

Platinum Business Studies Grade 11 Learners Direct

As South Africa transitioned from apartheid to democracy, changes in the political landscape, as well as educational agendas and discourse on both a national and international level, shaped successive waves of curriculum reform over a relatively short period of time. Using South Africa as a germane example of how curriculum and pedagogy can interact and affect educational outcomes, *Pedagogy in Poverty* explores the potential of curricula to improve education in developing and emerging economies worldwide, and, ultimately, to reduce inequality. Incorporating detailed, empirical accounts of life inside South African classrooms, this book is a much-needed contribution to international debate surrounding optimal curriculum and pedagogic forms for children in poor schools. Classroom-level responses to curriculum policy reforms reveal some implications of the shifts between a radical, progressive approach and traditional curriculum forms. Hoadley focuses on the crucial role of teachers as mediators between curriculum and pedagogy, and explores key issues related to teacher knowledge by examining the teaching of reading and numeracy at the foundational levels of schooling. Offering a data-rich historical sociology of curriculum and pedagogic change, this book will appeal to academics, researchers and postgraduate students in the fields of education, sociology of education, curriculum studies, educational equality and school reform, and the policy and politics of education.

In recent years, great advances in translational research have led to new paradigms in the treatment of cancers of the head and neck. Written by leading international physicians and investigators, this innovative multi-disciplinary book presents the most up-to-date research and clinical approaches. Coverage is given to progress in a variety of clinical settings, including programs of organ and function preservation, curative treatments, unresectable disease, adjuvant treatments in high-risk patients, and recurrent/metastatic disease. Complementary to the techniques of surgery, radiotherapy, and systemic treatments, the authors present data on epidemiology, molecular pathology, normal tissue complications, rehabilitation, palliative care, and treatment in the elderly. State-of-the-art functional imaging is elucidated; and the latest developments in high precision techniques in irradiation, sequencing of chemo- and radiotherapy, as well as the integration of biomolecular therapies into cytotoxic treatments are explored.

Study & Master Mathematical Literacy Grade 10 has been especially developed by an experienced author team according to the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Mathematical Literacy. The Teacher's File includes: * a weekly teaching schedule, divided into the four terms to guide the teacher on what to teach * extra project templates for teachers to choose from * solutions to all the activities in the Learner's Book.

This book aims to provide an up-to-date review of the literature in each of the major areas relating to the management of older gynecological cancer patients, and makes recommendations for best practice and future research. The authors come from a broad geographic spread including the UK, mainland Europe and North America to ensure a worldwide relevance.

Endorsed by Cambridge International Examinations for the latest syllabus, this new edition of the the market-leading text provides a true international perspective. This title has been endorsed by Cambridge International Examinations for the latest Cambridge IGCSE (0450) and Cambridge O Level Business Studies (7115) syllabuses. - Offers an international perspective through a wide range of up-to-date case studies - Reinforces understanding through a variety of activities and discussion points - Provides examination preparation with revisions questions and summaries throughout - Written in accessible language, but with plenty of detail for top-grade students

Study & Master Physical Sciences Grade 11 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences. The comprehensive Learner's Book: • explains key concepts and scientific terms in accessible language and provides learners with a glossary of scientific terminology to aid understanding. • provides for frequent consolidation in the Summative assessments at the end of each module • includes case studies that link science to real-life situations and present balanced views on sensitive issues • includes 'Did you know?' features providing interesting additional information • highlights examples, laws and formulae in boxes for easy reference.

