From bestselling author James Raffan comes an enlightening and original story about a polar bear's precarious existence in the changing Arctic, reminiscent of John Vaillant's *The Golden Spruce*. Nanurjuk, "the bear-spirited one," is hunting for seals on Hudson Bay, where ice never lasts more than one season. For her and her young, everything is in flux. From the top of the world, Hudson Bay looks like an enormous paw print on the torso of the continent, and through a vast network of lakes and rivers, this bay connects to oceans across the globe. Here, at the heart of everything, walks Nanurjuk, or Nanu, one polar bear among the six thousand that traverse the 1.23 million square kilometers of ice and snow covering the bay. For millennia, Nanu's ancestors have roamed this great expanse, living, evolving, and surviving alongside human beings in one of the most challenging and unforgiving habitats on earth. But that world is changing. In the Arctic's lands and waters, oil has been extracted—and spilled. As global temperatures have risen, the sea ice that Nanu and her young need to hunt seal and fish has melted, forcing them to wait on land where the delicate balance between them and their two-legged neighbors has now shifted. This is the icescape that author and geographer James Raffan invites us to inhabit in *Ice Walker*. In precise and provocative prose, he brings readers inside Nanu's world as she treks uncertainly around the heart of Hudson Bay, searching for nourishment for the children that grow inside her. She stops at nothing to protect her cubs from the dangers she can see—other bears, wolves, whales, human beings—and those she cannot. By focusing his lens on this bear family, Raffan closes the gap between humans and bears, showing us how, like the water of the Hudson Bay, our existence—and our future—is tied to Nanu's. He asks us to consider what might be done about this fragile world before it is gone for good. Masterful, vivid, and haunting, *Ice Walker* is an utterly unique piece of creative nonfiction and a deeply affecting call to action.

A little girl invites her plush polar bear to dream of all of the places where sleeping bears go, from the high seas to a starry desert and back home.

Imagine living in such a cold, desolate but beautiful place as the Arctic. Polar Bear shivers and quivers from the cold wind that blows and snowflakes that melt as they touch his warm nose.... What strange creatures Polar Bear sees around him - whales that dive deep into the ocean, penguins that waddle and slip and slide on the ice but can swim like a graceful ballerina under water, brightly coloured puffins who can fly and swim under water, the narwhal with its long pointed tusk..... There is a lot to learn for a polar bear cub and he needs to listen to mother and do what she says so that he stays happy and safe for the rest of his days.

A Pop Up writer and contributor to several prestigious magazines tracks the dynamic relevance of America's animals throughout history to illuminate the current world's extinction threats, tracing his tour of environmental regions with his young daughter to trace the conservation efforts of such species as the polar bear and the whooping crane.

Scientists agree that by the end of this century the polar bear will be the first mammal threatened with extinction due to climate change. "The Last Polar Bear" is the first book to fully document that story. The continued survival of these magnificent white bears in their warming, and melting, Arctic world is uncertain, yet their fate is also a wake-up call compelling us to act now to stem global warming. Through Steven Kazlowski's unparalleled imagery, the most critical environmental issue of our time is brought to life. "The Last Polar Bear" places the reality of climate change in our hands. We see the plight of the polar bear, an animal already feeling the detrimental effects of our reliance on fossil fuels, as its icy habitat melts. Over the course of the last six years, wildlife photographer Steven Kazlowski has photographed the polar bear in its wild habitat, from Hershel Island in Canada to Point Hope in Alaska. "The Last Polar Bear" pairs his intimate images with anecdotes about his Arctic adventures, as well as authoritative essays about the polar bear in the context of climate change. Alaska based writers Richard Nelson, Charles Wohlforth, Nick Jans, and leading USGS polar bear biologist Steven C. Amstrup draw on decades of experience in the Arctic to cover the biological, cultural, and anthropological aspects of climate change. Dan Glick, long-time correspondent for "Newsweek", addresses the history of climate change while Frances Beinecke, president of the Natural Resources Defence Council, and Theodore Roosevelt IV offer perspectives on activism and politics.

Huge, magnificent, alone, the bear moves through the frozen Arctic. Powerful hunter, tender mother, gentle playmate - it shares this land of ice and snow with the Inuit people, who watch and learn from it. Come witness the majesty of Ice Bear.
