Makes a Perfect gift for teens and adults. This beautiful Journal is filled with Bible Verses. All the pages in this Journal contain a popular Bible verse (KJV). Convenient size of 7 x 10 inches on glossy cover finish. This Journal has 108 lined pages to write down your thoughts.

This volume concerns the missionary philanthropic movement which burst onto the social scene in early nineteenth century in England, becoming a popular provincial movement which sought no less than national and global reformation.

This volume gives a survey of the most recent developments and trends in intergroup research. Diverging from classical approaches that looked at diverse needs and motives (positive distinctiveness, belongingness, etc), the present book focuses not only on the question what motivates intergroup behaviour, but especially on how the motivation of intergroup behaviour functions. The book focuses on the role of emotion and motivation in the development of intergroup conflict, social exclusion, tolerance and other group related phenomena. The sections demonstrate how classical theories in the field have been further developed, enriched, and more sophisticatedly tested over the years, and summarise research on affect and memory. They also develop a group based self-regulation approach, examine several specific emotions as motivational forces of intergroup behaviour, and look at factors of intergroup relations that lead to social change. The chapters are short and easy-to-comprehend summaries referring to a broad range of original work, providing a useful resource for advanced students of Social Psychology and researchers in the field of intergroup relations.

This book offers gas turbine users and manufacturers a valuable resource to help them sort through issues associated with combustion instabilities. In the last ten years, substantial efforts have been made in the industrial, governmental, and academic communities to understand the unique issues associated with combustion instabilities in low-emission gas turbines. The objective of this book is to compile these results into a series of chapters that address the various facets of the problem. The Case Studies section speaks to specific manufacturer and user experiences with combustion instabilities in the development stage and in fielded turbine engines. The book then goes on to examine The Fundamental Mechanisms, The Combustor Modeling, and Control Approaches.

The dictionary is based on a new concept which takes into account recent developments and findings in lexicographical research. It combines the best features of monolingual and bilingual dictionaries as well as learner dictionaries. Every sense of a word is first fully explained and then provided with translation equivalents. The grammatical behaviour of the words, their construction patterns are described in a language that is clear and easy to understand. Every sense of a word, every construction pattern is illustrated with an example.

These example sentences are given in English and German so that the word looked up is shown in actual use and the translation guarantees its understanding and promotes retention. Special care is taken to explain differences between English and German in language use and culture. A new reader-friendly layout ensures that users will easily and speedily find the answer to what they want to know.

In this book, a group of specialists describe the type of society in which unconditional income would be legitimate. In doing so, they question and clarify some of the central principles of modern political philosophy.

Since we think university students are the cream of the crop, it is important to ask whether or not they thrive well. To what extent can university students in Hong Kong develop in a holistic manner? How should we nurture university students to become the leaders and talents of tomorrow? Leadership and intrapersonal development are inherent requirements for university students in Hong Kong, transposing as 3-credit courses that each student must complete in order to graduate. To meet this requirement, a subject entitled Tomorrows Leaders was developed and piloted twice during the 2010-2012 academic years, which was offered to over 2,100 students annually. The design of the subject, curriculum materials, reflection of the teachers and evaluation findings in connection with this subject are presented in this book.

Since Germany became a colonial power relatively late, postcolonial theorists and histories of colonialism have thus far paid little attention to it. Uncovering Germany's colonial legacy and imagination, Susanne Zantop reveals the significance of colonial fantasies—a kind of colonialism without colonies—in the formation of German national identity. Through readings of historical, anthropological, literary, and popular texts, Zantop explores imaginary colonial encounters of "Germans" with "natives" in late-eighteenth- and early-nineteenth-century literature, and shows how these colonial fantasies acted as a rehearsal for actual colonial ventures in Africa, South America, and the Pacific. From as early as the sixteenth century, Germans preoccupied themselves with an imaginary drive for colonial conquest

and possession that eventually grew into a collective obsession. Zantop illustrates the gendered character of Germany's colonial imagination through critical readings of popular novels, plays, and travel literature that imagine sexual conquest and surrender in colonial territory—or love and blissful domestic relations between colonizer and colonized. She looks at scientific articles, philosophical essays, and political pamphlets that helped create a racist colonial discourse and demonstrates that from its earliest manifestations, the German colonial imagination contained ideas about a specifically German national identity, different from, if not superior to, most others.