This title is endorsed by Cambridge Assessment International Education to support the full syllabus for examination from 2020. Discover business theory beyond the classroom by exploring real-world international businesses through case studies; rely on a tried-and-tested Student's Book to ensure full coverage of the latest Cambridge IGCSE and O Level Business Studies syllabuses (0450/0986/7115). - Encourage understanding with engaging case studies and clear and lively text gradually building content knowledge. - Develop application and evaluation skills with hundreds of engaging activities and examination-style questions throughout. - Deepen understanding through systematic syllabus coverage and a spiral structure revisiting material in a structured way. - Navigate the syllabuses confidently with subject outlines clearly defined at the start of each chapter and syllabus-matching section headings. - Check understanding with revision checklists enabling reflection, and suggested further practice. - Reinforce learning with selected answers and additional multiple-choice questions as well as a glossary of key terms online. Available in this series: Student Textbook Fifth edition (ISBN 9781510421233) Student eTextbook (ISBN 9781510420106) Whiteboard eTextbook (ISBN 9781510420113) Workbook (ISBN 9781510421257) Online Teacher's Guide (ISBN 9781510424128) Study and Revision Guide (ISBN 9781510421264)

Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. *Introduction to Business* includes hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

Like you we know that time is a precious commodity these days with packed schedules, testing requirements, and more. The newest addition to our product line can help you make the most of the time you have. *The Quick Planning Guide* - developed in conjunction with Grant Wiggins, President of Authentic Education and author of *Understanding By Design* - gives you the best of both worlds: planning suggestions to make the most of your time, and a focus on the Essential Questions that will drive student understanding. *Scott Foresman Social Studies* helps you make a difference.

A self-portrait by the controversial music artist shares his private thoughts on everything from his inner struggles to his relationship with his daughter, in an account complemented by drawings, hand-written lyrics, and previously unseen photographs.

The 7th International Symposium on Platinum and other metal coordination compounds in Cancer Chemotherapy, ISPCC '95, organized by the European Cancer Centre, was

held in Amsterdam, the Netherlands, March 1-4, 1995. As with previous ISPCC meetings, the goal of ISPCC '95 was to bring together clinicians, clinical investigators, scientists, and laboratory workers from many disciplines to promote further collaboration and cooperation in the development of new platinum and other metal coordination compounds as well as in new ways to use 'classical' drugs as cisplatin and carboplatin in the treatment of cancer. Important aspects addressed by experts in the field included the synthesis and activity of new platinum compounds, the biochemistry and molecular pharmacology as well as the clinical pharmacology of this class of antineoplastic agents, an overview of current clinical studies, one special minisymposium on the mechanisms of cell kill of platinum, and one on resistance against platinum compounds. Finally, the current status of development of nonplatinum metal complexes was discussed. This volume contains the contributions of the various speakers at ISPCC '95 and provides an up-to-date and comprehensive overview of this important class of anticancer agents, ranging from synthesis and molecular pharmacology on one hand to clinical pharmacology and clinical investigations on the other hand. The Organizing Committee and Editors wish to express their gratitude to the contributors to this volume, to the various organizations and pharmaceutical companies for their generous sponsoring of ISPCC '95, and to the Plenum Publishing Company for their help in producing this volume.

"Among the Golden at Emory high, Lilah Covington is Platinum - the hottest of the hot. She's popular, beautiful, and much smarter than she looks. But most importantly to Lilah, she's in complete control of her own destiny - if only someone would tell that to the mysterious ghost boy roaming the halls. Ever since Lissy and Lexie James arrived in town, Lilah's perfect world has been coming unhinged. No-one else can see the ghost who's trailing her around campus, and - forget the rumour mill - her memories have her more sidetracked than any gossip could. It looks as if the James family legacy of supernatural sight might be contagious. And to make matters worse, mutiny is brewing among the Golden, and if Lilah isn't careful, she may just lose her top-tier boyfriend to her second-in-command. Lilah knows the rules better than anyone, but between her newfound visions, an absolutely fatal attraction to a boy who isn't real, and the threat of a supernatural enemy with a sting deadlier than any Queen Bee, it's going to take everything Lilah has to stay on top at Emory. And to prove once and for all that those who make the rules are the only ones who can break them."

