Chessboard provide a rich reservoir of methods that can be applied either individually or combined. And because many of these methods are not customarily used by procurement, the Purchasing Chessboard is also the perfect tool for helping buyers to think and act outside the box and find new solutions. A well-proven concept that works across all industries and all categories in any given situation, it is little wonder that business leaders and procurement professionals alike are excited by, and enjoy strategizing around, the Purchasing Chessboard. This second edition of The Purchasing Chessboard addresses the new realities of a highly volatile economic environment and describes the many—sometimes surprising—ways in which the Purchasing Chessboard is being used in today's business world. Yet despite all of the great achievements of procurement executives and their teams, they do not always receive the recognition they deserve. In response, the authors have developed and outlined within the book an unequivocal approach to measure procurement's impact on a company's performance—Return on Supply Management Assets (ROSMA®).

important role in a guaranteed and timely production of goods and services and is of utmost importance in successful completion of time-bound projects. These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. covers best practices unique to the IT field. It is designed for use in graduate, advanced undergraduate, and professional IT project management courses to prepare students for success in the IT field, and to prepare them to pass the Project Management Professional (PMP) certification exam given by the Project Management Institute (PMI), the world's leading certification in the field of project management. Mini-case studies encourage deep retention, prompt rich in-class discussion, and challenge more advanced students and professionals alike. Unique skills covered can be put directly into practice. An appendix presents practice study questions and advice on preparing for and passing the PMP exam. The revised third edition includes expanded coverage of agile system development methodologies, leadership and negotiation skills, and process maturity models.

This handbook is a tool to help government officials assess whether contracting out might be a possible way forward – either temporarily or over a longer period of time – for delivering a core service or a government function.

The Asian Development Bank, along with the people and institutions of Asia and the Pacific and the rest of the world, believes in the strength of partnerships and collective action. At the core of this belief is a desire to initiate and develop partnerships that will help governments address health care needs of growing populations, particularly women and children. Public–private partnerships (PPPs) have evolved from this need to relate to one another and work together. Governments recognize that they cannot do the job alone, particularly in the health sector where new disease patterns and the impact of climate change demand innovative solutions, such as PPP in health programs and enterprises. This guidebook offers readers a guide for the development of a PPP in pharmacy services through six simple, customizable steps. It looks at pharmacy services as an important component of a well-rounded health care and hospital systems. Through sustainable PPP in pharmacy services, people will have access to safe, effective, and affordable medicines.