The book addresses all major aspects to be considered for the design and operation of aircrafts within the entire transportation chain. It provides the basic information about the legal environment, which defines the basic requirements for aircraft design and aircraft operation. The interactions between airport, air traffic management and the airlines are described. The market forecast methods and the aircraft development process are explained to understand the very complex and risky business of an aircraft manufacturer. The principles of flight physics as basis for aircraft design are presented and linked to the operational and legal aspects of air transport including all environmental impacts. The book is written for graduate students as well as for engineers and experts, who are working in aerospace industry, at airports or in the domain of transport and logistics. With an emphasis on culture, this introductory program shows how the German language works. Reading

selections and exercises help develop the five skills. Do you regard hypothyroidism as a more complex issue than just a simple prescription of levothyroxine tablet? Are you interested in getting more information on the management of thyroid dysfunction in pregnancy, at birth, in childhood or in subclinical states? Have you been thinking of performing thyroid ultrasound in hypothyroid patients by yourself, or perhaps you already do it and are not so sure about it? Then this book should give you some answers and help you form your own opinion. You will find there several excellent review articles from authors from all over the world.

Sol-Gel Science: The Physics and Chemistry of Sol-Gel Processing presents the physical and chemical principles of the sol-gel process. The book emphasizes the science behind sol-gel processing with a chapter devoted to applications. The first chapter introduces basic terminology, provides a brief historical sketch, and identifies some excellent texts for background reading. Chapters 2 and 3 discuss the mechanisms of hydrolysis and condensation for nonsilicate and silicate systems. Chapter 4 deals with stabilization and gelation of sols. Chapter 5 reviews theories of gelation and examines the predicted and observed changes in the properties of a sol in the vicinity of the gel point. Chapter 6 describes the changes in structure and properties that occur during aging of a gel in its pore liquor (or some other liquid). The discussion of drying is divided into two parts, with the theory concentrated in Chapter 7 and the phenomenology in Chapter 8. The structure of dried gels is explored in Chapter 9. Chapter 10 shows the

possibility of using the gel as a substrate for chemical reactions or of modifying the bulk composition of the resulting ceramic by performing a surface reaction (such as nitridation) on the gel. Chapter 11 reviews the theory and practice of sintering, describing the mechanisms that govern densification of amorphous and crystalline materials, and showing the advantages of avoiding crystallization before sintering is complete. The properties of gel-derived and conventional ceramics are discussed in Chapter 12. The preparation of films is such an important aspect of sol-gel technology that the fundamentals of film formation are treated at length in Chapter 13. Films and other applications are briefly reviewed in Chapter 14. Materials scientists and researchers in the field of sol-gel processing will find the book invaluable.

Decolonization brings together the most cutting-edge thinking by major historians of decolonization, including previously unpublished essays and writings by leaders of decolonizing countries including Ho Chi Minh and Jawaharlal Nehru. The chapters in this volume present a move away from Western analysis of decolonization and instead move towards the angle of vision of the former colonies. This is a ground-breaking study of a subject central to recent global history.

Developing Writing Skills in German, is a unique course designed to improve the reading and writing skills of intermediate students of German. Presenting a wide range of authentic written materials, the book

aims to develop reading strategies and the ability to write texts of various types - essays, articles and reviews - while imparting an understanding of important aspects of German society. From the environment to consumerism, each chapter focuses on a different theme and concentrates on the advancement of particular skills; all the chapters conclude with a task appropriate to the skills focus of the section. Summary writing, note-taking, the use of mind-maps to collect ideas, and other strategies for successful writing in German are presented here. This course is suitable both for classroom use and independent study, with feedback and answer key supplied at the back of the book.

There is no country or economy participating in PISA 2012 that can claim that all of its 15-year-old students have achieved a baseline level of proficiency in mathematics, reading and science. Poor performance at school has long-term consequences, both for the individual and for society as a whole. Reducing the number of low-performing students is not only a goal in its own right but also an effective way to improve an education system's overall performance - and equity, since low performers are disproportionately from socio-economically disadvantaged families. *Low-performing Students: Why they Fall Behind and How to Help them Succeed* examines low performance at school by looking at low performers' family

background, education career and attitudes towards school. The report also analyses the school practices and educational policies that are more strongly associated with poor student performance. Most important, the evidence provided in the report reveals what policy makers, educators, parents and students themselves can do to tackle low performance and succeed in school.

