Why do citizens in pluralist democracies disagree collectively about the very values they agree on individually? This provocative book highlights the inescapable conflicts of rights and values at the heart of democratic politics. Based on interviews with thousands of citizens and political decision makers, the book focuses on modern Canadian politics, investigating why a country so fortunate in its history and circumstances is on the brink of dissolution. Taking advantage of new techniques of computer-assisted interviewing, the authors explore the politics of a wide array of issues, from freedom of expression to public funding of religious schools to government wiretapping to antihate legislation, analyzing not only why citizens take the positions they do but also how easily they can be talked out of them. In the process, the authors challenge a number of commonly held assumptions about democratic politics. They show, for example, that political elites do not constitute a special bulwark protecting civil liberties; that arguments over political rights are as deeply driven by commitment to the master values of democratic politics as by failure to understand them; and that consensus on the rights of groups is inherently more fragile than on the rights of individuals.

Sounding 1: BEFORE 1840 The notes, journals and characters of Aboriginal Protectors William Thomas and his Chief George Robinson form the backbone of this compilation. With this ethnographic material we learn something of the Kulin worldview into this mostly white-fella history. Sounding 1: Before 1840 describes the initial British and European experiences, events, observations, intentions, self-serving judgements, ignorance, naivete, treachery and so on when they found Oz and proclaimed the continent theirs by the now obvious fiction of terra nullius – Latin legalese for 'land belonging to no people'. The reader may enjoy separating the grains of truth from the chaff propaganda of Empire capitalism or racist / sectarian Christian bible dogma that was the self-serving mindset of the white land-takers. Batman and Fawkner's land-hunting deals with local koori's along with the re-emergence of the remarkable wild white castaway Buckley made their mark on the first settlement at Melbourne. The focus widens in 1836 with Surveyor-General Major Mitchell's and his Wuradjuri guides 'conquering the interior' from the Murray near Mildura to the Western District at Portland and then back north-east across the state to the Murray upstream at Albury. His wheel tracks opened up Victoria from the north. First contact race interactions at Port Phillip and the notion of cultural-coexistence during the first five years leads to the role of 'successful battler' and publican Fawkner in the colonial invasion process from Kulin country to sheep-run to city. Sounding 1 then winds up with Melbourne's first executions and descriptions of Port Phillip as the money melting pot forming the Melbourne hub of world capitalism. Twentieth century academic studies now identify native religion, language zones, tribal locations and clan heads at the time of dispossession by pirate capitalism. In describing the Australian land-rush the chapter echoes oscillate between history, sociology, race theory, trade and class wars, whaling and sealing, imperialism and the monopoly East India Company army mates all pitted against the 'vanishing race' of hunter-gathering 'savages'. The dispossession was virtually complete in Victoria before the 1850's gold rushes transformed the sheep-runs into banker's dividend wealth for the 'winners'. Sounding 2: DISPOSSESSION AT MELBOURNE: Sounding 2 unfolds gently with a wistful early Melbourne memoir involving Batman's lost lawyer Gellibrand in 1836 but then we confront the frontier 'kill or be killed' point of necessity. The violent life, times and fate of mass murderer Fred Taylor who was first employed as overseer for banker Swanston's Bellarine peninsula land-grab sets the local dispossession tone. Taylor's repeated atrocities today exposes a credibility gap in Oz – between civilized progress and slaughter, that now looms over all else in Victoria's birth as an independent state in 1851. The winter of 1837 saw the first violent death of a white squatter and his servant by 'savage natives' north-west of Williamstown at Mt Cotterell. Town leaders such as Fawkner and 'police chief' Henry Batman formed a posse that also included clan heads from both the Melbourne and Geelong tribal areas. Buckley refused to take part in the vigilante party and its punitive actions belied the humanitarian standards expressed in Batman's treaty deed. This revenge slaughter and destruction of 'villages' by the white invaders forced the Sydney government to investigate and so began administering 'law and order' at Port Phillip. By 1838 Sydney trumped Batman's land-grab and the penal government of NSW on the one hand executing eight 'whites' for killing what the newspapers called 'savages', while on the other hand providing sufficient speedy cavalry to tackle black resistance in Victoria at places such as west of Colac and near Benalla after the Faithfull massacre. The arrival in 1839 of first governor La Trobe and the Aboriginal Protectorate plan then unfolds the development of town civic structures while tribal life disintegrates. Government and private measures to 'tame the naked Melbourne natives' culminated with the dawn Merri Creek round-up in October 1840 of hundreds of Kulin's by Major Lettsom's redcoats and townsmen. This appears as the death blow to tribal life, and with the first shiploads of migrating British colonists arriving in 1841, near genocide for the Kulin, Mara, Kurnai and Murray River first-peoples.

