In this thrilling novel in A. American's Survivalist series, a man learns that in a world with no rules, the strength of family is the only thing that can pull you through. When society ceases to exist, who can you trust? After the collapse of the nation's power grid, America is under martial law—and safety is an illusion. As violence erupts around him, Morgan Carter faces one of his most difficult decisions yet: whether to stay and defend his home, or move to a more isolated area, away from the prying eyes of the government. He and his family are hesitant to leave their beloved Lake County, but with increasingly suspicious activities happening in a nearby refugee camp, all signs point towards defecting. Morgan and his friends aren't going to leave without a fight, though—and they'll do anything to protect their freedoms.

Poultry enthusiasts unite! ATK has you covered from the basic to the spectacular with 500 recipes that deliver low-key dinners, game-day favorites, simple sandwiches, special-occasion showstoppers, and beyond. You can call chicken a lot of things. Blank canvas, weeknight go-to, lean protein, we've heard it all. But boring? That's where we draw the line. Sure, it might have started to feel a bit redundant. But that's not the chicken's fault. ATK is here with the inspiration you need. It's time those chicken pieces in your freezer got the respect they deserve. Chicken is the go-anywhere, eat-with-anything, highly transformable crowd favorite that always fills the bill. Find exactly what you're looking for (and more!) with a wide breadth of themed chapters, including Easy Dinners, Classic Braises, Breaded and Fried, Pasta and Noodles, Savory Pies and Casseroles, and appliance-specific recipes. There's even a dedicated chapter of recipes for cooking for two. And with an introduction detailing how to prep any chicken part, from pounding breasts and preparing cutlets, to whole bird skills like butterflying or breaking down a chicken, you'll be a poultry pro in no time. Cozy up to succulent roast chickens with sauces made from pan drippings, sink your teeth into the crispiest, crunchiest fried chicken you've ever had, try your hand at sous vide for unbelievably moist chicken, or fire up the grill for anything from kebabs to beer can chicken. Feel like wingin' it? Us too. Our favorite is our game-changing Korean Fried Chicken Wings, double-fried so they stay extra-crispy under their blanket of spicy, salty, slightly-sweet sauce. With over

The author of the controversial bestseller *Brain Trust* brings his scientific expertise to the chilling true story of unexplained phenomena on Utah's Skinwalker Ranch -- and challenges us with a new vision of reality. For more than fifty years, the bizarre events at a remote Utah ranch have ranged from the perplexing to the wholly terrifying. Vanishing and mutilated cattle. Unidentified Flying Objects. The appearance of huge, otherworldly creatures. Invisible objects emitting magnetic fields with the power to spark a cattle stampede. Flying orbs of light with dazzling maneuverability and lethal consequences. For one family, life on the Skinwalker Ranch had become a life under siege by an unknown enemy or enemies. Nothing else could explain the horrors that surrounded them -- perhaps science could. Leading a first-class team of research scientists on a disturbing odyssey into the unknown, Colm Kelleher spent hundreds of days and nights on the Skinwalker

property and experienced firsthand many of its haunting mysteries. With investigative reporter George Knapp -- the only journalist allowed to witness and document the team's work -- Kelleher chronicles in superb detail the spectacular happenings the team observed personally, and the theories of modern physics behind the phenomena. Far from the coldly detached findings one might expect, their conclusions are utterly hair-raising in their implications. Opening a door to the unseen world around us, Hunt for the Skinwalker is a clarion call to expand our vision far beyond what we know. Offers advice on working with polyvinylchloride pipe, and shows how to make yard swings, picnic tables, hammocks, playhouses, chairs, sofas, bookcases, and end tables

