Choice Recommended Read This thoroughly revised new edition updates Sheila Greene's original transformative account of the psychological development of girls and women and the central role of time in shaping human experience. Greene critically reviews traditional and contemporary theoretical approaches – ranging from orthodox psychoanalysis to relational and post-modern theories – and argues that even those that claim to focus on development have presented a view of women's lives as fixed and determined by their nature or their past. These theories, she believes, should be rejected because of their inherent lack of validity and their frequently oppressive implications for women. Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasizes temporality, emergence and human agency. The result is a liberating theory of women's psychological development as constantly emerging and changing in time rather than as static and fixed by their nature, socio-cultural context and personal history. Closely paralleling the history of psychology is the history of its critics, their theories, and their contributions. *The Critique of Psychology* is the first book to trace this alternate history, from a unique perspective that complements the many existing empirical, theoretical, and social histories of the field. Thomas Teo cogently synthesizes major historical and theoretical narratives to describe two centuries of challenges to—and the reactions of—the mainstream. Some of these critiques of content, methodology, relevance, and philosophical worldview have actually influenced and become integrated into the canon; others pose moral questions still under debate. All are accessibly presented so that readers may judge their value for themselves: - Kant's critique of rational and empirical psychology at the end of the 18th century - The natural-scientific critique of philosophical psychology in the 19th century - The human-scientific critique of natural-scientific psychology - The Marxist traditions of critique - Feminist and postmodern critiques and the contemporary mainstream - Postcolonial critiques and the shift from cross-cultural to multicultural psychology This is not a book of critique for critique's sake: Teo defines the field as a work in progress with goals that are evolving yet constant. In emphasizing ethical and political questions faced by psychology as a discipline, this visionary book points students, academics, and practitioners toward new possibilities for their shared future.

It has been four decades since the publication of Adrienne Rich's *Of Woman Born* but her analysis of maternity and the archetypal Mother remains a powerful critique, as relevant today as it was at the time of writing. It was Rich who first defined the term "motherhood" as referent to a patriarchal institution that was male-defined, male controlled, and oppressive to women. To empower women, Rich proposed the use of the word "mothering": a word intended to be female-defined. It is between these two ideas—that of a patriarchal history and a feminist future—that the introductory text, *Interrogating Motherhood*, begins. Ross explores the topic of mothering from the perspective of Western society and encourages students and readers to identify and critique the historical, social, and political contexts in which mothers are understood. By examining popular culture, employment, public policy, poverty, "other" mothers, and mental health, *Interrogating Motherhood* describes the fluid and shifting nature of the practice of mothering and the complex realities that define contemporary women's lives.