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

This book is intended as a reference manual that will provide the busy clinician with up-to-date information on the diagnosis and treatment of uncommon and rare gynecological cancers. While standard textbooks briefly cover these tumors, this is intended as a more comprehensive yet easy-to-use guide. After opening chapters on epidemiology, pathology, and diagnostic imaging, the full range of infrequently encountered gynecological cancers (ovarian, uterine, cervical, vaginal, and vulval) is presented and discussed with the aid of high-quality illustrations. In each case, detailed attention is paid to both differential diagnosis and current treatment options. The book has been written by an international panel of experts and is the first to gather all the uncommon and rare gynecological cancers together within one volume.

In July 1979, the Faculty of Pharmacy of the University of Bologna received a proposal from Professor Breccia to hold an International Conference on "Nitroimidazoles: Chemistry, Pharmacology and Clinical Application." Because of the great interest in these drugs in various fields, I was very pleased to accept the proposal and to give the conference the sponsorship of the University of Bologna. It was an added pleasure to accept the chairmanship of the meeting, together with Professors Sensi and Adams. At the same time, the Minister of Education approved a proposal which also came from the Faculty of Pharmacy, to offer an advanced course on the topic "Radiosensitizers of Hypoxic Cells This course was subsequently approved by a special Committee of the NATO Scientific Programme as an Advanced Study Institute. Since the subject matter of both the conference and the course are closely inter-related, it was logical to plan the conference as part of the overall course. Bringing together specialists from quite different and apparently unrelated fields of research, but all with an interest in the study and application of one single group of drugs, is a novel idea with intriguing possibilities. The volumes of the proceedings include contributions from experts with such diverse interests as synthetic chemistry, mechanism of drug action, parasitology, anaerobic bacteria and protozoa, pharmacology and toxicology, radiation sensitizers for use in radiotherapy, and the development of drugs for use in cancer in general.

The Chief Occupational Therapist Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to; Application of the principles and practices of occupational therapy in the administration of an occupational therapy program; Preparation of written material; Supervision; and more.

Ovarian cancer management is a rapidly changing field with new treatment agents available as a result of a greater understanding of the pathogenesis of this disease. In addition, both surgical and chemotherapeutic treatment strategies are evolving to maximise response in this disease. This book brings together leading specialists from around the world to discuss and outline a variety of new concepts in ovarian cancer, ranging from molecular biology and genetics through screening to both surgical and chemotherapeutic management.

Education has gone through numerous radical changes as the digital era has transformed the way we as humans communicate, inform ourselves, purchase goods, and perform other mundane chores at home and at work. New and emerging pedagogies have enabled rapid advancements, perhaps too rapidly. It's a challenge for instructors and researchers alike to remain up to date with educational developments and unlock the full potential that technology could have on this significant profession. The Handbook of Research on Digital Learning is an essential reference source that explores the different challenges and opportunities that the new and transformative pedagogies have enabled. The challenges will be portrayed through a number of

case studies where learners have struggled, managed, and adapted digital technologies in their effort to progress educational goals. Opportunities are revealed and displayed in the form of new methodologies, institutions scenarios, and ongoing research that seeks to optimize the use of such a medium to assist the digital learner in the future of networked education. Featuring research on topics such as mobile learning, self-directed learning, and cultural considerations, this book is ideally designed for teachers, principals, higher education faculty, deans, curriculum developers, instructional designers, educational software developers, IT specialists, students, researchers, and academicians.

The growing knowledge about disturbances of epigenetic gene regulation in hematopoietic stem cell disorders is now being translated into treatment approaches that target the epigenetic defects pharmacologically. This book first presents the latest evidence regarding the epigenetic regulation of hematopoietic stem cell differentiation and hemoglobin production. The significance of DNA methylation abnormalities in hematopoietic disorders and of epigenetic disturbances in lung cancer and other solid tumors is then discussed. A major part of the book, however, relates specifically to the translation of basic research and drug development to clinical applications, and in this context both present and future clinical strategies are considered. Individual chapters are devoted to the use of DNA hypomethylating agents and chromatin-modifying agents, and the treatment of hematologic malignancies and solid tumors by means of epigenetic agents is discussed in detail.

