THERE are some strange summer mornings in the country, when he who is but a sojourner from the city shall early walk forth into the fields, and be wonder-smitten with the trance-like aspect of the green and golden world. Not a flower stirs; the trees forget to wave; the grass itself seems to have ceased to grow; and all Nature, as if suddenly become conscious of her own profound mystery, and feeling no refuge from it but silence, sinks into this wonderful and indescribable repose. Such was the morning in June, when, issuing from the embowered and high-gabled old home of his fathers, Pierre, dewily refreshed and spiritualized by sleep, gayly entered the long, wide, elmarched street of the village, and half unconsciously bent his steps toward a cottage, which peeped into view near the end of the vista. The verdant trance lay far and wide; and through it nothing came but the brindled kine, dreamily wandering to their pastures, followed, not driven, by ruddy-cheeked, white-footed boys. As touched and bewitched by the loveliness of this silence, Pierre neared the cottage, and lifted his eyes, he swiftly paused, fixing his glance upon one upper, open casement there. Why now this impassioned, youthful pause? Why this enkindled cheek and eye? Upon the sill of the casement, a snow-white glossy pillow reposes, and a trailing shrub has softly rested a rich, crimson flower against it. Well mayst thou seek that pillow, thou odoriferous flower, thought Pierre; not an hour ago, her own cheek must have rested there. "Lucy!" "Pierre!" As heart rings to heart those voices rang, and for a moment, in the bright hush of the morning, the two stood silently but ardently eying each other, beholding mutual reflections of a boundless admiration and love. "Nothing but Pierre," laughed the youth, at last; "thou hast forgotten to bid me good-morning." "That would

be little. Good-mornings, good-evenings, good days, weeks, months, and years tothee, Pierre;-bright Pierre!-Pierre!"Truly, thought the youth, with a still gaze of inexpressible fondness; truly the skies do ope, andthis invoking angel looks down.-"I would return thee thy manifold good-mornings, Lucy, did notthat presume thou had'st lived through a night; and by Heaven, thou belong'st to the regions of aninfinite day!"Fie, now, Pierre; why should ye youths always swear when ye love!"Because in us love is profane, since it mortally reaches toward the heaven in ye!"There thou fly'st again, Pierre; thou art always circumventing me s The biggest, the smallest, the longest, the shortest, the first, the latest,he best, the worst. In Dream Story, a married couple are first traumatized and then achieve a new depth of understanding by confessing to each other their sexual fantasies, dream-like adventures and might-have-beens. Taking us on a guided tour of Vienna's seedy cafés, red-light district, decadent villas, hospitals and morgue, Schnitzler brilliantly uncovers the violence and depravity lurking beneath the surface of civilized society. Like his Viennese contemporary Sigmund Freud, the doctor and writer Arthur Schnitzler was a bold pioneer in exploring the dark tangled roots of human sexuality.

If police are the problem, what's the solution? Tens of millions of people poured onto the streets for Black Lives Matter, bringing with them a wholly new idea of public safety, common security, and the delivery of justice, communicating that vision in the fiery vernacular of riot, rebellion, and protest. A World Without Police transcribes these new ideas—written in slogans and chants, over occupied bridges and hastily assembled barricades—into a compelling, must-

read manifesto for police abolition. Compellingly argued and lyrically charged, *A World Without Police* offers concrete strategies for confronting and breaking police power, as a first step toward building community alternatives that make the police obsolete. Surveying the post-protest landscape in Minneapolis, Philadelphia, Chicago, and Oakland, as well as the people who have experimented with policing alternatives at a mass scale in Latin America, Maher details the institutions we can count on to deliver security without the disorganizing interventions of cops: neighborhood response networks, community-based restorative justice practices, democratically organized self-defense projects, and well-resourced social services. *A World Without Police* argues that abolition is not a distant dream or an unreachable horizon but an attainable reality. In communities around the world, we are beginning to glimpse a real, lasting justice in which we keep us safe.

In the final nine chapters of the Gospel of Mark, Jesus increasingly struggles with his disciples'

incomprehension of his unique concept of suffering messiahship and with the opposition of the religious leaders of his day. The Gospel recounts the events that led to Jesus' arrest, trial, and crucifixion by the Roman authorities, concluding with an enigmatic ending in which Jesus' resurrection is announced but not displayed. In this volume New Testament scholar Joel Marcus offers a new translation of Mark 8–16 as well as extensive commentary and notes. He situates the narrative within the context of first-century Palestine and the larger Greco-Roman world; within the political context of the Jewish revolt against the Romans (66–73 C.E.); and within the religious context of the early church's sometimes rancorous engagement with Judaism, pagan religion, and its own internal problems. For religious scholars, pastors, and interested lay people alike, the book provides an accessible and enlightening window on the second of the canonical Gospels.

