

## Project Handover Guidelines Utas

This title provides a practical guide to benefit realization for all those who are responsible for change - Directors, Senior Responsible Owners (SROs), Programme Managers, Change Managers, Project Managers, Benefit Facilitators, P3O, PMO and PSO Managers. It shows how the author's proven approach to Benefits Realization Management (BRM) can be applied to programmes running under Managing Successful Programmes (MSP)

This book will provide anyone with an interest in the clinic with a basic guide on those things that are not taught during medical school or any other pre-clinical trainings. The line-up of authors was carefully assembled to include experts in all respective fields to give this volume the authority it requires to be a relevant text for many.

Researchers identify the effects of Focus Area Review Group II headquarters design and its new unit type--the Main Command Post-Operational Detachment--on division headquarters readiness.

Bulldog and Musquito, Aboriginal warriors from the Hawkesbury, were captured and sent to Norfolk Island following frontier skirmishes in New South Wales. Eventually, Bulldog seems to have made it home. Musquito was transported to Van Diemen's Land, where he laboured as a convict servant. He never returned. Hohepa Te Umuroa was arrested near Wellington in 1846, with a group of Maori warriors. Five of the men were transported to Van Diemen's Land where Te Umuroa died in custody. More than 140 years later, his remains were carried home to New Zealand. Booy Piet, a twenty-six year-old Khoisan soldier from the Cape Colony, was transported to Van Diemen's Land for desertion in 1842. After three years of convict labour, he died in Hobart General Hospital. These men are among 130 aboriginal convicts who were transported to and within the Australian penal colonies. They lived, laboured, were punished, and died alongside other convicts, but until this groundbreaking book, their stories had largely been forgotten.

A reference to clinical diving medicine. Written for doctors and paramedics who are responsible for the medical needs of divers both on or under the water, this new edition retains the strengths of its predecessors, with the emphasis still firmly on practical management. It features an improved section on the diving medical examination, changes to chapters on mortality statistics and drowning, new sections on habitat diving, breath-hold diving and technical diving, and many new illustrations.

Reflecting the challenges and opportunities of achieving improvement in healthcare systems, the contributions of this innovative new text lend depth and nuance to an increasing area of academic debate. Encompassing context, processes and agency, *Managing Improvements in Healthcare* addresses the task of attaining, embedding and sustaining improvement in the industry. The book begins by offering insight into the different valued aspects of quality, providing specific examples of national and organizational interventions in pursuit of improvement. The second part focuses on strategies for embedding good practice and ensuring the spread of high quality through knowledge mobilization, and the final part draws attention to the different groups of change agents involved in delivering, co-creating and benefitting from quality improvement. This inventive text will be insightful to those researchers interested in healthcare and organization, looking to transform theory into policy and practice.

Healthcare information technologies are now routinely deployed in a variety of healthcare contexts. These contexts differ widely, but the smooth integration of IT systems is crucial, so the design, implementation, and evaluation of safe, effective, efficient and easy to adopt health informatics involves careful consideration of both human and organizational factors. This book presents the proceedings of the Context Sensitive Health Informatics (CSHI) conference, held in Copenhagen, Denmark, in August 2013. The theme of this year's conference is human and sociotechnical approaches. The Human Factors approach is distinctly design-driven and aims to optimize performance, safety and users' sense of well-being associated with their use of a system through the application of user-centered systems design and evaluation. The papers and presentations included here are grouped under the topics: patients and IT; usability test and evaluation; work tasks and related contexts; human factors and simulation; and context and systems design, and outline theories and models for studying contextual issues and insights related to how health information technologies can be better designed to accommodate different healthcare contexts. Healthcare organizations, health policy makers and regulatory bodies globally are starting to acknowledge this essential role of human and organizational factors for safe and effective health information technology. This book will be of interest to all those involved in improving the quality of healthcare worldwide.

This book arises from a research project funded in Australia by the Criminology Research Council. The topic, bail reform, has attracted attention from criminologists and law reformers over many years. In the USA, a reform movement has argued that risk analysis and pre-trial services should replace the bail bond system (the state of California may introduce this system in 2020). In the United Kingdom, Europe and Australia, there have been concerns about tough bail laws that have contributed to a rise in imprisonment rates. The approach in this book is distinctive. The inter-disciplinary authors include criminologists, an academic lawyer and a forensic psychologist together with qualitative researchers with backgrounds in sociology and anthropology. The book advances a policy argument through presenting descriptive statistics, interviews with practitioners and detailed accounts of bail applications and their outcomes. There is discussion of methodological issues throughout the book, including the challenges of obtaining data from the courts.