In the Johannesburg township of Soweto, a young, black gangster in South Africa, who leads a group of violent criminals, slowly discovers the meaning of compassion, dignity, and his own humanity. Reprint. A South African film, releasing February 2006 by Miramax) (General Fiction)

Study & Master Mathematical Literacy Grade 11 has been especially developed by an experienced author team according to the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Mathematical Literacy. The comprehensive Learner's Book includes: * thorough coverage of the basic skills topics to lay a sound foundation for the development of knowledge, skills and concepts in Mathematical Literacy * margin notes to assist learners with new concepts - especially Link boxes, that refer learners to the basic skills topics covered in Term 1, Unit 1-16 * ample examples with a strong visual input to connect Mathematical Literacy to everyday life.

Change the entire school culture with this collaborative method of supervision! For years, the classic supervision model has frustrated both principals and teachers by fostering superior-subordinate relationships, focusing on teacher conformity rather than growth, or producing checklist data that are irrelevant to the curriculum. The Three-Minute Classroom Walk-Through offers a practical, time-saving alternative that impacts student achievement by cultivating self-reliant teachers who are continuously improving their practice. This method answers principals' key questions: Is the work of my teachers aligned with district curriculum? Are my teachers using research-based "best practices"? Are they choosing the instructional strategies that will promote student achievement?

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Culturally responsive pedagogy, literacy, and English learner education expert Socorro Herrera has updated this bestseller to clarify, focus, and redefine concepts for the continued professional development of educators serving culturally and linguistically diverse (CLD) populations. Teaching strategies and tools have been updated to reflect important new brain research and to keep pace with our nation's ever-changing demographics and constant shift in expectations for K-12 students. Herrera has also revised the structure and format of the book to help educators find information quickly while working in highly complex and demanding environments. New for the Second Edition: Teaching strategies and tools based on the most current knowledge in the field. Authentic classroom artifacts that have been collected from teachers across the country. Glossary of key terms providing an auxiliary resource for current readers and for future applications of content in professional practice. Reorganized features with new icons providing a more user-friendly text for practitioner and classroom use. Updated excerpts from grade-level classroom teachers clarifying practice with CLD students and families. Additional planning and instructional aids available for free at www.tcpres.com. Grounded in the latest theory and with more user-friendly features, the Second Edition of Biography-Driven Culturally Responsive Teaching will help educators to reflect on their assumptions and perspectives, integrate best practices, and accelerate CLD students' academic learning. "Socorro Herrera does a masterful job of mediating multicultural education theory and practice, specifically for culturally and linguistically diverse students, in Biography-Driven

Culturally Responsive Teaching.” —From the Foreword by Geneva Gay, University of Washington, Seattle

An award-winning play about the relationship between brothers. Nothing but the Truth is the story of two brothers, of sibling rivalry, of exile, of memory and reconciliation, and the ambiguities of freedom. The play was John Kani's debut as sole playwright and was first performed in the Market Theatre in Johannesburg. It won the 2003 Fleur du Cap Award for best actor and best new South African play. In the same year Kani was also awarded a special Obie award for his extraordinary contribution to theatre in the USA.

