Barbara Allan has fully revised and updated her classic 2004 title, *Project Management*, to incorporate considerable developments during the past decade, including: the development and wide-scale acceptance of formal project management methodologies; the use of social media to communicate and disseminate information about projects and the large shift in the types of project library and information workers may be involved in. The text is supported by practical case studies drawn from a wide range of LIS organizations at local, regional, national and international levels. These examples provide an insight into good practice for the practitioner, from an individual working in a voluntary organization on an extremely limited budget, to someone involved in an international project. Content covered includes: an introduction to project management, project workers and the library and information profession; different approaches to project management, the project cycle, the people side of projects and management of change; discussion of project methodologies, project management software, open source software, collaborative working software and use of social media; project initiation, communication, analysis and project briefs; developing project infra-structure, scheduling, working out the finances and carrying out a detailed risk analysis; working in partnerships, in diverse and virtual teams, and managing change. Why put yourself through all the trouble of figuring out a project management software program? And why find out about project management techniques when you've been muddling through on your own up until now? The answer is self-evident. Because you've managed projects before and you know there has to be a better way. You're ready to discover what all this project management hoopla is about, and you'd like to use Microsoft Project to do the job. You've just made two good management decisions right there. Deep down, you're probably wondering whether this is going to hurt. You'll be relieved to know that getting to know Microsoft Project is straightforward and kind of fun. You don't have to know anything special about computers or project management to begin. Of course, once you start throwing those Gantt charts around the office, people might assume that it took grueling labor and a steel will to figure out the program. Whether you choose to display modesty or bask in their amazement will be entirely up to you. As this book's title so subtly implies, it will show you how to use Microsoft Project 2000. But what the title doesn't say is that this book also gives you a basic explanation of project management. You'll cover all of the following topics, and more: Identifying project phases Getting comfortable with the Microsoft Project interface Predicting your resource needs Reading and creating Gantt charts Staying ahead of details with a calendar Setting budgets and reviewing costs Subdividing and combining projects Tracking your project Using and customizing reports Microsoft Project 2000 For Dummies is written in a way that lets you master your project management skills by practice. Peel the Banana (with included music CDsee below) is arranged as a sequence of dances and singing games from many traditions that Paul Rosenberg has found to be popular during his years of leading school residencies, family dances and community

celebrations. The book provides detailed instructions for each of the dances on the CD, as well as written music (with chords) for all of the tunes. It presents suggested age group (a number of the dances can be taught to children as young as three), formation and notes on each dance which might include background information, teaching tips or variations to make the dance accessible to less experienced or younger dancers. Also included are simple instructions on how to teach the waltz, a list of enrichment activities for the classroom (including a reading list for schoolchildren) and a glossary describing all the dance movements and terms used in the book. For the CD, George Wilson (fiddle, banjo, bass, guitar, percussive feet), Peter Davis (clarinet, guitar, piano, mandolin, pennywhistle) and Paul Rosenberg (recorder) provide wonderful dance-length music for the 20 dances. The collection includes American dances such as the singing square *Marching Through Georgia* and the *Virginia Reel*. Other countries represented through their dances are Russia (*Sasha*), Israel (*Zemer Atik*), Germany (*Kinderpolka*) and Denmark (*Seven Jumps*). There are also dances from Ireland, Belgium, Quebec, England, plus two African-American singing games. For most tracks Paul calls the dance the first two times through. Children are also included singing on several of the cuts.

Begins with an introduction to Project Management concepts, then guides the reader to put these in practice.