Protected Area Governance and Management presents a compendium of original text, case studies and examples from across the world, by drawing on the literature, and on the knowledge and experience of those involved in protected areas. The book synthesises current knowledge and cutting-edge thinking from the diverse branches of practice and learning relevant to protected area governance and management. It is intended as an investment in the skills and competencies of people and consequently, the effective governance and management of protected areas for which they are responsible, now and into the future. The global success of the protected area concept lies in its shared vision to protect natural and cultural heritage for the long term, and organisations such as International Union for the Conservation of Nature are a unifying force in this regard. Nonetheless, protected areas are a socio-political phenomenon and the ways that nations understand, govern and manage them is always open to contest and debate. The book aims to enlighten, educate and above all to challenge readers to think deeply about protected areas—their future and their past, as well as their present. The book has been compiled by 169 authors and deals with all aspects of protected area governance and management. It provides information to support capacity development training of protected area field officers, managers in charge and executive level managers.

Talks about the ubiquitous computing that helps us to identify ways of managing care that promises to be considerably easier in letting patients maintain their good health while enjoying their life in their usual social setting, rather than having to spend much time at costly, dedicated healthcare facilities.

Different White People presents a trilogy of remarkable stories about campaigns for Aboriginal rights. But the most curious thing about this book is that the central characters in this book are not Aborigines. Some of the 'different white people' you will meet in these pages are well known Australians, but many are not. But they all had one crucial common characteristic: a singleminded determination to support and protect the rights of Aboriginal people. This book is a journey through three remote regions of Australia. It begins in 1946, as Aboriginal pastoral workers walk away from oppressive conditions to make their famous stand in the Pilbara, in Western Australia. The second, lesser known story unfolds in Central Australia, when Britain and Australia collaborate to conduct their missile and nuclear weapons programs in Aboriginal country. And, the final section of this book features a landmark action in the Northern Territory: Aboriginal workers and their families walked away from white bosses in the now-famous 'Gurindji walk-off' in 1966. And amidst these fascinating episodes in Australia's history was an eclectic group of people working tirelessly to protect and support Aboriginal people and Aboriginal rights. They were The Different White People.

The Tuareg insurgency in Mali has its roots in the colonial period. However, the insurgency worsened when Mali became independent in 1960. This insurgency was characterized by four main periods. The first rebellion came in 1963, the second rebellion in 1990, the third rebellion came in 1996, and the last one was in 2012, where the Tuaregs again attacked the Malian troops. This thesis argues that developmental policies and military engagement in the northern region were the most significant factors that contributed to the recurrence of the Tuareg insurgency in Mali. However, there are other minor factors, such as the economic difficulties, the emergence of drug trafficking, the weak governance, the decentralization, social collapse, and regional dynamics, that also contributed to the resurgence of the conflict. This thesis stresses that domestic management of the crisis played a more significant role than the external factors. It is crucial for the Mali government to establish secure borders and a secure internal environment in the northern region before instituting any developmental policies. For this reason, the Malian state needs a strong army to prevent malicious actors from entering the region and obstructing the objective of peace. Also, it needs to always pursue and sign realistic agreements.

Context Sensitive Health Informatics: Human and Sociotechnical ApproachesIOS Press

When someone enters hospital for examination or treatment, is given a doctors prescription, receives medication from a pharmacist or has his drugs administered by a nurse, he assumes that his health and welfare will benefit from this medical intervention. But the effectiveness of available therapies should also be viewed from the perspective of potentially negative consequences: adverse drug events (ADE).

High speed catamaran and multihull high speed marine vessel have become very popular in the last two decades. The catamaran has become the vessel of choice for the majority of high speed ferry operators worldwide. There have been significant advances in structural materials, and structural design has been combined with higher power density and fuel efficient engines to deliver ferries of increasing size. The multihull has proven itself to be a suitable configuration for active power projection across oceans as well as for coastal patrol and protection, operating at high speedd for insertion or retrieval with a low energy capability. At present there is no easily accessible material covering the

combination of hydrodynamics, aerodynamics, and design issues including structures, powering and propulsion for these vehicles. Coverage in High Speed Catamarans and Multihulls includes an introduction to the history, evolution, and development of catamarans, followed by a theoretical calculation of wave resistance in shallow and deep water, as well as the drag components of the multihull. A discussion of vessel concept design describing design characteristics, empirical regression for determination of principal dimensions in preliminary design, general arrangement, and methods is also included. The book concludes with a discussion of experimental future vehicles currently in development including the small waterplane twin hull vessels, wave piercing catamarans, planing catamarans, tunnel planing catamarans and other multihull vessels.