and gaining the knowledge and skill sets that will make you better prepared for whatever life throws your way. 52 Prepper's Projects is the ultimate instructional guide to preparedness, and a must-have book for those with their eye on the future. Archery is almost as old as mankind itself, manifesting in almost every culture and on almost every continent. It is in many ways our link to the past and the stepping stone into another age. It is one of the few ancient pastimes that are still relevant today. Yet nowadays, getting into the ancient sport of archery can be daunting for the average person with no experience or previous exposure to the subject. For many, the hefty price tags on modern bows or the seemingly impossible task of building a bow can be a surefire deterrent. Many do not want to pay the price of a decent bow to try their hand at the bow and arrow, simply to see if they enjoy it or not. If only there was a way to make a bow good enough for a beginner without expending or gambling an immense amount of time or money on it. What if you were told that there was such a bow? That hidden in the ground, in the heart of buildings, on the shelves of most hardware stores, and perhaps even in your home, there was a material that made it all possible? Would you believe it? Well it is true, and that material is PVC pipe, the white or gray plastic pipe that can be found virtually everywhere. It is possible with only a minimal investment and an hour of labor

to make a fine bow for target archery that performs just as well as bows worth more than ten times as much. A bow that, if given a little more time and effort, can be made into an efficient hunting tool or serious target shooter. The Impossible Bow shows you how to construct your own PVC pipe bow, with bows ranging from the incredibly simple to the incredibly complex. Learn to build simple bows that require a minimum of tools and little time, more complex bows that can be modified to fit the target archer as well as the experienced hunter looking for more of a challenge, and finally a bow that accurately replicates the weapons of war of the steppe nomads. The best part is that even the most complex bow should cost no more than 10 dollars and be completed in a day, yet can hold up to the rigors of daily use. Don't let anything hold you back from enjoying one of man's oldest and most noble of sports. Join the backyard archery revolution with your very own bow that will defy everything you know and will baffle anyone who sees it. Join me in building an impossible bow. Author's Notes: The bows in this book are great for kids of all ages, from the young to the young at heart. Because of the ability of these bows to mimic many historical bow designs, this book is great for re-enactment archery as well as for the target archer. If made well, one design in particular works well for hunting, and can be modified to work just as well as many primitive

hunting bows. This book covers how to make the generic PVC pipe bow that has been the mainstay of do-it-yourself archery for some time now, as well as a couple designs which bring out the hidden performance of PVC as a bow material. These bows also work well for survival situations and can be made small and can be kept virtually anywhere out of the sun. In the trunk of a car, in a boat, in a hunting cabin, your basement, your attic, the list goes on and on. This book goes over how to make smooth shooting bows from 30 to 70 pounds of pull that can perform well if taken care of. While they aren't top performing bows, they can certainly be used for hunting, fishing, and target archery.

What do the humanities have to offer in the twenty-first century? Are there compelling reasons to go on teaching the literate arts when the schools themselves have become battlefields? Does it make sense to go on writing when the world itself is overrun with books that no one reads? In these simultaneously personal and erudite reflections on the future of higher education, Richard E. Miller moves from the headlines to the classroom, focusing in on how teachers and students alike confront the existential challenge of making life meaningful. In meditating on the violent events that now dominate our daily lives—school shootings, suicide bombings, terrorist attacks, contemporary warfare—Miller prompts a reconsideration of the role that institutions

of higher education play in shaping our daily experiences, and asks us to reimagine the humanities as centrally important to the maintenance of a compassionate, secular society. By concentrating on those moments when individuals and institutions meet and violence results, *Writing at the End of the World* provides the framework that students and teachers require to engage in the work of building a better future.

The three-dimensional camouflage of the famed ghillie suit is unparalleled in its ability to conceal the outdoorsman. But preassembled suits are expensive, and kits can be both costly and time-consuming. Tom Forbes, author of the best-selling *PVC Projects for the Outdoorsman* book and *The Invisible Advantage* video, has come up with an alternative. Using simple procedures and economical, easily found materials, Forbes guides readers through the manufacture of several different kinds of ghillie suit, including the garment used by the British military during World War II. This handy workbook contains tips on materials and techniques used in ghillie suit construction, as well as valuable information on stalking methods.