“Oliver Twist with a twist...Waters spins an absorbing tale that withholds as much as it discloses. A pulsating story.”—The New York Times Book Review The Handmaiden, a film adaptation of Fingersmith, directed by Park Chan-wook and starring Kim Tae-Ri, is now available. Sue Trinder is an orphan, left as an infant in the care of Mrs. Sucksby, a "baby farmer," who raised her with unusual tenderness, as if Sue were her own. Mrs. Sucksby's household, with its fussy babies calmed with doses of gin, also hosts a transient family of petty thieves—fingersmiths—for whom this house in the heart of a mean London slum is home. One day, the most beloved thief of all arrives—Gentleman, an elegant con man, who carries with him an enticing proposition for Sue: If she wins a position as the maid to Maud Lilly, a naïve gentlewoman, and aids Gentleman in her seduction, then they will all share in Maud's vast inheritance. Once the inheritance is secured, Maud will be disposed of—passed off as mad, and

Dostoevsky's letter to Katkov reveals his immediate inspiration, to which he remained faithful even after his original plan evolved into a much more ambitious creation: the desire to counter what he considered dire consequences stemming from the doctrines of Russian nihilism. In the novel, Dostoevsky pointed out the dangers of both utilitarianism and rationalism, whose main ideas inspired the radicals, continuing with a fierce criticism that he had already begun with his

Notes on the Underground. Dostoevsky used the characters, dialogue, and narrative of Crime and Punishment to articulate an argument against Westernization ideas. He thus attacked a peculiar Russian mixture of French utopian socialism and Benthamite utilitarianism, which had developed under revolutionary thinkers such as Nikolai Chernyshevsky and became known as rational egoism. The radicals refused to recognize themselves on the pages of the novel, as Dostoevsky pursued nihilistic ideas to their most extreme consequences. Dimitri Pisarev ridiculed the idea that the ideas of Raskolnikov could be identified with those of the radicals of the time. The radicals' goals were altruistic and humanitarian, but they had to be achieved by relying on reason and repressing the spontaneous flow of Christian compassion. Chernyshevsky's utilitarian ethic proposed that thought and will in man were subject to the laws of physical science. Dostoevsky believed that such ideas limited man to a product of physics, chemistry, and biology, denying spontaneous emotional responses. In the latest version of it, Russian nihilism encouraged the creation of an elite of superior individuals to whom the hopes of the future would be entrusted.

This encyclopedia presents a wealth of information on early cinema history, with coverage of the techniques and equipment of film production, profiles of the pioneering directors and producers, analysis of individual films and the rapid growth of distinct film genres, and the emergence of something the world had never seen before - the movie star. The work also focuses on how the nature of film exhibition changed as the industry grew, and how the public's reception to films also changed. The pre-cinema period is closely examined to show those mass-cultural forms and practices - such as music hall and vaudeville - from within which cinema was to emerge. A perfect companion for any student of early cinema and film studies.

Professor Gail Dines has written about and researched the porn industry for over two decades. She attends industry conferences, interviews producers and performers, and speaks to hundreds of men and women each year about their experience with porn. Students and educators describe her work as “life changing.” In Pornland—the culmination of her life’s work—Dines takes an unflinching look at porn and its affect on our lives. Astonishingly, the average age of first viewing porn is now 11.5 years for boys, and with the advent of the Internet, it’s no surprise that young people are consuming more porn than ever. But, as Dines shows, today’s porn is strikingly different from yesterday’s Playboy. As porn culture has become absorbed into pop culture, a new wave of entrepreneurs are creating porn that is even more hard-core, violent, sexist, and racist. To differentiate their products in a glutted market, producers have created

profitable niche products—like teen sex, torture porn, and gonzo—in order to entice a generation of desensitized users. Going from the backstreets to Wall Street, Dines traces the extensive money trail behind this multibillion-dollar industry—one that reaps more profits than the film and music industries combined. Like Big Tobacco—with its powerful lobbying groups and sophisticated business practices—porn companies don't simply sell products. Rather they influence legislators, partner with mainstream media, and develop new technologies like streaming video for cell phones. Proving that this assembly line of content is actually limiting our sexual freedom, Dines argues that porn's omnipresence has become a public health concern we can no longer ignore.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

For many, the 1970s evoke the Brady Bunch and the birth of disco. In this first, thematic popular history of the decade, David Frum argues that it was the 1970s, not the 1960s, that created modern America and altered the American personality forever. A society that had valued faith, self-reliance, self-sacrifice, and family loyalty evolved in little more than a decade into one characterized by superstition, self-interest, narcissism, and guilt. Frum examines this metamorphosis through the rise to cultural dominance of faddish psychology, astrology, drugs, religious cults, and consumer debt, and profiles such prominent players of the decade as Werner Erhard, Alex Comfort, and Jerry Brown. *How We Got Here* is lively and provocative reading.