An Australian text designed to address the key area of clinical reasoning in nursing practice. Using a series of authentic scenarios, Clinical Reasoning guides students through the clinical reasoning process while challenging them to think critically about the nursing care they provide. With scenarios adapted from real clinical situations that occurred in healthcare and community settings, this edition continues to address the core principles for the provision of quality care and the prevention of adverse patient outcomes.

"In the edited collection, Time Out: National Perspectives on Sport and the Covid-19 Lockdown, practitioners and international scholars explore the impact of the global Covid-19 health pandemic on sport from various local and national perspectives. It is part of a two-volume Covid-19 and Sport series that tackles the effects of the global lockdown on sport during March and April 2020, when restrictions were at their most severe and the human toll at its peak in many countries. The twenty-two chapters provide a comprehensive overview on the immediate consequences of the Covid-19 lockdown on local and national sport from a variety of perspectives"--

This volume presents the papers from the 3rd International Conference on Technology in Health Care: Socio-technical Approaches held in Sydney, Australia in 2007.

Systemic Functional Linguistics is a functional model of language inspired by the work of Saussure, Hjelmslev, Whorf, and Firth. SFL was developed by Michael Halliday and his colleagues in the 1960s and has grown into a widely studied and research field, with growing interest in China, Latin America, and North America. This new five-volume collection from Routledge focuses on the foundational papers underlying SFL theory and practice and illustrative papers that have inspired succeeding work.

Disarmament, Demobilization, and Reintegration (DDR) and Security Sector Reform (SSR) have emerged in recent years as promising though generally poorly understood mechanisms for consolidating stability and reasserting state sovereignty after conflict. Despite the considerable experience acquired by the international community, the critical interrelationship between DDR and SSR and

the ability to use these mechanisms with consistent success remain less than optimally developed. The chapters in this book reflect a diversity of field experience and research in DDR and SSR, which suggest that these are complex and interrelated systems, with underlying political attributes. Successful application of DDR and SSR requires the setting aside of preconceived assumptions or formulas, and should be viewed flexibly to restore to the state the monopoly of force.

A collection of anthologies, resource and reference books, including titles from Oscar Wilde, Mary Shelley, Alex Madina, Jo Phillips and Adrian Barlow. In defiance of authorities in London and Sydney, Tasmanian speculators began sending men and sheep across Bass Strait - and changed the shape of Australian history. In 1835 James Boyce brings this pivotal moment to life. He traces the power plays in Hobart, Sydney and London and the key personalities of Melbourne's early days.

Of the 28 submitted papers presented here, seven deal with patient safety, eight address various topics of system design, six cover the subject of implementation and four explore patient involvement. The remaining three papers cover the theme of the conference in a broader perspective. --

Unmanned aerial vehicles (UAV) have already become an affordable and cost-efficient tool to quickly map a targeted area for many emerging applications in the arena of ecological monitoring and biodiversity conservation. Managers, owners, companies, and scientists are using professional drones equipped with high-resolution visible, multispectral, or thermal cameras to assess the state of ecosystems, the effect of disturbances, or the dynamics and changes within biological communities inter alia. We are now at a tipping point on the use of drones for these type of applications over natural areas. UAV missions are increasing but most of them are testing applicability. It is time now to move to frequent revisiting missions, aiding in the retrieval of important biophysical parameters in ecosystems or mapping species distributions. This Special Issue shows UAV applications contributing to a better understanding of biodiversity and ecosystem status, threats, changes, and trends. It documents the enhancement of knowledge in ecological integrity parameters mapping, long-term ecological monitoring based on drones, mapping of alien species spread and distribution, upscaling ecological variables from drone to satellite images: methods and approaches, rapid risk and disturbance assessment using drones, mapping albedo with UAVs, wildlife tracking, bird colony and chimpanzee nest mapping, habitat mapping and monitoring, and a review on drones for conservation in protected areas.