This up-to-date resource on restorative justice theory and practice is the literature's most comprehensive and authoritative review of original research in new and contested areas. Bringing together contributors from across a range of jurisdictions, disciplines and legal traditions, this edited collection provides a concise, but critical review of existing theory and practice in restorative justice. Authors identify key developments, theoretical arguments and new empirical evidence, evaluating their merits and demerits, before turning the reader's attention to further concerns informing and improving the future of restorative justice. Divided into four parts, the Handbook includes papers written by leading scholars on new theory, empirical evidence of implementation, critiques and the future of restorative justice. This companion is essential reading for scholars of restorative justice, criminology, social theory, psychology, law, human rights and criminal justice, as well as researchers, policymakers, practitioners and campaigners from

'Civilizing Missions in Colonial and Postcolonial South Asia' demonstrates how the civilizing mission can serve as an analytical rubric with relevance to many themes in the colonial and postcolonial eras: economic development, state building, pacification, nationalism, cultural improvement, gender and generational relations, caste and untouchability, religion and missionaries, class relations, urbanization, NGOs, and civil society. While some chapters investigate civilizing initiatives that were driven by the British Raj or Indian postcolonial state, the book also considers many examples of nongovernmental undertakings. For example, examining the role of missionary educational endeavours shows how missionary bodies could operate in an ambivalent space between Indians and the colonial state. Moreover, analysis of Indian civilizing efforts carried out by nongovernmental organizations (NGOs), the nationalist movement or postcolonial Indian states gives us interesting opportunities to scrutinize how the civilizing mission could be internalized as a form of 'self-civilizing' by Indians. Some papers also show the global linkages of civilizing efforts in the British Empire, while others examine long-term continuities through broad

comparative analyses covering the nineteenth and twentieth centuries. This takes us into the postcolonial era (beyond 1947, into the late twentieth and twenty-first centuries), and such 'transgressions' across the colonial divide give this volume added appeal.

Why did Black-Korean tensions result in violent clashes in Los Angeles but not in New York City? In a book based on fieldwork and on a nationwide database he constructed to track such conflicts, Patrick D. Joyce goes beyond sociological and cultural explanations. *No Fire Next Time* shows how political practices and urban institutions can channel racial and ethnic tensions into protest or, alternately, leave them free to erupt violently. Few encounters demonstrate this connection better than those between African Americans and Korean Americans. Cities like New York, where politics is noisy, contentious, and involves people at the grassroots, have seen extensive Black boycotts of Korean-owned businesses (usually small grocery stores). African Americans in Los Angeles have sustained few long-term boycotts of Korean American businesses—but the absence of "routine" contention there goes hand in hand with the large-scale riots of 1992 and continuous acts of individual violence. In demonstrating how conflicts between these groups were intimately tied to their political surroundings, this book yields practical lessons for the future. City governments can do little to fight widening economic inequality in an increasingly diverse nation, Joyce writes. But officials and activists can

restructure political institutions to provide the foundations for new multiracial coalitions.

Social protection systems in Latin America developed in a fragmented manner, offering varying access to benefits and benefit levels to population groups. In the context of widespread informal and precarious work, social insurance institutions could only provide limited coverage. In this context, progress toward a Citizen's Income policy in Latin America depends on the possibility of reappraising its importance for an integrated institutional system which promotes the empowerment and economic independence of people. A Citizen's Income policy is not only a cash transfer to alleviate poverty or a basic income for food. It is a basic right to improve democracy and encourage a more autonomous development of people living in profoundly unequal societies.

