This book is a must-read for anyone interested in getting a clear view of the issues surrounding guns and gun policy in America. Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to

questions of the social place of science? Communicating Science describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.

“Over half a century has passed since I cut my teeth on an old .36 Navy Colt. For 40 years I have almost never been out of easy reach of a good sixgun. Thirty years I spent in the saddle, packing, punching cows and breaking saddle brones. The sixgun was worn just as regularly as my pants and many times was much more important to my existence. It pulled me out of several tight scrapes with wild horses, wilder cattle and some big game. Though I have witnessed several gun fights, have had guns pulled on me and have been shot at several times, I have never had to use my gun on a man. Several times it was touch-and-go and perhaps only the current knowledge that I was both fast and accurate with a sixgun saved me from being embroiled. Though I do not recommend a sixgun for big game, thirty head of big game have fallen to mine, including elk, bear, deer, cougar, mountain goat and javelina. I have also trailed up a great many big game animals of various species that were wounded by sportsmen and then I finished them off. No record was kept of these or the many coyotes, bobcats and lesser game, or the livestock I have had to kill.” This classic includes the following chapters: Introduction I. History of the Sixgun II. Selecting the Handgun III. Learning To Shoot IV. Sixgun Sights V. Long Range Shooting VI. Game Shooting VII. Double Action Shooting VIII. Gun Rigs and Holsters IX. Quick Draw and Hip Shooting X. Gun Fighting XI. Revolver Versus Auto Pistol XII. Aerial and Trick Shooting XIII. Slip Shooting, Fanning, Cavalry Guns XIV. Loading and Management of Cap and Ball Sixguns XV. Repairs, Remodeling, Resighting XVI. A Bullet Chapter XVII. Cartridge Reloading XVIII. Selection of Cartridges XIX. Ornamentation, Barrel Lengths, Balance, Velocities XX. Care and Cleaning Supplement

This handbook is a 'primer' for the new target shooter: introducing the firearms, shooting disciplines and firearm technology, and drawing on the expertise of Bisley, the home of British and Commonwealth target shooting. The book is organized into nine sections and over 60 deliberately short chapters. First the basics: Part A - Target Shooting Basics – introduces the different shooting disciplines available. Part B - Firearms and Shooting Equipment – covers the different rifles, handguns, shotguns, black powder and airguns used by target shooters. Then we look at the major shooting disciplines which I have grouped into: Part C - Target Rifle Disciplines – provides a short overview of each of the main target rifle disciplines, such as Fullbore, Smallbore, High Power, Benchrest and Air Rifle. Part D - Target Pistol and Gallery Disciplines – covers target pistol shooting on so-called Gallery ranges. Part E - Historic Arms Disciplines –

introduces shooting with black powder and muzzleloader firearms. Part F - Military and Practical Disciplines – provides an introduction to disciplines involving service weapons and military-style competitions. Part G - Field Sports Disciplines – as the name suggests, target disciplines based around field sports, such as Clay Pigeon and Field Target (Air Rifle). And finally we cover: Part H - Shooting Techniques – introduces marksmanship with rifles, handguns, shotguns and airguns. Part I - Specialist Skills – a group of chapters introducing skills and knowledge, such as the correct cleaning of firearms, hand loading ammunition, and the selection and fitting of sights. We have tried to keep each 'chapter' as short as possible, and provide references to further information (especially on the Web). More importantly we provide contact details for each of the target shooting disciplines. We hope you enjoy this handbook and it helps you get the most from target shooting.