Nursing and Midwifery Research is an essential guide in assisting students and practitioners develop sound research skills to enhance their knowledge and practice. Written by Dean Whitehead and Caleb Ferguson, the 6th ANZ edition includes the most recent updates and developments in Australian and New Zealand nursing and midwifery practice, with a focus on evidence-based practice,

along with a range of contemporary research articles and pedagogy to support specific chapter content. Using clear language and examples, the 6th edition of *Nursing and Midwifery Research* provides a valuable resource to assist healthcare students and practitioners in developing strong skills in research literacy and critical appraisal, as well as the confidence to successfully conduct research and apply outcomes to practice. A focus on digital communication - includes overviews and tips on navigating professional and personal electronic media Individual and group activities throughout to encourage skill development, reflection and awareness of self and others An extensive suite of scenarios - practise and apply your communication skills using realistic situations and individuals that healthcare professionals encounter in clinical practice Additional resources on Evolve eBook on VitalSource Instructor resources: Answer guides to Tutorial Triggers PowerPoint presentations Student and Instructor resources: Answer guides to *An Unexpected Hurdle* Answers to Learning Activities Research Articles and Questions Answer guides to *Time to Reflect* Glossary New co-editor, Caleb Ferguson, from Western Sydney University Fully updated Chapter 15 'Indigenous Peoples and Research' offers leading cultural insights into Indigenous approaches to research Fully updated Chapter 20 'A Research Project Journey: from Conception to Completion' fully details the process of a mixed methods project, from beginning to dissemination, that explores the topical issue of patients and carers living with bladder cancer Updated chapters throughout reflect current nursing and midwifery perspectives to provide you with the latest data and most recent examples of evidence-based practice A stronger focus on the role of social media and bibliometrics in conducting and disseminating research outcomes ensures latest best practice guidelines Real-world examples of the research process prepare you for common experiences you can expect during your own research journey and the processes that you are likely to encounter An eBook included in all print purchases

Endorsed by the College of Emergency Nursing Australasia CENA is the peak professional association representing emergency nurses and has endorsed this text in recognition of the relevance it has to emergency nursing across Australasia. Led by an expanded editorial team of internationally recognised clinicians, researchers and leaders in emergency care, the 3rd edition of *Emergency and Trauma Care for Nurses and Paramedics* continues to be the foremost resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary emergency care. The text provides nursing and paramedicine students and clinicians with the opportunity to understand the best available evidence behind the treatment that is provided throughout the emergency care trajectory. This unique approach ultimately seeks to strengthen multidisciplinary care and equip readers with the knowledge and skills to provide safe, quality, emergency care. The 3rd edition builds on the strengths of previous editions and follows a patient journey and body systems approach, spanning the pre-hospital and hospital environments.

Additional resources on evolve eBook on VitalSource Instructor resources: PowerPoint slides Test bank Paramedic test bank Case study questions and answers Image collection Additional case studies with answers and rationales Additional paramedic case studies with answers and rationales Student and Instructor resources: Additional case studies Additional paramedic case studies Videos Expanded editorial team, all internationally recognised researchers and leaders in Emergency Care Chapter 6 Patient safety and quality care in emergency All chapters revised to reflect the most up-to-date evidence-based research and practice Case studies and practice tips highlight cultural considerations and communication issues Aligns to NSQHSS 2e, NMBA and PBA Standards An eBook included in all print purchases

Facing threats ranging from Islamist insurgencies to the Ebola pandemic, African regional actors are playing an increasingly vital role in safeguarding peace and stability across the continent. But while the African Union has demonstrated its ability to deploy forces on short notice and in difficult circumstances, the challenges posed by increasingly complex conflict zones have revealed a widening divide between the theory and practice of peacekeeping. With the AU's African Standby Force becoming fully operational in 2016, this timely and much-needed work argues that responding to these challenges will require a new and distinctively African model of peacekeeping, as well as a radical revision of the current African security framework. The first book to provide a comprehensive overview and analysis of African peace operations, *The Future of African Peace Operations* gives a long overdue assessment of the ways in which peacekeeping on the continent has evolved over the past decade. It will be a vital resource for policy makers, researchers and all those seeking solutions and insights into the immense security challenges which Africa is facing today.