In today's high-tech society, even the most advanced devices and systems are not failsafe. Tools can break or wear out, batteries can go dead, and all sorts of malfunctions can render the modern conveniences we rely on totally useless. If quick replacements of failed items are not readily available, the ability to improvise and adapt in the workshop suddenly becomes very

practical. James Ballou, author of the best-selling Long-Term Survival in the Coming Dark Age, dramatically expands on the popular home workshop material in his first book to present a "makeshifter's" way of building and repairing things with only a pile of raw or salvaged materials, your hands and your mind. In this fascinating new book, he presents a wide range of unconventional, remarkably creative home workshop skills, including:

- **HOMEMADE TOOLS**—Make your own hammers, drills, screwdrivers, wrenches, pliers, saws, files, chisels, vises, clamps . . .
- **EXPEDIENT REPAIRS**—Perform sturdy repairs with ordinary glue, tape, cord, wire, dowels, nuts and bolts . . .
- **MAKESHIFT CONSTRUCTION**—Construct all sorts of functional items out of coat hangers, old car parts, 2 x 4s, wooden dowels, nails, rebar, coffee cans . . .
- **USEFUL PROJECTS**—Build a homemade forge out of an old barbeque; handle simple soldering jobs with a road flare; perform quick weld repairs with car batteries, jumper cables, and a pair of pliers . . .

Ballou also gives extensive instruction in makeshift metalworking, practical calculating skills, resourceful salvaging, plus dozens of practical tips for the craftsman or handyman who might need this information in an emergency or who simply enjoys learning about alternative ways to handle home workshop projects.

An in-depth exploration of the effects of different steels, heat treatments, and edge geometries on knife performance. This book provides ratings for toughness, edge retention, and corrosion resistance for all of the popular knife steels. Micrographs of over 50 steels. Specific recommended heat treatments for each steel. And answers to questions like: 1) Does a thinner or thicker edge last longer? 2) What heat treatment leads to the best performance? 3) Are there performance benefits to forging blades? 4) Should I use stainless or carbon steel? All of these questions and more are answered by a metallurgist who grew up around the knife industry.

Book 2 of The Survivalist Series No electricity. No running water. No food. No end in sight. If life as you knew it changed in an instant, would you be prepared? In A. American's first novel, *Going Home*, readers were introduced to Morgan Carter, the resourceful, tough-as-nails survivalist who embarks on a treacherous 250-mile journey across Florida following the collapse of the nation's power grid. Now reunited with his loving wife and daughters in this follow-up to *Going Home*, Morgan knows that their happiness is fleeting, as the worst is yet to come. Though for years Morgan has been diligently preparing for emergency situations, many of his neighbors are completely unready for life in this strange

new world--and they're starting to get restless. With the help of his closest companions, Morgan fights to keep his home secure--only to discover shocking information about the state of the nation in the process. Fans of James Wesley Rawles, William R. Forstchen's *One Second After*, and *The End* by G. Michael Hopf will revel in A. American's apocalyptic tale.

The first cookbook from homesteaders and co-stars of Discovery's *Alaska: The Last Frontier* Eve and Eivin Kilcher features appealing recipes for anyone looking to live more sustainably, healthfully, and independently, regardless of where and what they call home. Eve and Eivin Kilcher, stars of the hit Discovery show *Alaska: The Last Frontier*, are experts in sustainable living.

Homesteaders by choice, the couple has had to use their self-reliance skills to survive harsh winters in the Alaskan wilderness and raise a thriving family. In their debut book, the Kilchers share 85 original family recipes and advice on gardening, preserving, and foraging. The tips and techniques they have cultivated from their family and through necessity will help anyone looking to shrink their environmental footprint and become less dependent on mass-produced food and products. Stunningly photographed in and around their handmade home and farm, *Homestead Kitchen* illustrates that taking on small-scale sustainable projects is not only possible in a suburban/urban setting, but ultimately a more responsible and gratifying way to live.

