Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The I-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

In 1984 Peugeot launched the 205 1.6 GTi, which not only changed Peugeot's image forever, but also set a new benchmark for 'hot hatches' eight years after the legendary Golf GTI had raised the bar. Weak points, rust traps, and potential mechanical defects are all laid bare by an expert for the would be buyer. Clear 205-specific photos illustrate problem areas and good points too, as well as model variations. The author also embraces customized and mechanically modified cars. A unique points scoring system lets you evaluate your potential purchase like and expert and also to determine which price category it should fall into. With

The primary purpose of the Manual of Classification of Motor Vehicle Traffic Accidents is to promote uniformity and comparability of motor vehicle traffic accident statistics now being developed in Federal, state and local jurisdictions. This manual is divided into two sections, one containing definitions and one containing classification instructions.

Four-wheel-drive was authorised in rallying from 1979, but for a time no serious car-manufacturer even tried to harness it to their cars. Soon, though, it was Audi who produced the world's first rally-winning four-wheel-drive car the Quattro. However it was Peugeot who designed, developed, campaigned and won with the first truly sophisticated four-wheel-drive Group B Car the 205 Turbo 16. It was the first truly great, purpose-designed, Group B car. Determined to win at almost any cost, Peugeot hired Jean Todt (who would later transform the fortunes of the Ferrari F1 organisation) in 1981, and set him an ambitious target. His dream car had to be running in 1983, homologated in 1984, and capable of winning World Championships by 1985. Nothing, no excuses and no lack of application, was to get in the way of that. Apart from being obliged to use the silhouette of the still-secret new 205 road car, Todt was able to ask for anything. Getting approval for whatever he needed and fast-tracking the engineering of the four-wheel-drive rally was not an issue in reaching one simple objective victory. This is precisely what was achieved. This book tells the detailed story, and lists all the cars,

the influences, and the personalities behind a magnificent success story. No sooner had the new turbocharged, transverse-mid-engined car started competing than it was ready to win, yet its dominant career was cut short at the end of 1986 by an abrupt change in rallying regulations. Not only is the engineering story laid out in great detail, but the interaction between company personalities, super-star drivers (including Ari Vatanen) and the highly-charged atmosphere of motorsport at this time is all analysed. Because Group B was cancelled even before the 205 T16 had reached maturity, it went on to have a successful career in desert Raid rallies, and at Pike Peak in the USA, all of which is described in this amazingly authoritative study. Packed with illustrations, technical details, facts, figures and successes of this innovative car this book is a must for any rally fan.