This first-of-its-kind volume assembles current research on psychosocial issues and behavioral and safety concerns inherent in life and careers at sea. Focusing mainly on the commercial maritime transport sector, it sets out the basic concepts of maritime psychology in the contexts of health and occupational psychology and illustrates more expansive applications across nautical domains. A systems perspective and detailed case studies spotlight unique challenges to mariners' work performance, personal and environmental health and safety; it also provides support for psychometric assessment of seafarers, and describes emerging uses for the healing properties of the sea and sailing. The book is a springboard for continued research and practice development, further interaction between psychology and the maritime world, and the continued broadening and deepening of the field. Among the topics covered: · Positive psychology and wellbeing at sea. · Transferring learning across safety critical industries. · Occupational stress in seafarers. · The psychology of ship architecture and design. · Motion sickness susceptibility and management at sea. · Risk communication during a maritime disaster. Written with clarity and nuance reflecting the vastness of marine experience, *Maritime Psychology* will be of

interest to lecturers, researchers, and students of occupational and health psychology and maritime science, and to social and health scientists and practitioners in these and related fields.

Endorsed by the College of Emergency Nursing Australasia CENA is the peak professional association representing emergency nurses and has endorsed this text in recognition of the relevance it has to emergency nursing across Australasia. Led by an expanded editorial team of internationally recognised clinicians, researchers and leaders in emergency care, the 3rd edition of *Emergency and Trauma Care for Nurses and Paramedics* continues to be the foremost resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary emergency care. The text provides nursing and paramedicine students and clinicians with the opportunity to understand the best available evidence behind the treatment that is provided throughout the emergency care trajectory. This unique approach ultimately seeks to strengthen multidisciplinary care and equip readers with the knowledge and skills to provide safe, quality, emergency care. The 3rd edition builds on the strengths of previous editions and follows a patient journey and body systems approach, spanning the pre-hospital and hospital environments. Expanded editorial team, all internationally recognised researchers and leaders in Emergency Care Chapter 6 Patient safety and quality care in emergency All chapters revised to reflect the most up-to-date evidence-based research and practice Case studies and practice tips highlight cultural considerations and communication issues Aligns to NSQHSS 2e, NMBA and PBA Standards An eBook included in all print purchases

*Skills in Clinical Nursing, Seventh Edition* brings together the 166 most important skills performed by nurses, including all common variations, organized from the simplest to the most complex. This edition has been revised, restructured, and updated to reflect current practice, responding to extensive feedback from clinical nurses, market surveys, and the authors' own teaching and practice experience. Each chapter contains concise introductory material, placing skills in the context of anatomy, physiology, and pathophysiology, and clearly explaining their purpose and rationale. Each skill is then presented in exceptional step-by-step detail, with 800+ illustrations. Skills coverage is complemented by critical-thinking insights on using assessment data, and essential guidance on appropriate delegation to unlicensed assistive personnel (UAP).

*What is Next in Educational Research?* enables the reader to peek into research at the forefront of a diverse range of education fields as it is being conducted by beginning researchers. The book illustrates the extensive range of research being undertaken in education through a broad range of issues, topics and methodologies that will underpin and provoke research well into the future. The five sections address a range of topics, including: issues in design and methodology, social integration, language education, leadership, and issues in contemporary education. Each chapter makes a valuable contribution to existing educational research, and is a testament to the potential of these researchers to lead innovative educational research projects. Both higher degree by research students and their supervisors will find this book particularly useful and interesting as it provides examples of quality research higher degree writing, illustrates a variety of contemporary methodologies, and supports the early publication of student work.

Every day, small arms and light weapons (SALW) kill and maim, wound and threaten millions of adults and children, whether combatants and civilians in war zones or gangs and communities in degraded "peacetime" environments that are characterized by large-scale violence. Due to their widespread availability, mobility and ease of use prolific SALW have become central to maintaining social dislocation, destabilization, insecurity and crime in the build-up to war, in wartime and in the aftermath of violent conflict. Small arms are misused

within domestic settings, as well as in public spaces, and they affect everyone in the community without regard to sex or age. Although the impacts of these weapons can be vastly different for women and men, girls and boys, a careful consideration of gender and age is rare in the formulation of small arms policy, of planning small arms collection or control, or even in small arms research. To counter the effects of prolific SALW, their role in reinforcing and maintaining gender- and age-specific violence must be more deeply analyzed and the results applied at the policy and operational level. This work should be undertaken in war-afflicted contexts, in societies suffering from elevated levels of social violence and/or severe underdevelopment, and in those tolerant of the presence of individually owned firearms. Contributors to this book draw on experience and research from around the world on the nexus of gender, age, violence and small arms in developing and developed countries. Their findings feed into a number of recommendations for future policy formulation, program implementation and research designed to further illuminate and counteract the firing of the "sexed pistol".--Publisher's description.