A collection of fly-fishing essays reflect the author's visits to regions ranging from the Smokies to the Canadian Maritimes, where he explored such interests as fishing

Why just reuse a bucket when you can reinvent it? Five-gallon buckets are ubiquitous and cheap (indeed, they are often free). But did you know they can also be hacked, hot-rodged, reengineered, and upcycled to create dozens of useful DIY projects for homeowners, gardeners, small-scale farmers, and preppers? 5-Gallon Bucket Book contains 60+ ideas that put these humble and hard-working mainstays to work past their prime and keep them out of landfills. Simple step-by-step instructions, as well as parts lists and images of the completed projects, make sure you will have fun and love the results of your work. Projects include perfect additions to your yard and garden, tools to care for your animals, useful innovations, handy home helpers, and even family-oriented designs! They range from simple things such as chicken feeders to much more complex projects (small room air conditioner, anyone?). For anyone who doesn't already have fifteen of them cluttering up the garage, 5-Gallon Bucket Book also offers advice on where to get cheap and free buckets and how to tell if a bucket is safe to use for food. Put that spare PVC pipe to work with more than 50 inventive, step-by-step projects that yield tough and durable storage, furniture, gardening, toys, and much more, with The PVC Pipe Book. With a few simple fittings, common home-improvement-store PVC pipe can be treated much like building blocks. Learn to engineer it in new ways for DIY projects that prove useful indoors

and outside. Whether you're a homeowner, gardener, homesteader, prepper, or just a parent looking for some new toy ideas, the projects in *The PVC Pipe Book* give you plenty of options. Step-by-step instructions, parts lists, and photographs of completed projects make sure you will have fun and love the results of your work.

Projects range from simple creations like chicken feeders and waterers, to much more complex builds like a rolling workshop table. Other projects include: Practical creations include a step-stool, toy bin, safety gate, and gardening caddy Fun, fanciful ideas include a rocket launcher, water table, even soccer goals Homestead projects include a pet washer, chicken feeder, birdhouse, and hanging herb garden For anyone who needs some insight and a few tips on working with PVC, Peterson covers all the basics, as well as finishing techniques.

Forbes' first book, *PVC Projects for the Outdoorsman*, became a runaway best-seller with do-it-yourselfers, outdoorsmen and survivalists alike. Now he's taken his no-frills approach to creating inexpensive shelters, primitive weapons, sturdy outdoor furniture and hunting and fishing gear and come up with more than 30 new projects, all made with durable, cheap PVC pipe. Using photos and easy-to-follow instructions, this book guides you through such projects as a slingshot, brush bow, shooting bench, spotting scope stock, bow-fishing reel, wall tent, animal pen, pickup truck shelter, firewood cradle and many more. If you failed woodshop but still want to enjoy the dual satisfaction

of building something yourself and saving loads of money in the process, this is the perfect do-it-yourself book for you.

A comprehensive collection of cyberculture pioneer Gareth Branwyn's best work, *Borg Like Me* spans a 30-year writing career. The book covers Branwyn's coming of age in a commune, his involvement in the 90s zine publishing scene, his tenure at influential cyber arts and culture mags *Mondo 2000*, *bOING bOING*, *Wired*, and his eight years at *MAKE*, spearheading the growing maker movement.

Previously published material is woven throughout with Branwyn's unabashedly honest commentary, personal anecdotes, and original essays. Read about the smart-druggies behind *Mondo 2000*, impersonating Billy Idol in cyberspace (for Billy Idol), the making of the iconic early 90s hypermedia book, *Beyond Cyberpunk!*, and Branwyn going positively Phillip K. Dick after a heart attack and a bad blood transfusion. *Borg Like Me* is a smart, passionate, intense trip along the bleeding edges of art, technology, and culture at the turn of the 21st century.

When Morgan Carter's car breaks down 250 miles from his home, he figures his weekend plans are ruined. But things are about to get much, much worse: the country's power grid has collapsed. There is no electricity, no running water, no Internet, and no way to know when normalcy will be restored-if it