Malaria is a mosquito-borne disease caused by parasitic protozoa that belong to the genus Plasmodium. This disease imposes a significant global health burden, claiming the lives of several thousand children and pregnant women each day. Increasing antimalarial drug resistance and the complexity of the Plasmodium life cycle, among other factors, have made eradication difficult. Written and edited by experts in the field, this collection from Cold Spring

Harbor Perspectives in Medicine examines the biology, pathology, and epidemiology of malaria, as well as ongoing efforts to treat infections and manage their spread. Contributors discuss the Plasmodium life cycle, focusing on the molecular mechanisms by which the various parasitic stages induce clinical symptoms, interact with the immune system, and lead to further transmission of malaria. They also explore topics such as the interaction between mosquito reproduction and Plasmodium development, epigenetic regulation of malaria-associated genes, and unique features of malaria in pregnant women (e.g., parity-dependent susceptibility) and describe how an improved understanding of these phenomena may lead to novel intervention strategies. The driving forces behind antimalarial drug resistance are covered, as is progress in developing an effective vaccine and controlling mosquito populations. This volume is therefore an essential reference for all scientists, clinicians, and public health professionals interested in understanding malaria and reducing its devastating effects.

NOW A NETFLIX SERIES ENTITLED “SPECIAL” FROM EXECUTIVE PRODUCER JIM PARSONS STARRING RYAN O’CONNELL AS HIMSELF. From the beloved blogger turned voice of an online generation, an unforgettable and hilarious memoir-meets-manifesto exploring what it means to be a millennial gay man living with cerebral palsy, which VICE calls “a younger, gay version of Mary Karr’s Lit.” People are obsessed with Ryan O’Connell’s blogs. With tens of thousands reading his pieces on Thought Catalog and Vice, watching his videos on YouTube, and hanging on to each and every #dark tweet, Ryan has established himself as a unique young voice who’s not afraid to dole out some real talk. He’s that candid, snarky friend you consult when you fear you’re spending too much time falling down virtual k-

holes stalking your ex on Facebook or when you've made the all-too-common mistake of befriending a psycho while wasted at last night's party and need to find a way to get rid of them the next morning. But Ryan didn't always have the answers to these modern day dilemmas. Growing up gay and disabled with cerebral palsy, he constantly felt like he was one step behind everybody else. Then the rude curveball known as your twenties happened and things got even more confusing. Ryan spent years as a Millennial cliché: he had dead-end internships; dabbled in unemployment; worked in his pajamas as a blogger; communicated mostly via text; looked for love online; spent hundreds on "necessary" items, like candles, while claiming to have no money; and even descended into aimless pill-popping. But through extensive trial and error, Ryan eventually figured out how to take his life from bleak to chic and began limping towards adulthood. Sharp and entertaining, I'm Special will educate twentysomethings (or other adolescents-at-heart) on what NOT to do if they ever want to become happy fully functioning grown ups with a 401k and a dog.

This volume presents the findings of a major international project on the application of radiocarbon dating to the Egyptian historical chronology. Researchers from the Universities of Oxford and Cranfield in the UK, along with a team from France, Austria and Israel, radiocarbon dated more than 200 Egyptian objects made from plant material from museum collections from all over the world. The results comprise an accurate scientifically based chronology of the kings of ancient Egypt obtained by the radiocarbon analysis of short-lived plant remains. The research sheds light on one of the most important periods of Egyptian history documenting the various rulers of Egypt's Old, Middle and New Kingdoms. Despite Egypt's historical significance, in the past the dating of events has been a contentious undertaking with

Egyptologists relying on various chronologies made up from archaeological and historical records. The radiocarbon dates nail down a chronology that is broadly in line with previous estimates. However, they do rule out some chronologies that have been put forward particularly in the Old Kingdom, which is shown to be older than some scholars thought. The research has implications for the whole region because the Egyptian chronology anchors the timing of historical events in neighbouring areas tied to the reign of particular Egyptian kings. The results will allow for more historical comparisons to be made in countries like Libya and Sudan, which have conducted radiocarbon dating techniques on places of archaeological interest in the past.