Cassandra Pybus adds greatly to the work of [previous] scholars by insisting that slaves stand at the center of their own history . . . Her 'biographies' of flight expose the dangers that escape entailed and the courage it took to risk all for freedom. Only by measuring those dangers can the exhilaration of success be comprehended and the unspeakable misery of failure be appreciated.--Ira Berlin, from the Foreword

During the American Revolution, thousands of slaves fled their masters to find freedom with the British. *Epic Journeys of Freedom* is the astounding story of these runaways and the lives they made on four continents. Having emancipated themselves, with the rhetoric about the inalienable rights of free men ringing in their ears, these men and women struggled tenaciously to make liberty a reality in their own lives. This alternative narrative of freedom fought for and won is uniquely compelling; historian Cassandra Pybus's groundbreaking research has uncovered individual stories of runaways who left America to forge difficult new lives in far-flung corners of the British Empire. Harry, for example, one of George Washington's slaves, escaped from Mount Vernon in 1776, was evacuated to Nova Scotia in 1783, and eventually relocated to Sierra Leone in West Africa with his wife and three children. Ralph Henry, who ran away from the Virginia firebrand Patrick Henry in 1776, took a similar path to precarious freedom in Sierra Leone, while others, such as John Moseley and John Randall, were evacuated with the British forces to England. Stranded in England without skills or patronage during a period of high unemployment, they were among thousands of newly freed poor blacks who struggled just to survive. While some were relocated to Sierra Leone, others, like Moseley and Randall, found themselves transported to the distant penal colony of Botany Bay, in Australia. *Epic Journeys of Freedom*, written in the best tradition of history from the bottom up, is a fascinating insight into the meaning of liberty; it will change forever the way we think about the American Revolution. From the Hardcover edition.

This open access Pivot book is a comparative study of six early colonial public libraries in nineteenth-century Australia, South Africa, and Southeast Asia. Drawing on networked conceptualisations of empire, transnational frameworks, and 'new imperial history' paradigms that privilege imbricated colonial and metropolitan 'intercultures', it looks at the neglected role of public libraries in shaping a programme of Anglophone civic education, scientific knowledge creation, and modernisation in the British southern hemisphere. The book's six chapters analyse institutional models and precedents, reading publics and types, book holdings and catalogues, and regional scientific networks in order to demonstrate the significance of these libraries for the construction of colonial identity, citizenship, and national self-government as well as charting their influence in shaping perceptions of social class, gender, and race. Using primary source material from the recently completed 'Book Catalogues of the Colonial Southern Hemisphere' digital archive, the book argues that public libraries played a formative role in colonial public discourse, contributing to broader debates on imperial citizenship and

nation-statehood across different geographic, cultural, and linguistic borders.

At the end of Liberia's thirteen-year civil war, the devastated population struggled to rebuild their country and come to terms with their experiences of violence. During the first decade of postwar reconstruction, hundreds of humanitarian organizations created programs that were intended to heal trauma, prevent gendered violence, rehabilitate former soldiers, and provide psychosocial care to the transitioning populace. But the implementation of these programs was not always suited to the specific mental health needs of the population or easily reconciled with the broader aims of reconstruction and humanitarian peacekeeping, and psychiatric treatment was sometimes ignored or unevenly integrated into postconflict humanitarian health care delivery. *Searching for Normal in the Wake of the Liberian War* explores the human experience of the massive apparatus of trauma-healing and psychosocial interventions during the first five years of postwar reconstruction. Sharon Alane Abramowitz draws on extensive fieldwork among the government officials, humanitarian leaders, and an often-overlooked population of Liberian NGO employees to examine the structure and impact of the mental health care interventions, in particular the ways they were promised to work with peacekeeping and reconstruction, and how the reach and effectiveness of these promises can be measured. From this courageous ethnography emerges a geography of trauma and the ways it shapes the lives of those who give and receive care in postwar Liberia.
