Are you or someone you know in the midst of grief? When I was dealing with the death of my wife I found it difficult to read narrative. Books and study guides on grief seemed difficult and impersonal. Most days I barely had enough energy to function. I desired encouragement and found it in daily devotions or personal accounts of how others dealt with this journey. I chose poems for this book because they can be digested in small bites and hopefully are helpful for the hurting heart.

Informer 001 is the first exhaustive, secret, independent study of the Morozov affair and is Yuri Druzhnikov's search for the truth about his life, death, and the perpetuation of his legacy. Druzhnikov examined documents, visited museums, and interviewed virtually everyone who knew Morozov during his short lifetime. In book after book, he discovered inconsistencies in every fact, from where Morozov was born to how old he was at the time of his death. Photographs of the hero, when compared, turned out to be of different people. Historical archives contained no documents of Morozov. Memorial museums displayed no personal relics; instead they contained pictures, books, and newspaper clippings. Attempts by Druzhnikov to interview living witnesses were met with resistance - he was even followed constantly. The subject of Pavlik Morozov was "officially untouchable."

Sometimes there are challenges for lactation therapists that can't be completely resolved by current lactation practices--when the baby has reflux or torticollis, when mother and baby are injured or in pain, when the mother can't relax enough to sleep, when weeks of pumping erode the mother's energy to the point she wants to quit breastfeeding. In *Complementary and Alternative Medicine in Breastfeeding Therapy*, author Nikki Lee describes mother-baby situations that benefit from complementary and alternative therapy techniques in order to have a thriving baby and a happy mother, with an abundant milk supply and easy breastfeeding. In her experience complementary therapies, when used in conjunction with proven breastfeeding management, do no harm and usually help mother and baby. Therapies covered include:  
-Creating a healing environment -Skin-to-skin and massage -Acupuncture -Chiropractic -Craniosacral therapy -Remedial co-bathing -Homeopathy This book is not an instruction manual. It is an open door to the world of other ways of healing. Some or all of these therapies may be gentle and helpful additions to your lactation toolbox.

**Automotive Relay Circuit Guide**(Includes circuit explanations, how current flows and how to wire relays from the ground up.)By Mandy ConcepcionThis book is a comprehensive work on automotive relays and their circuit analysis. The book is also a companion to our Video-DVD series of the same title. Here, we analyze how automotive relays are connected with their peripheral components. Each section starts with the specifics of the components used in that circuit and then there's a deep analysis of how current flows on the circuit. The idea is to first explain and give the reader the particulars of each circuit, then go deeper and analyze why the circuit behaves the way it does, how to diagnose it and how to connect it in case the whole wiring is missing, obsolete or simply was never present to begin with. Table of Contents · How to wire relay as ON button – Explains how to connect an automotive relay to stay ON at all times. Useful for any device that

stays ON and using a low current trigger switch. · Turn ON relay button diode – Details the use of a Diode as an ON circuit. The diode itself is the key to it all. · How to make a relay injector security circuit – This is a clever circuit for deactivating your vehicle's fuel injectors as a security measure. It's simple and concealed. · How to wire a relay starter kill-switch – Disabling the starter is fairly simple, but this circuit also employs other tactics to make it more effective. · How to do a single relay car alarm – Shows how to wire a relay as an easy to connect car alarm. Learn how this circuit works and how to wire the fuel pump. · How to do an alternator relay failure circuit – A very clever circuit used as a warning to the driver when an impending alternator issue is at hand. · How to wire relay power door lock – Power door locks have been around for many years. This section shows you how the circuit works, how to connect it, retrofitting to an older car and how to repair the systems in case of failure. · How to wire a power windows relay – Resistive rest at ground or any other wiring scheme is foreign to many people. Learn how it works right here in this article. · How to make a relay turn signal – Learn how to wire an entire high class turn signal system, found on luxury makes. Useful for retrofitting your own vehicle in case parts are no longer available. · How to wire an AC compressor clutch relay – A very reliable circuit is presented here to help you understand an AC systems as well as teaches you to retrofit older cars. · How to connect a headlight warning relay – Knowing when the headlights are down is essential. This circuit will show you how the circuit works and how to build it. · How to wire an ECM relay – The ECM relay meets all power requirements for the car computer. Learn how the circuit works and how to connect it. · How to wire AC blower motor relay – Get the details on connecting an AC blower motor and how to re-wire a new one if needed. · How to wire relay fog lights – Fog lights are necessary in many areas. Tapping is an activity that many of us engage in everyday without even thinking about what we are doing. We drum our fingers on a desk or table while we wait for something to happen. We tap our forehead while we are figuring out a problem. We stroke our chin or rub our head as we contemplate the issues of the day. Each of these acts is our body's clumsy way of attending to a need for peace or resolution. Tapping prayer is a spiritual practice that intentionally focuses

