Microsoft Office 2003 is the sixth version of Microsoft's best-selling Office suite. As such, most of the audience is comprised of people who have used previous versions of Office and are quite familiar with most of the features. Upgraders do not need a 800-page book that covers every aspect of every Office application. They need a book that's focused only on what's new, so that they can move forward with a minimum of fuss. That's what this book is all about.

'The Hitchhiker's Guide to Going Wireless' quickly established itself as the essential guide to mobile technology in South Africa. Going Mobile starts where Wireless left off and shows how the vision for the future is becoming a reality today. Wireless talked about the future high-speed wireless technology called WiMax, and already WiMax services are being offered commercially. The future is rushing up on us so fast that the time for a new edition of the Hitchhiker's Guide is now. As in Wireless, we ask the critical questions: What does it all mean? Where is it all going? How do ordinary people tap into this communication revolution? Here is a guide that once again catches the wave of interest and activity, that taps into the buzz, and also sets the mobile agenda for ordinary people and businesses throughout South Africa.

This is an essential guide for doctors wishing to maximise the potential of their PDA or smartphones and is the only book available to address the specific needs of doctors in relation to PDAs and smartphones. Handheld computers, or PDAs, are computers small enough to hold in your hand or fit into your pocket. Smartphones are PDAs which also allow the user to make and receive phone calls. For doctors, PDAs are possibly the most clinically appropriate of all the computer devices created. The Doctor's PDA and Smartphone Handbook aims to introduce readers to the basics of PDAs. Comprehensive in its approach and easily accessible to those with no technical knowledge, the first few chapters demonstrate how the devices are used and how effective they can be in day-to-day clinical care and in training activities.

Communication and sharing data and clinical information is enhanced if the full team is equipped with PDAs, and later chapters discuss more

advanced uses and issues that should be considered if planning to equip the whole team. The text is accompanied by invaluable teaching videos and vignettes illustrating how teaching points covered in each chapter can be applied to realistic scenarios. Written by one of the world's leading experts on the clinical uses of mobile computing, Dr Mohammad Al-Ubaydli is now a researcher in the USA. The online videos are by Dr Chris Paton, Director of New Media New Medicine and creator of some of the world's leading websites for clinical education. Together, they have combined their expertise and have created a highly informative and effective text.

The purpose of this book is straightforward - I want to help you articulate your reasonable suspicion ("RS") and probable cause ("PC") in your reports. Why? Because that's the main way to win cases and avoid suppression hearings altogether. Articulate, articulate, articulate! In my experience, most cops lose their cases because they failed to articulate their RS and PC. This is true even if the officer actually had RS or PC. In other words, when I speak to cops that lost a criminal case, or were successfully sued, they often had enough facts and circumstances to WIN their cases. But they lost because they either did not articulate it properly or were not able to translate what they saw or heard on-scene into RS or PC. You see what I mean? Articulation is key! This book will help you articulate things that are often hidden "in plain sight."

The suspect is telegraphing his guilt, you just need to be able to articulate it. That's where this book comes in. Use this resource often and be prepared to proactively catch and help convict people who want nothing more than to victimize the most vulnerable. Until next time, stay safe.
