Deliver “Exceptional Business Value” aligned to “Organizational Strategy” through structured program management and stand out from the crowd by attaining the elite PgMP credential Programs are vehicles for organizations to realize their strategic objectives and goals. As the industry shifts from just delivery of projects and programs to a more value-driven and benefits-oriented model, program management acts as a key piece in the puzzle that allows organizations to extract the most business value & benefits from a group of related initiatives that are managed as one program. The biggest reason why strategic programs fail is due to the strategy execution gap, where the people executing the strategy don't understand “Why” we are doing this or “Where” we are going with this. The Program Manager is a key role that bridges this strategy execution gap, who leads the program towards success by keeping the team focused on the end goals that are aligned to the organizational strategy and direction.
