A uniquely powerful departure from the genre of war literature, this narrative moves in the cadence of memories told as stories over a campfire. Thompson transports the reader into the mind-space of his 19-year-old self, as he fought this war, grew up there, grew old there, and changed forever there.

Work on the human brainstem has been impeded by the unavailability of a comprehensive diagrammatic and photographic atlas. In the authors' preliminary work on the morphology of the human brainstem (The Human Nervous System, 1990), Paxinos et al demonstrated that it is possible to use chemoarchitecture to establish a number of human homologs in structures known to exist in the rat, the most extensively studied species. Now, with the first detailed atlas on the human brainstem in more than forty years, the authors present an accurate, comprehensive, and convenient reference for students, researchers, and pathologists. Key Features \* The first detailed atlas on the human brainstem in more than forty years \* Delineated as accurately as The Rat Brain in Stereotaxic Coordinates, Second Edition (Paxinos/Watson, 1986), the most cited book in neuroscience \* Based on a single brain from a 59-year-old male with no medical history of neurological or psychiatric illness \* Represents all areas of the medulla, pons, and midbrain in the plane transverse to the longitudinal axis of the brainstem \* Consists of 64 plates and 64 accompanying diagrams with an interplate distance of half a millimeter \* The photographs are of Nissl and acetylcholinesterase (AChE) stained sections at alternate levels \* Establishes systematically the human homologs to nuclei identified in the brainstem of the rat Reviewed by leading neuroanatomists \* An accurate and convenient guide for students, researchers, and pathologists

In their book, *Managing America's Small Communities*, David Folz and P. Edward French examine the relevant trends, executive behavior, service quality, and service performance measurement in small communities. The theme is the value added to small communities that evidence professionalism in administration. Professional managers base service strategies on needs rather than demands, emphasize long-term community interests, promote equality, and advance citizen participation. The findings show that city managers are more extensively engaged than mayors in governmental process decisions and help to advance the level of service quality in small communities. before returning to Ireland. At the insistence of Brother Botulf, a childhood friend of Eadulf, they detour from their trip to Eadulf's home village and make their way to Aldred's Abbey. Arriving at midnight on the night of the old pagan festival of Yule, as requested, they find Botulf's dead body - his head caved in by a blunt instrument. As Fidelma and Eadulf soon learn, however, murder isn't the only danger which faces those in the abbey. The ghost of a young woman haunts the cloister shadows, a ghost which closely resembles the Abbot's dead wife. Now it will require all of Fidelma's skill as an advocate of the Brehon Courts to unravel the mystery and uncover the truth behind these events before those secrets take yet another life.

**NEW EDITION, REVISED AND UPDATED** Phillip Longman tells the amazing story of the turnaround of the Department of Veterans Affairs health-care system from a dysfunctional, scandal-prone bureaucracy into the benchmark for high-quality medicine in the United States. *Best Care Anywhere* shows that vast

And the book demonstrates how this extraordinarily cost-effective model, which has proven to be highly popular with veterans, can be made available to everyone. This book provides an exhaustive historical account of how the English language was taught and learnt in Spain over two centuries. Since its origins back in 1769 with the publication of San Joaquín de Pedro's 'Gramática inglesa' until 1970, a key year in European and World affairs. A period of time ample enough to accurately gauge the impact of this social phenomenon against the backdrop of social and political unrest which looms over the whole period but also with scientific breakthroughs that shaped our modern world. The history of ELT runs parallel to those events adopting different mainstream trends ranging from the Traditional or Latin-like approach to foreign language teaching to the so-called Grammar-Translation Method and the Direct or Oral Method. However, special attention is also given to 'minor' trends such as Ecclecticism which constantly overlaps the mainstream trends. This book is the first to take a close look at how the English language was taught and learnt in Spain for a two-century period when the French language was the Spaniard's first choice when it came to learning a foreign language.

This book synthesizes and analyzes research on early vocal contact (EVC) for preterm infants, an early healthcare strategy aimed at reducing the long-term impact of neonatal hospitalization, minimizing negative impacts of premature birth, and promoting positive brain development. Chapters begin by examining research on the maternal voice and its unique and fundamental role in infant development during the fetal and neonatal period. The book discusses the rationale for EVC with preterm infants, the underlying neurobiological mechanisms, and the challenges for infants' development. Subsequent chapters highlight various EVCs that are used in the neonatal intensive care unit (NICU), including direct talking and singing to preterm infants. In addition, the book also presents and evaluates early family-centered therapies as well as paternal and other caregiver voice interventions. Topics featured in this book include: Early vocal contact and the language development of preterm infants. The maternal voice and its influence on the stability and the sleep of preterm infants. Parental singing as a form of early interactive contact with the preterm infant. Recorded or live music interventions in the bioecology of the NICU. The role of the music therapist to hospitalized infants. The Calming Cycle Theory and its implementation in preterm infants. Charlemagne is often claimed as the greatest ruler in Europe before Napoleon. This magisterial study re-examines Charlemagne the ruler and his reputation. It analyses the narrative representations of Charlemagne produced after his death, and thereafter focuses on the evidence from Charlemagne's lifetime concerning the creation of the Carolingian dynasty and the growth of the kingdom, the court and the royal household, communications and identities in the Frankish realm in the context of government, and Charlemagne's religious and cultural strategies.

The book offers a critical examination of the contemporary sources and in so doing transforms our understanding of the development of the Carolingian empire, the formation of Carolingian political identity, and the astonishing changes effected throughout Charlemagne's forty-six year period of rule. This is a major contribution to Carolingian history which will be essential reading for anyone interested in the medieval past. Rosamond McKitterick has also received the 2010 Dr A. H. Heineken Prize for History for her research into the Carolingians.

After a failed mission claims the lives of his five man support team, Stan Tremblay, Callsign: Rook, flees Siberia and finds himself on the secluded coast of Norway, north of the Arctic Circle. The small coastal town of Fenris Kystby seems like the perfect place. Within hours of arriving, he discovers that the town is not as tranquil as it appears. The townspeople are mistrustful of outsiders, a pack of mysterious wolves stalk the local tundra, and two villagers have been killed by a creature that defies explanation. To make things worse, there are rumors of something sinister, something the townspeople refuse to discuss. Despite the hostility of the locals, Rook commits to stopping the creature murdering townspeople. As the body count rises, he quickly learns that the greatest threat might walk on two legs. And when he uncovers the town's hidden past, Rook knows only one thing for certain: something is rotten in Norway.
