As a holistic veterinarian and scientist, Dr. Gary Richter helps dog and cat owners to navigate the thicket of treatment options and separate the fact from the fiction. He wants us to use what actually works, not just what Western science or alternative medicine say "should" work. This multifaceted approach to health is known as integrative medicine. Dr. Richter examines traditional medicine from many cultures alongside modern medical techniques, describing the best of complementary care and the best of conventional veterinary medicine. Every treatment he recommends has the backing of scientific research or years of successful outcomes in his clinical practice. After explaining the treatment, he offers specific recommendations for an integrative approach to common diseases, including allergies, skin conditions, diabetes, heart disease, and cancer. A holistic approach to health includes nutrition, as it sets up the foundation for your pet's health. Dr. Richter cuts through the hype in the pet-food world and explains how to choose the best commercial foods and supplements, and even includes both raw and cooked dog- and cat-food recipes for general diet as well as to treat specific needs. He also explains how we can use the right foods and supplements to "hack" the body's processes, including the immune system.

Eighty-three million dogs and ninety-six million cats call the US home. Dogs alone produce enough waste to fill more than 1,127 football fields 10 feet deep in a single year. Add billions of plastic pick-up bags to the mix, and season well with tons of litter box waste. Scoop a hefty portion into local landfills and seal it tightly to ensure optimal methane production. Clearly, this is a recipe for disaster. Dog and cat owners who trash their pets' offerings daily are in denial about how much waste is produced and what happens to it. Those who want to make the responsible choice often turn to the internet, only to find misleading, confusing, and contradictory information. The Pet Poo Pocket Guide will help you reduce your pet's environmental paw print with: Best practices for cycling pet waste back to nature Suggestions on how to tailor your approach based on location, situation, weather, needs or available time Instructions for using your composted pet waste safely to enrich your soil and nourish ornamental plants. With recycling tactics clearly indicated as "easy", "moderate", or "demanding", The Pet Poo Pocket Guide offers something for everyone. This no-nonsense guide is a must-read for any pet owner who is concerned about the environmental impact of their best friend, and is seeking a safe and practical solution.

From the man who knows how to fertilize houseplants with Jell-O and give someone a dry shampoo with Quaker Oats comes the first book of pet care tips that tackles everyday pet illnesses, quirky behaviors, and animal smells and stains by tapping into the power of brand-name products. The ever-inventive Joey Green presents fun and offbeat remedies for a wide range of pet troubles, from bad breath and skunks to hot spots and ticks. Who would have guessed that ChapStik stops a nail bleed or that Listerine can quell itching? Why not forego expensive and toxic flea sprays and use Dawn dishwashing liquid or Johnson's Baby Powder as a treatment instead? Even though these tips sound quirky (use Smirnoff vodka to clean your pet's ears?), they really do work because many brand-name products contain soaps, degreasers, emollients, and moisturizers to soothe, clean, dissolve, and heal quickly and safely. Joey Green's Amazing Pet Cures makes a great gift for pet lovers and is a practical guide for anyone looking for simple and easy shortcuts to live the good life with a pet.

Training the Best Dog Ever, originally published in hardcover as The Love That Dog Training Program, is a book based on love and kindness. It features a program of positive reinforcement and no-fail techniques that author Dawn Sylvia-Stasiewicz used to train the White House dog, Bo Obama, and each of Senator Ted Kennedy's dogs, among countless others. Training the Best Dog Ever relies on trust and treats, not choke collars; on bonding, not leash-yanking or reprimanding. The five-week training program takes only 10 to 20 minutes of practice a day and works both for puppies and for adult dogs that need to be trained out of bad habits. Illustrated with step-by-step photographs, the book covers hand-feeding; crate and potty training; and basic cues—sit, stay, come here—as well as more complex goals, such as bite inhibition and water safety. It shows how to avoid or correct typical behavior problems, including jumping, barking, and leash-pulling. Plus: how to make your dog comfortable in the world—a dog that knows how to behave in a vet's office, is at ease around strangers, and more. In other words, the best dog ever.

INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. How Stella Learned to Talk is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella "spoke" her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, How Stella Learned to Talk will be the indispensable dog book for the new decade.
