(long-term cash flows, long-term viability) and the performance we can measure (current cash flows, customer satisfaction, etc.) are not the same. The 'balanced scorecard', which has been widely adopted by US firms, does not solve these underlying problems of performance measurement and may exacerbate them because it provides no guidance on how to combine dissimilar measures into an overall appraisal of performance. A measurement technique called activity-based profitability analysis (ABPA) is suggested as a partial solution, especially to the problem of combining dissimilar measures. ABPA estimates the revenue consequences of each activity performed for the customer, allowing firms to compare revenues with costs for these activities and hence to discriminate between activities that are ultimately profitable and those that are not.

An ambitious new work by a well-respected sociologist, *Information and Organizations* provides a bold perspective of the dynamics of organizations. Stinchcombe contends that the "information problem" and the concept of "uncertainty" provide the key to understanding how organizations function. In a delightful mix of large theoretical insights and vivid anecdotal material, Stinchcombe explores the ins and outs of organizations from both a macro and micro perspective. He reinterprets the work of the renowned scholars of business, Alfred Chandler, James March and Oliver Williamson, and looks in depth at corporations like DuPont and General Motors. Along the way, Stinchcombe explores subjects as varied as class consciousness, innovation, contracts and university administration. All of these analyses are distinguished by incisive thinking and creative new approaches to issues that have long confronted business people and those interested in organizational theory. A tour de force, *Information and Organizations* is a must-read for business people and scholars of many stripes. It promises to be a widely discussed and debated work.

The idea of the 'enterprise culture' has been much vaunted over the last few decades: the growth of self-employment and small business ownership has been an important feature of the restructuring of the British economy. Because it is a concept that is difficult to evaluate, controversial and politically sensitive, social scientists were slow to analyse it. Consequently, it

had been caricatured and many questions about its impact on society and the economy had been left unanswered. This collection, which was first published in 1991, presents a critical analysis of the various manifestations of the enterprise culture. Drawing upon a range of research, it deals with a number of related topics. The result is a powerful analysis of the material and ideological role of the petty bourgeoisie in contemporary capitalism. Its multidisciplinary approach, which contributions from leading scholars in the field, makes this book of interest to anyone wanting to make sense of the socio-economic restructuring of Britain.

In order to effectively solve business problems, managers need to understand how managerial accounting can improve decision-making. This book lays the groundwork by presenting managerial accounting in a strategic framework. Each module examines cost estimation and planning decisions in both the short- and long-term context. Budgets are then discussed as devices that connect planning and control decisions. Within each chapter, a specific decision problem is framed in a four-step manner. Throughout the pages, Chapter Connections ties the decision problems to concepts in earlier chapters. End-of-chapter material also provides a good balance of quantitative and qualitative problems. This approach enables managers to learn the linkages among seemingly unrelated decisions.

Written with the decision maker in mind, this new text from Professor Will Seal, author of the highly successful Management Accounting, takes a practical, real-world approach to the subject. The book provides concise and manageable coverage of key topics and theory, and is supported by contemporary examples from both the manufacturing and services industries, ensuring it is relevant and engaging to both today's students and tomorrow's decision makers.
