This timely and innovative expose by contemporary Jungian psychoanalyst, Ken Kimmel, reveals a culturally and historically embedded narcissism underlying men's endlessly driven romantic projections and erotic fantasies, that has appropriated their understanding of what love is. Men enveloped in narcissism fear their interiority and all relationships with emotional depth that prove too overwhelming and penetrating to bear--so much so that the other must either be colonized or devalued. This wide-ranging work offers them hope for transcendence. Explores: Transcendence of Narcissism in Romance Men-s Capacity to Love Kabbalistic Mysticism Post-modern Philosophy Contemporary Trends in Psychoanalysis

Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from Walking Through Clear Water in a Pool Painted Black and other publications. Also the best of Cookie's art columns from Details magazine, and the funniest of her advice columns from the East Village Eye, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before Bright Lights, Big City, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

This last book in the six-volume series from NEXTmanga combines cutting-edge illustration with fast-paced storytelling to deliver biblical truth to an ever-changing, postmodern culture. More than 10 million books in over 40 different languages have been distributed worldwide in the series.

According to this bestselling author, diabetes is not a disease; in the vast majority of cases, it is a complex mechanism of protection or survival that the body chooses to avoid the possibly fatal consequences of an unhealthy diet and lifestyle. Despite the body's ceaseless self-preservation efforts (which we call diseases), millions of people suffer or die unnecessarily from such consequences. The imbalanced blood sugar level in diabetes is but a symptom of illness, not the illness itself. By developing diabetes, the body is neither doing something wrong nor is it trying to commit suicide. The current diabetes epidemic is man-made, or rather, factory-made, and, therefore, can be halted and reversed through simple but effective changes in diet and lifestyle. Diabetes - No More provides you with essential information on the various causes of diabetes and how anyone can avoid them. To stop the diabetes epidemic we need to create the right circumstances that allows the body to heal. Just as there is a mechanism to become diabetic, there is also a mechanism to reverse it. Find out how!

After World War II, a powerful conviction took hold among American intellectuals and policymakers: that the United States could profoundly accelerate and ultimately direct the development of the decolonizing world, serving as a modernizing force around the globe. By accelerating economic growth, promoting agricultural expansion, and encouraging the rise of enlightened elites, they hoped to link development with security, preventing revolutions and rapidly creating liberal, capitalist states. In The Right Kind of Revolution, Michael E. Latham explores the role of modernization and development in U.S. foreign policy from the early Cold War through the present. The modernization project rarely went as its architects anticipated. Nationalist leaders in postcolonial states such as India, Ghana, and Egypt pursued their own independent visions of development. Attempts to promote technological solutions to development problems also created unintended consequences by increasing inequality, damaging the environment, and supporting coercive social policies. In countries such as Guatemala, South Vietnam, and Iran, U.S. officials and policymakers turned to modernization as a means of counterinsurgency and control, ultimately shoring up dictatorial regimes and exacerbating the very revolutionary dangers they wished to resolve. Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s. Since the end of the Cold War the faith in modernization as a panacea has reemerged. The idea of a global New Deal, however, has been replaced by a neoliberal emphasis on the power of markets to shape developing nations in benevolent ways. U.S. policymakers have continued to insist that history has a clear, universal direction, but events in Iraq and Afghanistan give the lie to modernization's false hopes and appealing promises.

A surprisingly affordable book of excellent color photography, Tang shares 92 of his finest images of the Windy City, from beloved Buckingham Fountain to the United Center, home of the Chicago Bulls. He turns his camera on the famed sites, such as the Magnificent Mile and the Lincoln Park Zoo, as well as gems only locals know, such as historic neighborhoods, architectural details on downtown high-rises, and old watering holes such as the 1881 Schaller's Pump restaurant. Indeed, Chicago Impressions is the perfect memento of a trip to one of America's finest cities. And who better to capture its beauty than a Chicagoan!

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems.

Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Col. James V. Young spent almost twenty years in Asia, including fourteen in Korea. Here, he writes with the expertise of an old Korea hand about a period that saw South Korea develop from an agrarian economy to a modern industrial state. Young volunteered in 1969 for a new program aimed at creating area specialists within the military. In 1975, after four years of training in Korean language and culture, he witnessed how American diplomats convinced Park ChungHee, the South Korean president, not to develop his own nuclear weapons. Later, from the perspective of a military attaché, Young saw the mistrust that characterized U.S.Korean relations during the 1970s. He provides new insights into the behindthescenes efforts to derail President Jimmy Carter's troop withdrawal policies and argues that the United States was caught flatfooted by such crucial episodes as the coup of 1979 and the 12/12 Incident. Young's memoir straddles the line between military and diplomatic history and offers entertaining and often humorous stories. Those interested in the region, the issues, and military life off the battlefield will value this book.

CAFO : The Tragedy of Industrial Animal Factories provides an unprecedented view of concentrated animal feeding operations, where increasing amounts of the world's meat, milk, eggs, and seafood are produced. As the photos and essays in this powerful book demonstrate, the rise of the CAFO industry around the world has become one of the most pressing issues of our time. Industrial livestock production is now a leading source of climate-changing emissions, a source of both freshwater and ocean pollution, and a significant contributor to diet-related diseases such as obesity and the spread of food-borne illnesses. The intensive concentration of animals in such cramped and filthy conditions dependent on antibiotic medicines and steady streams of subsidized industrial feeds poses serious moral and ethical concerns for all of us.