The Acts of Peter, one of the Apocryphal Acts of the Apostles that detail the exploits of the key figures of early Christianity, provides a unique window into the formation of early Christian narrative. Like the Gospels, the Acts of Peter developed from disparate oral and written narrative from the first century. The apocryphal text, however, continued to develop into a number of re-castings, translations, abridgements, and expansions. The Acts of Peter present Christian narrative in an alternate universe, in which canonization did not halt the process of creative re-composition. Now, in this groundbreaking book, Thomas examines the sources and subsequent versions of the Acts, from the earliest traditions through the sixth-century Passions of the Apostles, arguing the importance of its "narrative fluidity": the existence of the work in several versions or multiforms. This feature, shared with the Jewish novels of Esther and Daniel, the Greek romance about Alexander the Great, and the Christian Gospels, allows these narratives to adapt to accommodate the changing historical circumstances of their audiences. In each new version, the audiences' defining conflicts were reflected in the text, echoing a historical consciousness more often identified with primary oral societies, in which the account of the past is a malleable script explaining the present. Although the genre most closely comparable to these works is the ancient novel, their serious historical intent separates them from the later, more self-consciously fictive novels, and maintains them within the realm of the earlier historical novels produced by ethnic subcultures within the Roman empire.

The acclaimed novel of the early years after the Resurrection, and the imagining of a Church and a new World, is now available in a convenient ebook edition. Walter F. Murphy, author of the bestselling novel *The Vicar of Christ*, engages the epic grandeur of the Resurrection and the heroic struggle of Simon Peter to spread the good word that the kingdom of God is at hand. His journey is harrowing: he flees from Jerusalem to Galilee and, after further fascinating travels, finally arrives in Nero's Rome. The story unfolds in epic scope filtered through the Greek scholar Quintus, who follows Simon Peter in his journeys. In *Upon this Rock*, Murphy humanizes the disciples as never before: they are filled with love for the Master, but like every man they are at times petty, selfish, vain. Peter himself is a man of spacious moods, resenting Jesus' love for John and envying the spiritual power Mary of Magdala's vision of the risen Master brings. And Peter can be crude, angry, and self-pitying, for he is an uneducated man with a tragic past that fuels his nagging spiritual doubt. His faith wavers, even fails, but ultimately triumphs, conquering even the brutal torture of the disciples by the Romans. Upon this rock a church was built, just as the Master envisioned. Previously published in print by Macmillan and Ballantine paperbacks, this work is now available from Quid Pro Books in a quality, authorized ebook edition, with proper formatting, active and detailed Contents, and the original maps and imagery from the hardcover edition retained in this digital work. Also available in new and modern paperback printing from Quid Pro Books.

Providing a compact literary history of the twentieth century in England, *Cities of Affluence and Anger* studies the problematic terms of national identity during England's transition from an imperial power to its integration in the global cultural marketplace. While the countryside had been the dominant symbol of Englishness throughout the previous century, modern literature began to turn more and more to the city to redraw the boundaries of a contemporary cultural polity. The urban class system, paradoxically, still functioned as a marker of wealth, status, and hierarchy throughout this long period of self-examination, but it also became a way to project a common culture and mitigate other forms of difference. Local class politics were transformed in such a way that enabled the English to reframe a highly provisional national unity in the context of imperial disintegration, postcolonial immigration, and, later, globalization. Kalliney plots the decline of the country-house novel through an analysis of Forster's *Howards End* and Waugh's *Brideshead Revisited*, each ruthless in its sabotage of the trope of bucolic harmony. The traditionally pastoral focus of English fiction gives way to a high-modernist urban narrative, exemplified by Woolf's *Mrs. Dalloway*, and, later, to realists such as Osborne and Sillitoe, through whose work Kalliney explores postwar urban expansion and the cultural politics of the welfare state. Offering fresh new readings of Lessing's *The Golden Notebook* and Rushdie's *The Satanic Verses*, the author considers the postwar appropriation of domesticity, the emergence of postcolonial literature, and the renovation of travel narratives in the context of globalization. Kalliney suggests that it is largely one city--London--through which national identity has been reframed. How and why this transition came about is a process that *Cities of Affluence and Anger* depicts with exceptional insight and originality.

While ancient civilizations worshipped strong, active emotions, modern societies have favored more peaceful attitudes, especially within the democratic process. We have largely forgotten the struggle to make use of thymos, the part of the soul that, following Plato, contains spirit, pride, and indignation. Rather, Christianity and psychoanalysis have promoted mutual understanding to overcome conflict. Through unique examples, Peter Sloterdijk, the preeminent posthumanist, argues exactly the opposite, showing how the history of Western civilization can be read as a suppression and return of rage. By way of reinterpreting the *Iliad*, Alexandre Dumas's *Count of Monte Cristo*, and recent Islamic political riots in Paris, Sloterdijk proves the fallacy that rage is an emotion capable of control. Global terrorism and economic frustrations have rendered strong emotions visibly resurgent, and the consequences of violent outbursts will determine international relations for decades to come. To better respond to rage and its complexity, Sloterdijk daringly breaks with entrenched dogma and constructs a new theory for confronting conflict. His approach acknowledges and respects the proper place of rage and channels it into productive political struggle.

The effects of globalization require that multinational corporations (MNCs) coordinate their differentiated but interdependent organizational parts and align them to a common purpose. This book examines the mechanisms that such organizations use to govern their global subsidiary networks. The book starts with a review of key concepts and theories of multinational organizations and explains the rationale for their existence. Based on this assessment and an empirical study of three globally operating entities, the author develops a framework for examining the cultural and structural governance mechanisms that multinational corporations may employ to coordinate their global operations. This framework identifies different configurations of cultural and structural governance mechanisms and explains what kind of

configuration a multinational organization should employ to ensure efficient governance.

This introductory course text explores the genealogy of the field of conflict resolution by examining three different epochs of the field, each one tied to the historical context and events of the day.