our attention on the rhythmic movement of our finger tips. It directs the energy of God's healing onto specific points on our body that through the practice of acupuncture and reiki, have shown to be conduits of healing. Tapping prayer is the most exciting addition to my spiritual tool belt in 25 years of ministry. It's fun and effective and easy to administer alone, one on one, or in a group. It is very flexible...and did I mention, effective? Tapping prayer is effective in bringing individuals into a one on one relationship with God that creates peace, healing, and a desire to share those gifts with other individuals, communities, and Creation. Tapping prayer is an integration of sacred wisdom from the East and West. It is a spiritual practice that blends a knowledge of the Spirit's movement through our body with an understanding of meridian tapping based on the Emotional Freedom Technique created by Gary Craig. Tapping prayer brings balance and peace to individuals who are experiencing spiritual distress. By gently tapping on identified points of entry for the Holy which correspond to meridian end points in acupuncture, while praying for God to attend to a particular pain, we focus God's intention to heal and in most cases actually experience a peace which is not of our own doing. By acknowledging pain instead of wishing for relief, we recognize God's interest to heal us and indeed, God heals us. This technique can be used for individuals who are seeking peace from a wide variety of issues ranging from: trauma such as a car accident, an abusive parent, a friend killed in battle, a sudden illness, a job loss, a fire, a damaged relationship. Tapping prayer can also facilitate forgiveness and/or letting go. Tapping prayer is effective in praying for others (surrogate prayer tapping focused on an individual who is not present to the prayer tapping), for events (9/11, Sandy Hook, a company leaving a community), or Creation (an oil spill, deforestation, strip mining). Wherever there is a disruption to the peaceful flow of the Holy Spirit, tapping prayer can be applied. When I first learned about the Emotional Freedom Technique as a tool to help veterans in our community, I thought it was weird. The tapping. The repetition. It seemed...odd. This was not how I understood healing from trauma to work, and yet it worked. Clearly, my Western roots were showing. When I got home from the training I began using the technique with members of my community and saw such dramatic results I had to learn more. They also found it strange, but effective. Some folks were uncomfortable with the language of "energies" and "chi," so I experimented a bit and added more traditional faith language to the mix. I dug deeply into my own faith traditions and discovered a theology of healing that accompanied tapping prayer. I found that by invoking God's presence into the act of tapping, people from varying faith experiences were able to connect to the Holy on a deeper level. They began to experience God as very real and very present in their lives. They asked to learn more about this new way of praying. They discovered that by using tapping prayer on a wide variety of issues, their relationship with God grew deeper. If you are ready to draw closer to God's healing love for you, please take responsibility for your participation in tapping prayer, and let's pray! --Todd Farnsworth

During the period when Russia was under Stalin, a young boy named Pavlik Morozov informed the OGPU (now called the KGB) that his father was an enemy of the regime. As a result, Pavlik's father was arrested and disappeared in a Soviet concentration camp. Enemies of the party later killed the boy, whereupon people proclaimed him a hero. Informer 001 is the first independent study of the Morozov affair. In book after book, author Druzhnikov discovered inconsistencies on every fact relating to Morozov. As Druzhnikov pieced together the story about Morozov's life, death, and legacy, it became clear that the campaign to keep Morozov a hero was centrally directed. Informer hero number 001, remained a fearful reminder to all; to those who inform, and those who become the victims of denunciations.

When entrepreneur Len Forkas learned that his nine-year-old son had leukemia, his own life changed forever. In 2003, Len founded Hopecam, a nonprofit that uses technology to connect young cancer patients with their friends at school. Ten years later, Len's fight against childhood cancer rose to a new level. He qualified as a solo competitor in Race Across America, a 3,000-mile bicycle race that traverses scorching deserts and 11,000-foot mountain elevations. As Len fought to finish the race in just 12 days, an all-volunteer crew supported him around the clock. *What Spins the Wheel* is a true story about fatherhood and fortitude, business grit and growth? and the power of combining the right mission with the right team to help others.

For decades, traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working. *"Fighting the Dragon: How I Beat Multiple Sclerosis"* is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own community), and the logic behind the non-conventional therapies. *"Fighting the Dragon"* is a narrative of courage—courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance. *"Fighting the Dragon"* is also a book the MS patient can take to his/her physician . . . it contains well-researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. \* \* \* \* \* Excerpt: . . . if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it—but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be

satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a solution that is not in any industry-approved repair manuals, but it is safe and it works,"—would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car?

This book is for the generous and busy people who agree to give of their time and talents by serving on nonprofit boards. It takes a significant amount of time and effort to plan and conduct quality board member orientation programs, and every time a new board member arrives, it's time to do it again! Hooey Alerts! Watch for Hooey Alerts! where the author identifies and dispels common myths and legends about nonprofit board service. There are many sources of false or misleading information about the nonprofit board service environment. The board member's duties are presented in a clear and concise manner from the perspective of someone who has been around many boards.