Coal, still used to generate more than half of the electric power in the U.S., will likely be part of any future global energy plan. But this finite resource is also responsible for 80 percent of the CO₂ emissions from power production, and its continued use will require improved processing techniques that are less damaging to the environment and less costly. One viable option is the use of "clean coal" energy conversion devices that rely on the combustion of gasified coal, referred to as synthesis gas, or syngas. Synthesis Gas Combustion:

Fundamentals and Applications presents work from leading combustion authorities who offer their perspectives on various energy and environmental issues linked to the development of syngas and

hydrogen combustion. This volume summarizes the current understanding of syngas, focusing first on combustion fundamentals and then on issues specific to application and utilization in fuel cells, internal combustion engines, and steady-flowing combustion devices such as gas turbines or boilers. In discussing syngas production, this book details the technical issues and trade-offs that influence fuel composition. It also explores combustion fundamentals of "clean coal" technologies, including chemical kinetics, flame properties, and emissions. Governments and companies around the world are devoting significant resources to improve understanding of the combustion of coal and bio-derived synthesis gases, to maximize the benefits of gasification technology and limit CO₂ emissions. This valuable reference provides state-of-the-art context and technical information needed to develop clean energy systems. These include clean coal technologies, hydrogen and liquid fuel production, use of biomass feedstocks, and usage in fuel cells and other advanced power generation technologies.

Public concern over sharp increases in undergraduate tuition has led many to question why colleges and universities cannot behave more like businesses and cut their costs to hold tuition down. Ronald G. Ehrenberg and his coauthors assert that understanding how academic institutions are governed provides part of the answer. Factors that influence the governance of academic institutions include how states regulate higher education and govern their public institutions; the size and method of selection of boards of trustees; the roles

of trustees, administrators, and faculty in shared governance at campuses; how universities are organized for fiscal and academic purposes; the presence or absence of collective bargaining for faculty, staff, and graduate student assistants; pressures from government regulations, donors, insurance carriers, athletic conferences, and accreditation agencies; and competition from for-profit providers. *Governing Academia*, which covers all these aspects of governance, is enlightening and accessible for anyone interested in higher education. The authors are leading academic administrators and scholars from a wide range of fields including economics, education, law, political science, and public policy.

This first comprehensive overview of the modern aspects of biomineralization represents life and materials science at its best: Bioinspired pathways are the hot topics in many disciplines and this holds especially true for biomineralization. Here, the editors -- well-known members of associations and prestigious institutes -- have assembled an international team of renowned authors to provide first-hand research results. This second volume deals with biometric model systems in biomineralization, including the biomineral approach to bionics, bioinspired materials synthesis and bio-supported materials chemistry, encapsulation and the imaging of internal nanostructures of biominerals. An interdisciplinary must-have account, for biochemists, bioinorganic chemists, lecturers in chemistry and biochemistry, materials scientists, biologists, and solid state physicists.

Cross-cultural psychology has come of age as a scientific discipline, but how has it developed? The field has moved from exploratory studies, in which researchers were mainly interested in finding differences in psychological functioning without any clear expectation, to detailed hypothesis tests of theories of cross-cultural differences. This book takes stock of the large number of empirical studies conducted over the last decades to evaluate the current state of the field. Specialists from various domains provide an overview of their area, linking it to the fundamental questions of cross-cultural psychology such as how individuals and their cultures are linked, how the link evolves during development, and what the methodological challenges of the field are. This book will appeal to academic researchers and post-graduates interested in cross-cultural research.

"In more than 1,800 pages of alphabetical entries, each ranging from 500 to 1,2000 words, The Encyclopedia Of Race And Racism, 2nd Edition provides critical information and context on the underlying social, economic, geographical, and political conditions that, gave rise and continue to foster racism. Religion, political economy, social activism, health, concepts, and constructs are explored. Insulin-like growth factor (IGF)-I is a widely expressed growth factor with diverse effects on many tissues throughout development and in adult life. The purpose of this work is to provide detailed and updated information on the role of the growth hormone (GH)-IGF axis in fetal and postnatal development, as well as its physiological functions and implications in pathology.

Focusing on the limits and challenges of redistributive policies in Latin America, this volume synthesizes and updates the discussion of inequality in the region, introducing the perspective of global and transnational interdependencies. The book explores the extent to which redistributive policies have been interlinked with the provision and quality of public goods as well as with structural changes of the productive sector. Inspired by structuralist and neostructuralist thinking of Latin American economists, authors question the redistributive impact of the interplay of recent macroeconomic, fiscal and social policies, particularly under left and center-left administrations committed to greater equality.