The sustainable use of natural resources is an important global challenge, and improved metal sustainability is a crucial goal for the 21st century in order to conserve the supply of critical metals and mitigate the environmental and health issues resulting from unrecovered metals. Metal Sustainability: Global Challenges, Consequences and Prospects discusses important topics and challenges associated with sustainability in metal life cycles, from mining ore to beneficiation processes, to product manufacture, to recovery from end-of-life materials, to environmental and health concerns resulting from generated waste. The broad perspective presented highlights the global interdependence of the many stages of metal life cycles. Economic issues are emphasized and relevant environmental, health, political, industrial and societal issues are discussed. The importance of applying green chemistry principles to metal sustainability is emphasized. Topics covered include: • Recycling and sustainable utilization of precious and specialty metals • Formal and informal recycling from electronic and other high-tech wastes • Global management of electronic wastes • Metal reuse and recycling in developing countries • Effects of toxic and other metal releases on the environment and human health • Effect on bacteria of toxic metal release • Selective recovery of platinum group metals and rare earth metals • Metal sustainability from a manufacturing perspective • Economic perspectives on sustainability, mineral development, and metal life cycles • Closing the Loop – Minerals Industry Issues The aim of this book is to improve awareness of the increasingly important role metals play in our high-tech society, the need to conserve our metal supply throughout the metal life cycle, the importance of improved metal recycling, and the effects that unhindered metal loss can have on the environment and on human health. A revised edition of the bestselling activities guide for math teachers Now updated with new math activities for computers and mobile devices—and now organized by the Common Core State Standards—this book includes more than 650 ready-to-use math starter activities that get kids quickly focused and working as soon as they enter the classroom. Ideally suited for any math curriculum, these high-interest problems spark involvement in the day's lesson, help students build skills, and allow teachers to handle daily management tasks without wasting valuable instructional time. A newly updated edition of a bestselling title Ideal for math teachers in grades six through twelve Includes more than 650 ready-to-use starter problems

Study & Master Physical Sciences Grade 12 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Physical Sciences.

"Our Mr. Wrenn: The Romantic Adventures of a Gentle Man" is a 1914 novel by Sinclair Lewis - the first to be published under his real name. Harry Sinclair Lewis (1885 - 1951) was an American novelist, short-story writer and playwright. In 1930 he became the first writer from the United States to receive the Nobel Prize in Literature. "Mr. Wrenn" was an immediate success, with reviewers citing its whimsicality - 'a story of the ordinary, serving as an antidote to modern weariness'. It tells the tale of Mr. Wrenn, an employee of a novelty company, who quits his job after inheriting a fortune from his father. From this point onwards, he decides to go travelling. Many antiquarian texts such as this are increasingly scarce and expensive, and it is with this in mind that we are republishing this volume now in an affordable, high-quality, modern edition. It comes complete with a specially commissioned biography of the author.

Taken together the data presented in this review, and work by many other investigators, support the notion that DNA excision repair is important in a tumor cell's resistance to platinum compounds. Inhibition of this repair system by combination chemotherapy with the excision repair inhibitors HU and Ara-C produces synergistic cell kills and increased levels and persistence of DNA interstrand crosslinks. The studies with cis-DDP and --DDP in combination with UV induced thymine dimers suggest that there may be competition for DNA repair enzymes between the dimer and the platinum lesion. Whether the competing lesion is an intrastrand crosslink, interstrand crosslink, or platinum monoadduct (or all of these lesions) cannot be determined. The similarity between an intrastrand crosslink and a cyclobutane dimer suggests that these lesions may compete for repair. However, the increased peak levels of interstrand crosslinks, and increased persistence of these lesions at later time points suggest that this lesion may also be a substrate for the repair system. These observations may be of clinical relevance. Recently Dr. Kathy Albain of our institution has completed a Phase III I study using a 12 hour pretreatment with HU and Ara-C in patients prior to their cis-DDP therapy. She observed a significant number of responders in this trial (54). She is currently completing a second Phase IIII study substituting IV HU for the oral formulation. We anticipate initiating other clinical trials based upon these observations.

Leading international experts comprehensively review all aspects of platinum anticancer drugs and their current use in treatment, as well as examining their future therapeutic prospects. Writing from a variety of disciplines, these authorities discuss the chemistry of cisplatin in aqueous solution, the molecular interaction of platinum drugs with DNA, and such exciting new areas as DNA mismatch repair and replicative bypass, apoptosis, and the transport of platinum drugs into tumor cells. The emergent platinum drugs of the future-orally active agents, the sterically hindered ZD0473, and the polynuclear charged platinum BBR3464-are also fully considered. Timely and interdisciplinary, Platinum-Based Drugs in Cancer Therapy offers cancer therapeutics specialists an illuminating survey of every aspect of platinum drugs from mechanisms of action to toxicology, tumor resistance, and new analogs.
